PLEASE ADD TO COUNCIL, INTRODUCTION:

3. Draft ordinance amending Whatcom County Code Title 20, the official Whatcom County zoning maps, and the Whatcom County Comprehensive Plan and maps to implement changes related to rural land use planning (AB2013-180) (proposed schedule – May 21 initial public hearing on the draft ordinance)
### Title of Document:
Rural Element Update

### Attachments:
1. Proposed Ordinance, including draft amendments and Findings of Fact and Reasons for Action
2. Staff Memorandum

### Summary Statement or Legal Notice Language:
(If this item is an ordinance or requires a public hearing, you must provide the language for use in the required public notice. Be specific and cite RCW or WCC as appropriate. Be clear in explaining the intent of the action.)

A proposed ordinance to amend the Whatcom County Comprehensive Plan Chapter Two (Land Use); Whatcom County Code Title 20 (Zoning) Chapters 20.32 Residential Rural (RR) District, 20.34 Rural Residential-Island (EI) District, 20.36 Rural (R) District, 20.37 Point Roberts Transitional Zone (TZ) District, 20.71 Water Resources Protection Overlay, 20.80 Supplementary Requirements, 20.82 Public Utilities, and 20.97 Definitions; Whatcom County Code Title 24 (Health) Chapter 24.11 Drinking Water; and to amend the Whatcom County Comprehensive Plan Map 8 (Land Use Designations) and the official zoning map in the areas generally described as Birch Bay-Lynden & Valley View, Fort Bellingham/Marietta, North Bellingham, Smith & Guide Meridian, and Welcome.

Please Note: Once adopted and signed, ordinances and resolutions are available for viewing and printing on the County’s website at: www.co.whatcom.wa.us/council.
MEMORANDUM

TO: Whatcom County Council

THROUGH: Mark Personius, AICP, Long Range Planning Manager

FROM: Gary Davis, AICP, Senior Planner

DATE: May 6, 2013

SUBJECT: Rural Element

On April 25, 2013 the Planning Commission made its recommendations on Rural Element amendments. The Commission’s findings and recommendations are attached. This memorandum summarizes the Planning Commission’s recommended changes to the Comprehensive Plan, County Code, and zoning maps, and presents additional changes proposed by staff as clarifications, or as alternatives designed to respond to the Growth Management Hearings Board’s January 4, 2013 compliance order. The issues are discussed in order of the attached Summary of Issues sheet (no action is proposed on Issues 3 and 5, which the County has appealed to Superior Court). For more detailed discussion of the Board’s orders on each of the issues, see the attached March 11 staff report.

A Committee of the Whole meeting is scheduled for May 21 to discuss the recommendations, and a public hearing is scheduled for the regular County Council meeting that same night. Time will be allotted to the Rural Element amendments at the June 4 and June 18 County Council meetings. The compliance date set by the Hearings Board is July 3.

Issue 1: Variety of Rural Densities

The Board noted that only 21% of the rural area is zoned R10A, and was concerned that this number could be reduced further because the County did not restrict rezones from R10A to R5A (and therefore could not assure the ”variety of rural densities” required by GMA). In response, the Planning Commission has recommended Comprehensive Plan amendments that establish criteria for R10A parcels that may be considered for zoning with higher densities (Policy 2GG-3).

Uses and densities within the Rural designation should reflect established rural character. Rezones within the Rural designation should be consistent with the
established rural character and densities. Land in the R10A district may be rezoned to a rural zone that allows a higher density only if:

A. Rezoning area abuts zoning of higher density or intensity (parcels are abutting even if there is a public or private road between them), or

B. All the following items are satisfied:

1. Residential density (the average size of parcels that contained a residence as of January 1, 2013) within 500 feet of the area to be rezoned is less than 7.5 acres,

2. The proposed rezoning area is not in a designated urban growth area reserve.

The recommended amendments also include changes to the explanatory text above Goal 2GG. The proposed text reads:

Portions of the rural area that historically contain larger lots have been zoned for densities of one dwelling per ten acres. These areas provide for a variety of densities important to the rural character and must be retained. Rezones from R10A to allow higher densities are limited to those R10A areas that are adjacent to established higher densities.

The Planning Commission added criterion (A.) to allow for parcels abutting zoning of higher density, but that does not necessarily equate to "established higher densities" specified in the supporting text to Goal 2GG. Staff has estimated that there are 275 R10A parcels 10 acres or larger adjacent to zones other than Agriculture, Rural Forestry, or Commercial Forestry. There are 840 parcels 10 acres or larger in the R10A zone, so about one third of those parcels would be eligible for rezoning under criterion A.\(^1\) PDS recommends that the criterion for adjacency to higher-density zoning be removed. If the zoning adjacency criterion is retained, staff would recommend specifying that the parcel be adjacent to higher-density zoning as of January 1, 2013 to avoid a cumulative "creep" of the boundary over time, and modifying the explanatory text to reflect the zoning-adjacency criterion.

The two criteria under B. - residential density within 500 feet, and not being in a UGA reserve - were proposed by staff and retained in the Planning Commission recommendation. Staff had also proposed a third criterion which the Planning Commission omitted: "The proposed rezoning area is not within an area designated as a rural study area in the 2007 Rural Land Study accepted by the County in Resolution 2009-040." The reason for proposing this criterion was to hold zoning density constant in the areas that may be considered for Agriculture zoning in the future as part of the implementation measures of the County's Agricultural Strategic Plan. If the County Council wishes to add this criterion, it would be added as one of the items under B.

Staff presented to the Planning Commission a study of parcels that would meet proposed criteria under B. Staff estimated that about 50 R10A parcels larger

---

\(^1\) GIS query of Whatcom County’s "m:\\legis\data\cadastral\ParcelMasterPLN.mdb\tax parcels" data for R10A zoned parcels greater than or equal to 10 acres within 100 feet of all other zones except AG, RF, and CF.
than 10 acres countywide would fall within the one dwelling per 7.5 acre density threshold overall; 12 of those are in rural study areas, and 7 are in UGA reserves.

In addition, recommended changes to the Zoning Code (WCC 20.32.253 and WCC 20.36.253) refer the reader to the Comprehensive Plan for policies on the application of densities in the rural area.

**Issue 2: Lot Clustering**

The Board found that the County was not justified in citing its rural clustering provisions as measures to protect rural character because they allow development in reserve areas, and the cluster design standards are “aspirational” rather than enforceable standards. The recommended changes to the clustering provisions in the Residential Rural (RR), Rural Residential Island (RRI), and Rural (R) zones revise standards to remove aspirational language (e.g. changing “should” to “shall”), and to prohibit development of reserve areas (except for agricultural structures in agricultural reserves).

Under the Planning Commission’s recommendation, the zoning code would make a distinction between a “reserve area” and a “reserve tract.” The “reserve area” percentage required for cluster subdivisions in the RR, RRI, and R zones would apply to a “reserve area” easement that is shown on a cluster plat. The “reserve tract,” the largest lot in a cluster plat may contain land outside the “reserve area” easement that can be developed with a dwelling unit, **as long as the development does not occur on the “reserve area” easement.** This approach is consistent with the reserve provisions that already exist in the Point Roberts Transitional Zone.

In its decision, the Board cited WAC 365-196-425(5)(b), the State’s standards for rural cluster subdivisions. Section (5)(b)(iii) states, “The open space portion of the original parcel should be held by an easement for open space or resource use. This should be held in perpetuity without an expiration date.” (emphasis added) Staff believes the proposed amendment is consistent with the WAC standard and the Board’s order, because the “reserve area” required percentage is the portion of the parent parcel established as an easement on the plat that runs in perpetuity as long as it is in the rural area. If it is later included in an Urban Growth Area, the reserve area can be developed.

**Uses in “reserve area.”** The recommended amendments also and add a new definition of “reserve area” (WCC 20.97.344) and modify the definition of “reserve tract” (WCC 20.97.345) Part of the “reserve tract” definition states:

> A portion of a reserve tract may be developed but above-ground development shall not occur within a reserve area easement.

In the standards for “reserve areas” in the RR, RRI, and R chapters, various improvements are allowed in reserve tracts both below and above ground.
(Section .315). **Staff recommends revising the above wording to correspond with the uses listed in the individual zoning chapters:**

A portion of a reserve tract may be developed but development within a reserve area easement shall be limited to that permitted per the reserve area standards for the zoning district in which the tract is located, above-ground development shall not occur within a reserve area easement.

**Agricultural structures.** The Planning Commission added an exception that allows development of "structures used for agricultural purposes" in reserve areas designated for agriculture. The intent is to allow for viable agricultural use of the reserve area. Because "agricultural purposes" is a broad term, **PDS recommends revising that language to “structures used for on-site agriculture uses permitted in WCC 20.32.054 [or 20.34.052, or 20.36.052]” which would more clearly restrict agricultural uses to those already permitted outright in the RR, RRI, or R zones. The agricultural uses permitted in these zones are described in WCC 20.32.054, 20.34.052, and 20.36.052 as:**

- Agriculture including animal husbandry, horticulture, viticulture, floriculture and beekeeping; and the cultivation of crops.

**Definition of reserve tract.** The “reserve tract” definition was also revised to describe the tract as “that portion of a proposed cluster division, subdivision or short subdivision which is not one of the cluster lots” in order to differentiate it from the “reserve area.” **Staff believes it is appropriate to restore the previous wording “which is intended for agricultural, forestry, open space or other future-approved development purposes.”** The wording that follows that passage should adequately explain the distinction between a reserve tract and a reserve area.

**Easement or plat note.** The proposed description of “reserve area” in the zone chapters (section .315(1)) states:

A note on the subdivision plat shall establish a reserve area per the definition in WCC 20.97.344 that is protected in perpetuity so long as it is not within an urban growth area.

Staff recommends substituting language that clarifies that a reserve area is “An easement on the subdivision plat...” This is consistent with the proposed definition in WCC 20.97.344, which states:

When the lot clustering method of land division or subdivision is used, the “reserve area” is an easement on a proposed division, subdivision or short subdivision which is reserved for agricultural, forestry, or open space purposes in perpetuity, or for other future-approved development purposes as specified in Whatcom County Code.

**Reserve area percentages.** The Planning Commission revised the density and lot size table in the Rural zone (WCC 20.80.253) to reduce the required minimum percentage of a parent parcel that must be placed in a reserve area in a cluster subdivision. Under current cluster provisions, residences can be built within the
reserve area (which the Hearings Board cited). Under the proposed cluster provisions, a residence cannot be built within a reserve area easement, meaning the area available for development would be decreased and flexibility in designing a cluster subdivision would be reduced if the current percentages remain in place. The revised reserve area percentages account for this. Most percentages in the table were reduced by 10 percentage points (e.g. 75% to 65% for R5A), though the percentages were not reduced for parcels subject to the Agriculture Protection Overlay (WCC 20.38).

**Issue 4: Rural Neighborhood Boundaries**

The Board found that:

Fort Bellingham/Marietta and, to a lesser extent, North Bellingham contain a number of large undivided parcels. Whether these are golf courses, commercial greenhouses, or agricultural lands, the Board questions the application of the small-lot “2011 development pattern” standard to these parcels... Including large undivided parcels in the RN designation violates the internal consistency requirement of RCW 36.70A.070 (preamble) because the RN designation is defined by a 2011 small-lot development pattern. (1/4/13 order, p. 60)

In response, the Planning Commission has recommended changes to the boundaries of the Fort Bellingham/Marietta and North Bellingham Rural Neighborhoods, and removal of the Welcome Rural Neighborhood designation (see maps in the Comprehensive Plan amendments).

Staff’s original proposed boundary for Fort Bellingham/Marietta removed 22 large parcels (those larger than 5 acres, as shown in red on the attached analysis maps), leaving 4 large parcels within the boundary. The Planning Commission’s recommended boundary removes 12 large parcels, leaving 14 within the boundary. In North Bellingham, staff’s proposed boundary removed 11 large parcels, leaving 10 within the boundary. The Planning Commission’s recommended North Bellingham boundary removes 6 large parcels, leaving 20 within the boundary.

Staff recommends reviewing the Planning Commission’s recommended boundaries to consider removing more of the larger parcels in light of the Board’s order.

The Council may wish to further address the internal inconsistency issue by amending the Comprehensive Plan’s description of Rural Neighborhoods to consistently refer to “higher rural density,” rather than “smaller-lot areas,” and to provide criteria for including some larger lots. This would involve replacing “smaller-lot” with “higher rural density” in the last sentence of the first paragraph under Rural Neighborhoods heading. Making the language consistent places the emphasis on overall density in the areas and reduces the possibility that County policy may be misinterpreted as requiring that all lots in the rural neighborhoods be “small lots.”
Elimination of the Welcome Rural Neighborhood means the Rural Residential Density Overlay option is removed from the R5A zoning. Staff has calculated that none of the parcels would have been able to use the overlay to gain density, given the size of surrounding parcels.

**Issue 6 and 7: LAMIRD boundaries**

The Board found that one parcel in the Birch Bay-Lynden & Valley View LAMIRD and two in the Smith & Guide Meridian LAMIRD did not meet the GMA’s criteria for inclusion in a LAMIRD, making the boundaries of those LAMIRDs noncompliant with GMA. Staff had proposed removing those parcels from the LAMIRDS but the Planning Commission has recommended that the LAMIRD boundaries remain. Staff recommends revision of the LAMIRD boundaries in light of the Board’s order.

**Issue 8: Water Lines**

The Board found the County’s provisions for extension of water lines do not comply with the GMA’s prohibition on extension of urban services into rural areas. At issue was the apparent ability to extend urban level water service into rural areas, particularly the County’s allowance of large-diameter “transmission lines” to be extended into rural areas with no clear definition of “transmission line.”

The GMA lists domestic water service under the definitions of both urban and rural governmental services (RCW 36.70A.030 (17) and (20)). The GMA’s definition of rural governmental services refers to those that are “historically and typically delivered at an intensity usually found in rural areas.” RCW 36.70A.110 (4) prohibits extension or expansion of urban services in rural areas except where necessary to protect health and safety. WAC 246-290-010 (267) provides a definition for water transmission lines.

The proposed amendments to the Zoning Code, 20.82.030 (3)(b) points to the rural/urban distinction made in GMA, permitting outright:

> New water lines outside urban growth areas or limited areas of more intensive rural development (LAMIRDS) in conformance with a state approved water comprehensive plan pursuant to RCW 43.20.260 and consistent with the Whatcom County Comprehensive Plan, so long as they are water transmission lines per WCC 20.97.452, or provide service at an intensity historically and typically found in rural areas, per RCW 36.70A.030 (17), including but not limited to agricultural uses. Water service for uses or densities not permitted in rural or resource areas shall not be extended or expanded outside urban growth areas or limited areas of more intensive rural development (LAMIRDS), except where necessary to protect basic public health and safety and the environment and when such services are financially supportable at rural densities and do not permit urban development, per RCW 36.70A.110 (4).
The recommended definition of “water transmission lines” (proposed WCC 20.97.452) is identical to the WAC definition. Staff and the Planning Commission believe these amendments appropriately respond to the Board’s order.

ORDINANCE AMENDING WHATCOM COUNTY ZONING CODE TITLE 20, THE
OFFICIAL WHATCOM COUNTY ZONING MAP, AND THE WHATCOM COUNTY
COMPREHENSIVE PLAN AND MAPS, TO IMPLEMENT CHANGES RELATING TO
RURAL LAND USE PLANNING

WHEREAS, the Washington State Growth Management Act (GMA) requires
Whatcom County to include a rural element in its Comprehensive Plan that governs
rural development; and

WHEREAS, time is of the essence to complete the revisions of Whatcom
County’s rural element due to an order of the Western Washington Growth
Management Hearings Board in Futurewise v. Whatcom County, Case No. 11-2-
0010c; and

WHEREAS, the recommended amendments have been considered by the
Whatcom County Planning Commission, the Whatcom County Council Planning and
Development Committee and the Whatcom County Council; and

WHEREAS, legal notice requirements have been met; and

WHEREAS, the County Council finds the Comprehensive Plan and zoning
amendments in the interest of the public health, safety, and welfare, based on the
following findings and conclusions:

FINDINGS OF FACT:
1) Whatcom County proposes amendments to its Comprehensive Plan, Zoning
Code, and Zoning Maps in response to the Washington State Growth
Management Hearings Board’s January 4, 2013 Compliance Order (GMHB No.
11-2-0010c).

2) An addendum to the May 1, 2009 determination of non-significance (DNS) was
issued under the State Environmental Policy Act (SEPA) on April 12, 2013.

3) The proposed amendments were posted on the County website on March 11,
2013.

4) Notice that the proposal had been posted on the County website was sent to
citizens, citizens groups, cities, service providers, media and other groups on the
County’s e-mail list on March 11, 2013.

5) Notice of the subject amendment was submitted to the Washington State
Department of Commerce on March 11, 2013.

6) Notice of the Planning Commission hearings for the subject amendment was published in the Bellingham Herald on March 16, 2013.

7) Notice of the Planning Commission hearing for the subject amendment was posted on the County’s website on March 8, 2013.

GMA Requirements

9) The Washington Growth Management Act (GMA) requires county comprehensive plans to include a rural element that protects the county’s established rural character by containing or otherwise controlling rural development.

10) GMA (RCW 36.70A.070(5)(a)) allows counties to consider local circumstances in its rural element but requires counties to develop a written record explaining how the rural element harmonizes the planning goals in RCW 36.70A.020 and meets the requirements of RCW 36.70A. (See Conclusions 2 and 3 below).

11) GMA allows, but does not require, counties to designate "limited areas of more intensive rural development” (LAMIRDs) (RCW 36.70A.070(5)(d)) and describes three types of development patterns that may be considered LAMIRDs:

   a) Type I: “Rural development consisting of the infill, development, or redevelopment of existing commercial, industrial, residential, or mixed-use areas, whether characterized as shoreline development villages, hamlets, rural activity centers, or crossroads developments...Any development or redevelopment in terms of building size, scale, use, or intensity shall be consistent with the character of the existing areas.” (RCW 36.70A.070(5)(d)(i)) In RCW 36.70A.070(5)(d)(iv), GMA states, “Existing areas are those that are clearly identifiable and contained and where there is a logical boundary delineated predominately by the built environment, but that may also include undeveloped lands as provided in this subsection.”

   GMA requires counties to establish logical outer boundaries for areas of more intensive rural development and describes considerations that must be addressed in establishing those boundaries Per RCW 36.70A.070(5)(d)(v), existing areas are those that existed on July 1, 1990.

   b) Type II: “The intensification of development on lots containing, or new development of, small-scale recreational or tourist uses, including commercial facilities to serve those recreational or tourist uses, that rely on a rural location and setting but that do not include new residential development...” (RCW 36.70A.070(5)(d)(ii)

   c) Type III: “The intensification of development on lots containing isolated nonresidential uses or new development of isolated cottage industries and
isolated small-scale businesses that are not principally designed to serve the existing and projected rural population and nonresidential uses, but do provide job opportunities for rural residents…” (RCW 36.70A.070(5)(d)(iii)

12) GMA requires that the rural element of a county comprehensive plan provide for a variety of rural densities, uses, essential public facilities, and rural governmental services needed to serve the permitted densities and uses, and allows counties to use innovative zoning techniques that will accommodate appropriate rural densities and uses that are consistent with rural character.

13) GMA requires that the rural element of a county comprehensive plan provide measures governing rural development that protect the rural character by:
   a) Containing or otherwise controlling rural development;
   b) Assuring visual compatibility of rural development with the surrounding rural area;
   c) Reducing the inappropriate conversion of undeveloped land into sprawling, low-density development in the rural area;
   d) Protecting critical areas, as provided in RCW 36.70A.060, and surface and ground water resources; and
   e) Protecting against conflicts with the use of agricultural, forest, and mineral resource lands designated under RCW 36.70A.170.

14) GMA requires local governments that are required or choose to plan under GMA to utilize a process established by the Washington State Attorney General to assure that proposed regulatory or administrative actions do not result in an unconstitutional taking of private property. (RCW 36.70A.370) The Whatcom County Prosecutor’s office informed the Planning Commission and County Council of this requirement and, in accordance with Attorney General’s Advisory Memorandum, advised them regarding the proposed amendments with respect to avoiding unconstitutional taking of private property.

15) The legislature finds that to retain and enhance the job base in rural areas, rural counties must have flexibility to create opportunities for business development. Further, the legislature finds that rural counties must have the flexibility to retain existing businesses and allow them to expand. (RCW 36.70A.011)

Growth Management Hearings Board Decisions: *Futurewise vs. Whatcom County*

16) In *Futurewise v. Whatcom County and Gold Star Resorts, Inc.* (#05-2-0013 Sept. 20, 2005 Final Decision and Order), the Western Washington Growth Management Hearings Board (WWGMHB) found Whatcom County out of compliance on three issues: The policies pertaining to Small Town, Crossroads Commercial, Resort and Recreational Subdivision, Suburban Enclave, and Transportation Corridor land use designations allow the creation of more intensive areas of rural development that do not comply with RCW
36.70A.070(5)(d); The Rural Residential zones (RR-1, RR-2, RR-3), Eliza Island (EI) zone, Rural two-acre (R-2A), and Rural Residential Island (RRI) zones allow residential densities that are not rural in the rural areas and are not in limited areas of more intensive rural development per RCW 36.70A.070(5)(d); and Urban Residential three-per-acre (UR-3) zoning in urban growth areas (except the UR-3 in Lake Whatcom watershed and the airport hazard area) failed to achieve appropriate urban densities.

17) In June, 2007 Whatcom County rezoned approximately 1,700 acres in the Ferndale and Everson UGAs to UR-4 in 2007 (Ord. 2007-030 and 2007-045) to address the urban density noncompliance issue in the September 20, 2005 Futurewise v. Whatcom County and Gold Star Resorts, Inc. decision.

18) The WWGMBH issued a finding of compliance on the urban density issue on August 30, 2007.

19) The September 20, 2005 Futurewise v. Whatcom County and Gold Star Resorts, Inc. decision relating to the land use designations and rural density issues was reversed in Whatcom County Superior Court in 2006. The Superior Court decision was, in turn, reversed by the Division I Court of Appeals in 2007, which reinstated the 2005 WWGMBH decision and ordered Whatcom County to comply with that decision (140 Wn. App. 378). In December, 2009 the Supreme Court of the State of Washington reversed the Court of Appeals’ holding that the hearings board did not improperly apply a bright line in addressing the challenge to Whatcom County’s rural densities, but affirmed the Court of Appeals’ decision that Whatcom County’s comprehensive plan did not comply with the Growth Management Act’s LAMIRD provisions. The Supreme Court remanded the rural density challenge to the Hearings Board for reconsideration without applying a bright line rule, and ordered Whatcom County to “revise its comprehensive plan to conform to the LAMIRD provision of the Growth Management Act and then apply the statutory criteria to establish appropriate areas of more intensive rural development.” (167 Wn.2d 723, 735, 222 P.3d 791)

20) In August, 2009 Whatcom County amended Whatcom County Code (WCC) Chapter 20.34 Rural Residential – Island District (one of the zones found to be out of GMA compliance in the 2005 Futurewise vs. Whatcom County decision) to change the required minimum lot size from three acres to five acres (Ord. 2009-062).

22) In 2011 the Washington Supreme Court issued a ruling in Kittitas County (172 Wash.2d 144) regarding the GMA requirement that county comprehensive plans must contain measures that protect the rural character.

23) On September 9, 2011, the GMHB Order Following Remand from the Supreme Court regarding the remaining rural density from case #05-2-0013 (remanded by the 2009 Supreme Court decision) found Ordinance 2011-013’s
retention of rural zoning with density of one dwelling per two acres was 
approval with the GMA because it was limited to areas in which similar 
densities had already been established.

24) On November 9, 2011, Whatcom County adopted Ordinance 2011-043, 
making modifications to Ordinance 2011-013, including changing Rural 
Residential Density Overlay provisions and restricting location of certain 
commercial and industrial zoning districts.

25) The January 9, 2012 GMHB Final Decision and Order (FDO) in Futurewise et al v. Whatcom County (#11-2-0010c) found the amendments adopted under 
Ordinance 2011-013 out of compliance with respect to several issues involving 
Comprehensive Plan policies, LAMIRD boundaries and development regulations, 
and found invalidity on some of those issues.

26) The January 4, 2013 GMHB Compliance Order in Futurewise et al v. Whatcom County (#11-2-0010c) found some amendments adopted under Ordinance 
2012-032 out of compliance with respect to several issues involving 
Comprehensive Plan policies, LAMIRD boundaries and development regulations, 
and found invalidity on some of those issues.

27) The January 4, 2013 GMHB Compliance Order in Futurewise et al v. Whatcom County (#11-2-0010c) found the population monitoring requirements of Policy 
2DD-1 adopted by Ordinance 2012-032 does not create an internal 
inconsistency which violates GMA and is a “measure to contain and control rural 
development” that complies with GMA.

Other Relevant Growth Management Hearings Board Decisions

28) Regarding the term “built environment,” the built environment includes those 
facilities which are manmade, whether they are above or below ground, and the 
built environment must predominate within a LAMIRD, though it may include 
limited undeveloped lands. (Anacortes vs. Skagit County, Case No. 00-2-0049c, 
Final Decision and Order, February 6, 2001)

29) The WWGMHB found that RCW 36.70A.115 does not impose an obligation on 
counties to conduct a needs and capacity analysis for areas outside the UGAs 
and that provision does not require a rural lands analysis but instead merely 
requires the County to ensure sufficient capacity of land for development to 
accommodate the growth allocated in the County’s countywide planning policies. 
(Friends of Skagit County vs. Skagit County, Case No. 07-2-0025c, Final 
Decision and Order, pp-43-43, May 12, 2008)

30) The WWGMHB found the uses a county allows within LAMIRSDs designated per 
RCW 36.70A.070(5)(d)(i) must be consistent with (though not necessarily the 
same as) the uses as of July 1, 1990, and allowance of a broader range of uses 
as conditional uses is not compliant with GMA. (Dry Creek Coalition and 
Futurewise vs. Clallam County, Case No. 07-2-0018c, Final Decision and Order, 
April 23, 2008)

31) The WWGMHB found Clallam County’s Rural Neighborhood Conservation (NC) 
Overlay (Clallam County Code 33-10-015), which permits rural densities outside
LAMIRDs greater than one dwelling per five acres based on a calculation of the density of developed lots within 500 feet of a property, to be compliant with the Growth Management Act. The Board stated, "Because infill allowed by the NC overlay is limited to neighborhoods that have already been substantially developed, this will not lead to the ‘inappropriate conversion of undeveloped lands into sprawling, low-density development...’", a reference to Goal 2 of the GMA. (*Dry Creek Coalition and Futurewise v. Clallam County*, WWGMHB No. 07-2-0018c, Compliance Order, November 3, 2009, p.10)

32) The Washington State Supreme Court has held that a growth management hearings board cannot base its evaluation of a county’s permitted rural densities on a “bright line” rural density of one dwelling per five acres. (*Thurston County vs. Western Washington Growth Management Hearings Board*, 164 Wn.2d 329, 190 P.3d 38, 2008; and *Gold Star Resorts vs. Futurewise and Whatcom County*, 167 Wn.2d 723, 735, 222 P.3d 791, December 17, 2009)

33) The WWGMHB found Whatcom County used appropriate Type I LAMIRD criteria to revise its comprehensive plan designation boundary in the Lake Samish area. (*Leenstra vs. Whatcom County*, WWGMHB Case No. 03-2-0011, Final Decision and Order, September 26, 2003)

34) The WWGMHB found Jefferson County was not clearly erroneous when it designated a LAMIRD adjacent to an urban growth area where the City of Port Townsend had decided it was inappropriate to expand its urban growth area. (*People for a Liveable Community, Jim Lindsay, et al. vs. Jefferson County*, WWGMHB Case No. 03-2-0009c, Final Decision and Order, August 22, 2003)

35) The WWGMHB found that the use of the term “or” rather than “and” in RCW 36.70A.070(d)(i)(C) “appears to indicate a Legislative determination that the factors of building size, scale, use, or intensity are ones that may be considered in determining the character of the existing area, but that development is not required to meet every one of those parameters. If the Legislature had intended to use the word ‘and’ in the statute, they would have done so.” (*Dry Creek Coalition vs. Clallam County*, WWGMHB Case No. 08-2-0033, Final Decision and Order, June 12, 2009, p.8)

**Whatcom County Policy and Requirements**

36) WCC 2.160.080 requires that, in order to approve the proposed comprehensive plan amendments the Planning Commission and County Council must find all of the following:

a) The amendment conforms to the requirements of the Growth Management Act, is internally consistent with the county-wide planning policies and is consistent with any interlocal planning agreements.

b) Further studies made or accepted by the Department of Planning and Development Services indicate changed conditions that show need for the amendment.
c) The public interest will be served by approving the amendment. In determining whether the public interest will be served, factors including but not limited to the following shall be considered:

i) The anticipated effect upon the rate or distribution of population growth, employment growth, development, and conversion of land as envisioned in the comprehensive plan.

ii) The anticipated effect on the ability of the county and/or other service providers, such as cities, schools, water and/or sewer purveyors, fire districts, and others as applicable, to provide adequate services and public facilities including transportation facilities.

iii) Anticipated impact upon designated agricultural, forest and mineral resource lands.

d) The amendment does not include or facilitate spot zoning.

e) Urban growth area amendments that propose the expansion of an urban growth area boundary are required to acquire development rights from a designated TDR sending area, with certain exceptions.

37) Whatcom County’s County-wide Planning Policies include policies related to rural lands:

a) County-wide Planning Policy B.1 states, “The county shall work with citizens to define a variety of types of rural areas based on the characteristics and needs of different areas.”

b) County-wide Planning Policy B.2 states, “The county shall discourage urban level development outside Urban Growth Areas and outside of areas currently characterized by a development threshold greater than a rural development density.”

c) County-wide Planning Policy B.3 states, “Whatcom County shall promote appropriate land uses and allow for infill within rural settlements characterized by existing commercial industrial, and intensive residential development greater than a rural development density. These areas should be clearly delineated and not expanded beyond logical outer boundaries in accordance with RCW 36.70A.070(5). Impacts on rural character, critical areas and other economic considerations as well as the availability of capital facilities and rural levels of service must be considered before allowing infill in these areas.”

d) County-wide Planning Policies P.1 and P.2 reflect GMA Planning Goal (6) (RCW 36.70A.020(6), which states private property shall not be taken for public uses without just compensation, and Whatcom County Charter Section 1.11, which states no regulation or ordinance shall be drafted and adopted without consideration of and provisions for compensation to those unduly burdened.
Public Participation

38) Whatcom County’s County-wide Planning Policies include policies related to citizen involvement:

   a) County-wide Planning Policy A.2 states, “The county and the cities shall provide opportunities for citizens to become involved in the growth management planning process through various mechanisms, such as surveys, public workshops, meetings, hearings, and advisory committees.”

   b) County-wide Planning Policy A.4 states, “Citizen comments and viewpoints shall be incorporated into the decision-making process in development of draft plans and regulations. Consideration of citizen comments shall be evident in the decision-making process.”

39) The Whatcom County Planning Commission held open work sessions on the proposed amendments on March 14, 2013 and held public hearings on March 28, 2013. Since publication of the first draft amendments on March 11, 2013, the most current draft amendments have been continuously posted on the County’s web site, as have all documents presented to the Planning Commission and all written public comments.

CONCLUSIONS:

1) The proposed amendments are consistent with the goals and requirements of the Washington Growth Management Act (GMA) and are in the public interest, and the proposed amendments to Whatcom County Code and the Official Zoning Maps are consistent with the Comprehensive Plan.

2) The rural element of the Comprehensive Plan harmonizes the GMA planning goals in RCW 36.70A.020.

   a. Urban growth. Comprehensive Plan Policy 2DD-1 encourages development in urban areas by concentrating growth in urban areas per the adopted population projections and monitoring rural growth and taking actions as necessary to keep rural growth consistent with adopted projections. The proposed amendments do not affect this policy.

   b. Reduce sprawl. Proposed Comprehensive Plan Policy 2DD-8 and policies guiding growth within rural land use designations (under Goals 2GG, 2JJ, 2KK, 2LL) reduce the inappropriate conversion of undeveloped land into sprawling, low density development in the rural area through use of LAMIRDs with clearly defined boundaries and criteria for creating or changing those boundaries consistent with RCW 36.70A.070(5)(d). Policies 2MM-1 and 2 control and contain areas of higher rural densities. The proposed amendments do not affect these policies.

   c. Transportation. Comprehensive Plan Policy 2DD-1, which encourages growth in urban areas and keeps rural growth consistent with adopted projections, is consistent with effective planning of efficient countywide multimodal transportation systems. Policies 2FF-1, 2FF-2, 2FF-4 and the text describing rural character and lifestyle support rural employment
opportunities, which can reduce vehicle trips from rural to urban areas. The proposed amendments do not affect these policies.

d. Housing. Comprehensive Plan Policies 2GG-2 and 2GG-3, in conjunction with the development regulations in WCC 20.32 Residential Rural District and 20.36 Rural District, allows for residential development at a variety of densities appropriate to established rural character and development patterns. The proposed amendments change Policy 2GG-3 to better ensure a variety of rural densities.

e. Economic development. Comprehensive Plan Policies 2DD-8, 2DD-9, 2EE-8, 2FF-1, 2FF-2, 2FF-3, 2FF-4, and 2JJ-5 support retention and expansion of existing businesses in rural areas within the capacity of natural resources and appropriate levels of rural services. The proposed amendments do not affect these policies.

f. Property rights. Neither the rural element nor the process leading to its adoption has taken private property for public use without just compensation or involved arbitrary and discriminatory actions. On March 28, 2013 the Planning Commission was briefed on the Attorney General’s Advisory Memorandum on Avoiding Unconstitutional Takings of Private Property, per RCW 36.70A.370.

g. Permits. Nothing in the rural element prevents permit applications from being processed in a timely and fair manner.

h. Natural resource industries. Comprehensive Plan Policy 2FF-2 and development regulations in WCC 20.69 Rural Industrial/Manufacturing District support resource-based industries. Policies 2DD-2.D, 2FF-3, 2GG-4 support minimizing conflicts with resource uses. The proposed amendments do not affect these policies.

i. Open space and recreation. Policies 2DD-2.A.2, 2DD-2.A.3, 2DD-2.B, 2DD-2.C, which adopt by reference various development regulations, provide measures to assure visual compatibility with surrounding rural areas, reserve open space through lot clustering, and to protect wildlife habitat and water resources. The proposed amendments do not affect these policies.

j. Environment. Policy 2DD-2.C, which adopts by reference various development regulations, provides measures to protect critical areas and surface and ground water resources. The proposed amendments do not affect this policy.

k. Citizen participation and coordination. Throughout the process to develop and adopt amendments to the rural element, citizens and local jurisdictions have been kept informed and invited to participate through use of e-mail and internet.

l. Public facilities and services. Policy 2DD-2.A.4, which adopts by reference WCC 20.80.212 Concurrency, ensures that no subdivision, commercial development or conditional uses be approved without a written finding that service providers have adequate capacity to serve the development.
and that no County facilities will be reduced below applicable levels of service as a result of the development. The proposed amendments do not affect this policy.

m. Historic preservation. Policy 2DD-7 supports maintaining the historic character and cultural roles of each rural area and community. The proposed amendments do not affect this policy.

3) The rural element of the Comprehensive Plan and the county development regulations, as amended, meet the requirements of the Growth Management Act, RCW 36.70A.

a. The rural element includes measures that protect the rural character per RCW 36.70A.070(5)(c) in Policies 2DD-1, 2DD-2, 2GG-2, 2GG-3, and 2MM-1-4.

b. The rural element provides for limited areas of more intensive rural development, limited per the requirements of RCW 36.70A.070(5)(d), in policies 2HH-1 through 3, 2JJ-1 through 8, 2KK-1 and 2, and 2LL-1-4. The proposed amendments do not affect these policies.

c. The rural element contains a description of rural character and lifestyle that considers local circumstances as permitted in RCW 36.70A.070(5)(a), and contains the GMA definition of rural character per RCW 36.70A.030(15). The proposed amendments do not affect that description.

d. Policies 2DD-8, 2DD-9, 2EE-8, 2FF-1, 2FF-2, 2FF-4, and 2JJ-5 support retention and expansion of existing businesses in rural areas, as supported by RCW 36.70A.011. The proposed amendments do not affect these policies.

e. Comprehensive Plan policies describing rural land use designations and rural services (under Goals 2EE, 2GG, 2JJ, 2KK, 2LL, and 2MM), and the development regulations that implement those policies, are consistent with RCW 36.70A.070(5)(b), which requires the rural element to provide for a variety of rural densities, uses, essential public facilities and rural governmental services. The proposed amendments change Policy 2GG-3 to better ensure a variety of rural densities.

f. Policies 2DD-2.A.2, 2DD-2.A.3, 2DD-5, 2DD-6, 2GG-6, and 2MM-2 support innovative techniques, consistent with RCW 36.70A.070(5)(b). The proposed amendments do not affect these policies.

g. The County has evaluated the Comprehensive Plan and development regulation amendments to ensure that they do not result in an unconstitutional taking of private property, per RCW 36.70A.370.

4) The amendments to the rural element of the Comprehensive Plan and the county development regulation resolve the noncompliance and invalidity findings of the January 4, 2013 GMHB Compliance Order in Futurewise et al v. Whatcom County (#11-2-0010c):

a. Variety of Rural Densities: Comprehensive Plan Policy 2GG-3 restricts
rezonings from R10A to districts allowing higher densities, thus ensuring a variety of rural densities similar to that which already exists.

b. Lot Clustering: Amendments to WCC Title 20 revise rural lot clustering provisions to provide enforceable criteria and to prohibit residential development within reserve areas.

c. Rural Neighborhoods: Amended boundaries of the Fort Bellingham/Marietta, North Bellingham, and Welcome Rural Neighborhoods, along with the amendments to the zoning maps, exclude several larger parcels in order to be more consistent with the small-lot 2011 development pattern.

d. Water Lines: The amendments to WCC 20.82.030 and 20.97.452 clarify that urban-scale water service cannot be extended into rural areas by adding a definition of "transmission line" based on the definition in WAC 246-290-010(267), and by amending wording in the Health Code, WCC 20.11.050(C) which implied that service connections could be made to transmission lines.

5) Additional conclusions regarding LAMIRD boundaries:

a. With regard to Parcel No. 400123 029037 0000, situated in the I-5/Birch Bay Lynden Road/Valley View Road LAMIRD, the Board originally held in its FDO of January 9, 2012 that the subject parcel should not be included in the LAMIRD because there was an insufficient built environment on that parcel.

In response, based on new evidence of a built environment, including a structure and site preparation work existing in July 1990, we declined to remove that parcel from the LAMIRD. We believe the new evidence refuted the conclusion of the Board.

In response, in its FDO dated January 4, 2013, the Board stated that allowing a LAMIRD at this location was probably a mistake in the first place and again required that the parcel be removed. The owner of the parcel appealed both of the Board decisions which are pending.

The owner of the subject parcel has supplied additional information relating to the loss of value of the parcel as a result of the downzone which the Board has mandated. That information, consisting of letters from a Certified General Real Estate Appraiser and a real estate broker with decades of experience in this area of Whatcom County demonstrates that the uses remaining for this property after the downzone from RGC to R5A are not financially viable.

We are concerned that such a downzone would result in a violation of RCW 36.70A.020(6) which provides that we should not take property without compensation. We conclude that the benefit to the community by downzoning this property is not roughly proportional to the damage to the
property owner. This exaction likely violates RCW 82.02.020 et. seq., and provisions of the Washington State and United States Constitutions.

In addition, the exclusion of this 2.5 acre parcel does not comport with RCW 36.70A.070(5)(d)(iv) which requires a logical outer boundary for all LAMIRDs. The Board failed to comply with this section of the Growth Management Act.

For the reasons stated above, and based on the new evidence and on the belief that the Board previously erred, we respectfully decline to remove this parcel from the LAMIRD.

b. With regard to Parcel No. 390225 470286 0000 situated in the Smith & Guide Meridian LAMIRD, in its FDO dated January 9, 2013, the Board determined that this parcel should not be included in the LAMIRD because its inclusion does not create a logical outer boundary. New evidence was submitted to the County regarding this parcel. We find the new evidence refutes the conclusion of the Board.

The owner of the parcel appealed the Board decision, which is pending. The Board's FDO dated January 9, 2013, is the first time that the zoning of this parcel has been questioned. It has been zoned for commercial uses since 1990 when it was zoned General Commercial. Moreover, the new evidence indicates that commercial use has been ongoing on the parcel for decades.

In addition, the one-acre parcel (Parcel No. 390225 510322 0000) situated directly north of the parcel has also contained continuous commercial use for decades. Over the years, this smaller parcel has contained a Culligan Water retailer, a veterinarian office, and a paintball business. Presently, a church is located there.

Finally, the Board believes that the distance between the portion of the Smith & Guide Meridian LAMIRD the Board retained and Parcel No. 390225510322 0000 is too far. We disagree and note that 472 lineal feet of Guide Meridian frontage, which is the east boundary of Parcel No. 390225470286 0000, is minimal considering that the Smith & Guide Meridian LAMIRD contains over one mile of Guide Meridian frontage. The Guide is a five-lane state highway.

Due to the prior uses, existing uses and the decades of commercial zoning, retaining Parcel No. 390225 510322 0000 and Parcel No. 390225 4702860000 in the Smith & Guide Meridian LAMIRD is consistent with the location and outer boundary criteria of Policy 2HH-I.A- C and complies with RCW 36.70A.070(5)(d)(iv).

We are concerned that such a downzone would result in a violation of RCW 36.70A.020(6), which provides that we should not take property
without compensation. We conclude that the benefit to the community by downzoning these properties is not roughly proportional to the damage to the property owner. As such, this exaction likely violates RCW 82.02.020 et. seq., and provisions of the Washington State and United States Constitutions.

For the reasons stated above and based on the new evidence, we respectfully decline to remove Parcel No. 390225 510322 0000 and Parcel No. 390225 470286 0000 from the LAMIRD.

6) The subject comprehensive plan amendment complies with the approval criteria of WCC 2.160.080, which requires that the County must find the following criteria, are satisfied in order to approve the proposed comprehensive plan amendment.

a. The amendment conforms to the requirements of Growth Management Act, is internally consistent with the County-Wide Planning Policies and is consistent with any interlocal planning agreements.

i. Growth Management Act

The amendments are consistent with the Growth Management Act as described in Conclusions 3 and 4, above.

ii. County-Wide Planning Policies

County-wide Planning Policy B.1 states, “The county shall work with citizens to define a variety of types of rural areas based on the characteristics and needs of different areas.” Beginning in November of 2008, Whatcom County has engaged the public in the development of the rural element amendments through public meetings, e-mail, and the County’s web site. The proposed amendment to WCCP Policy 2GG-3 ensures a variety of rural densities by restricting rezoning from R10A to districts that allow higher density.

County-wide Planning Policy B.2 states, “The county shall discourage urban level development outside Urban Growth Areas and outside of areas currently characterized by a development threshold greater than a rural development density.” The proposed amendments retain requirements that higher rural densities be contained in designated LAMIRDs and Rural Neighborhoods, per WCCP Policy 2GG-2, and remove land from the Fort Bellingham/Marietta, North Bellingham, and Welcome Rural Neighborhoods.

County-wide Planning Policies P.1 and P.2 reflect GMA Planning Goal (6) (RCW 36.70A.020(6), which states private property shall not be taken for public uses without just compensation, and Whatcom County Charter Section 1.11, which states no regulation or ordinance shall be drafted and adopted without consideration of and provisions for

**iii) Whatcom County Comprehensive Plan**

Proposed amendments to the Zoning Code regarding lot clustering and water line extension are consistent with WCCP Policies 2GG-6 and 2EE-4, respectively. Changes to Rural Neighborhood boundaries are consistent with the criteria provided under WCCP Goal 2MM.

**iv) Interlocal Agreements**

The interlocal agreements between Whatcom County and the cities require coordination on adopting population projections and reviewing UGAs. The amendments do not adopt new population projections without City-County coordination.

b. *Further studies made or accepted by the department of planning and development services indicate changed conditions that show need for the comprehensive plan amendment.*

The need for this Comprehensive Plan amendment and accompanying Zoning Code and Zoning Map amendments is generated by the Growth Management Hearings Board’s January 4, 2013 Compliance Order.

c. *The public interest will be served by approving the comprehensive plan amendment. In determining whether the public interest will be served, factors including but not limited to the following shall be considered:*

i. *The anticipated effect upon the rate or distribution of population growth, employment growth, development, and conversion of land as envisioned in the Comprehensive Plan.*

The proposed amendments either retain existing zoning intensities and densities or reduce them in rural Whatcom County.

ii. *The anticipated effect on the ability of the County and/or other service providers, such as cities, schools, water and/or sewer purveyors, fire districts, and others as applicable, to provide*
adequate services and public facilities including transportation facilities.

No amendments are proposed that increase densities or intensity of uses or increase the demand for services and facilities beyond levels needed to serve development under existing zoning.

iii. Anticipated impact upon designated agricultural, forest and mineral resource lands.

No amendments are proposed that increase adverse impacts on designated resource lands.

d. The amendment does not include or facilitate spot zoning.

WCC 20.97.186 defines “illegal spot zoning” as “a zoning action by which a smaller area is singled out of a larger area or district and specially zoned for a use classification totally different from, and inconsistent with, the classification of surrounding land and not in accordance with the Comprehensive Plan. Spot zoning is zoning for private gain designed to favor of benefit a particular individual or group and not the welfare of the community as a whole.” Rezonings proposed under these amendments apply to areas, or to lots identified by the Growth Management Hearings Board as not meeting GMA requirements for inclusion in a LAMIRD, and therefore none meet this definition of spot zoning.

e. Urban growth area amendments that propose the expansion of an urban growth area boundary shall be required to acquire development rights from a designated TDR sending area, unless one of the exceptions set forth in WCC 2.160.080(A)(5) applies to the amendment.

No urban growth area amendments are proposed.
NOW, THEREFORE, BE IT ORDAINED by the Whatcom County Council that:

Section 1. The Whatcom County Comprehensive Plan is hereby amended as shown on Exhibit A.

Section 2. The Whatcom County Official Zoning Code is hereby amended as shown on Exhibit B.

Section 3. The Whatcom County Official Zoning Map and Comprehensive Plan Map 8 are hereby amended as shown in Exhibit C.

Section 4. Adjudication of invalidity of any of the sections, clauses, or provisions of this Ordinance shall not affect or impair the validity of the Ordinance as a whole or any part thereof other than the part so declared to be invalid.

ADOPTED this ___ day of _________________ 2013.

LAND USE

......

RURAL LANDS – INTRODUCTION

......

Rural Character and Lifestyle

Rural Whatcom County is the portion of the County not planned for either urban or resource use and its character differs from that of the County's urban and resource areas. While agriculture and forestry are practiced in the rural areas, it is generally on a smaller scale than in the resource areas that are set aside specifically for those purposes. The rural areas provide an important buffer between urban areas and resource lands, and the character of the rural areas is differentiated from the urban areas by less intensive uses and densities, and greater predominance of vegetation, wildlife habitat, and open space.

Small unincorporated communities have existed in the rural areas for many decades but have not become urban centers. Land uses in these communities are more intensive than those in the surrounding rural areas, and provide rural residents places to shop, eat, play, etc., and access public services such as schools, libraries, and post offices without having to travel to cities. The businesses in these communities are important contributors to the economy of Whatcom County. Even outside these settlements, residents of the rural areas have established home occupations, cottage industries, and small-scale businesses that are an important part of the County's traditional rural economy.

Historically, rural Whatcom County has been a place of great variety. Residential densities vary greatly from homes on 10 or 20 acre lots to lots smaller than one acre in the rural communities and neighborhoods that have been established over the years. The scale and intensity of rural businesses varies from the home occupations, cottage industries, and resource-based industries to the more intensive commercial and manufacturing uses, though the County's largest commercial and industrial uses have been established in the urban areas.

Whatcom County's rural lifestyle is one where residents enjoy views of a green landscape dotted by homes and barns, and have an appreciation for clean water and air. Residents can work and shop in small rural communities, or earn a living on their own rural lands, but these enterprises do not detract from the overall sense of openness and predominance of the landscape in the rural area. Rural Whatcom County has long been a place to raise children with the values of hard work and responsible stewardship of the land, and where residents can grow food and livestock for themselves or for market. While rural property owners do not expect to be provided with urban-level...
services, they enjoy a quality of life and sense of self-sufficiency not ordinarily found in the urban areas.

In the rural element of this chapter, Whatcom County establishes policy consistent with the findings of the legislature and with the above vision of rural character and lifestyle that will:

- Help preserve rural-based economies and tradition lifestyles,
- Encourage the economic prosperity of rural residents
- Foster opportunities for small-scale, rural-based employment and self employment,
- Permit the operation of rural-based agriculture, commercial, recreational, and tourist businesses that are consistent with existing and planned land use patterns,
- Be compatible with the use of the land by wildlife and for fish and wildlife habitat,
- Foster the private stewardship of the land and preservation of open space, and
- Enhance the rural sense of community and quality of life.

**GOAL 2DD:** Retain the character and lifestyle of rural Whatcom County.

**Policy 2DD-1:** Concentrate growth in urban areas per the population projections in Chapter 1 of this plan, and recognize rural lands as an important transition area between urban areas and resource areas. By February 1 of each year the department will publish a report that monitors residential development activity outside the urban growth areas during the previous year and compares that data with the adopted population growth projection for those areas. If it is apparent that growth occurring outside the urban growth areas is inconsistent with adopted projections, the County shall take action to address the discrepancy. Actions may include changing the allocation of the projected population growth during the comprehensive plan update required per RCW 36.70A.130(1), or changing development regulations to limit growth outside the urban growth areas. In addition, as the County and cities review the capacity for growth in the urban growth areas, the county should coordinate with the cities to ensure that policies are in place that are consistent with encouraging growth in the urban areas and reducing demand for development in rural areas.

**Policy 2DD-2:** Protect the character of the rural area through the County’s development regulations. In addition to the policies of this plan that provide measures governing rural development, the following County’s key development regulations are incorporated into this plan by reference to assure that the plan contains measures to protect rural character.
A. Measures to contain or otherwise control rural development and reduce the inappropriate conversion of undeveloped land into sprawling, low-density development:

1. Limit the expansion of areas of more intensive development and higher rural densities through Policies 2A-8, 2A-9, 2DD-1, 2DD-8, 2GG-2, 2GG-3, 2JJ-1 through 8, 2KK 1 and 2, 2LL-1 through 4, and 2MM-1 through 4 of this plan.

2. Provide options to reserve areas of land suitable for agriculture, forestry, or open space through lots clustering in the following Zoning Code provisions, adopted herein by reference:
   a. WCC 20.32.305, .310, and .320, Lot clustering, Residential Rural District;
   b. WCC 20.34.305, .310, and .320, Lot clustering, Rural Residential Island District;
   c. WCC 20.36.305, .310, and .320, Lot clustering, Rural District;

3. Prohibit short subdivisions outside of urban growth areas and limited areas of more intensive rural development that would require extension of public sewer except for health or safety reasons through the following Whatcom County Land Division regulations adopted herein by reference:
   a. WCC 21.04.090, Sewage Disposal, Short Subdivisions
   b. WCC 21.05.090 Sewage Disposal, Preliminary Long Subdivisions

B. Measures to assure visual compatibility of rural development with the surrounding rural area:

1. Ensure that the visual landscapes traditionally found in rural areas and communities are preserved through limitations on structural coverage of lots in the following Zoning Code provisions, adopted herein by reference:
   a. WCC 20.32.450 Lot coverage, Residential Rural District;
   b. WCC 20.36.450 Lot coverage, Rural District.

2. Require that lots developed under the lot clustering option be designed and located to be compatible with valuable or
unique natural features as well as physical constraints of
the site through standards provided in the following Zoning
Code provisions, adopted herein by reference:

a. WCC 20.32.310 Lot clustering design standards, Residential Rural District;

b. WCC 20.34.310 Lot clustering design standards, Rural Residential-Island District;

c. WCC 20.36.310 Lot clustering design standards, Rural District;

3. Protect the aesthetic assets of the rural areas and soften
the impact of structures through landscape buffers and
setback requirements provided in the following Zoning
Code provisions, adopted herein by reference:

a. WCC 20.80.200 Setback requirements;

b. WCC 20.80.300 Landscaping.

4. In the Point Roberts Rural Community, regulate visual
aspects of development through the standards in the
following Zoning Code provisions, adopted herein by
reference:

a. WCC 20.72.350 Building setbacks/buffer areas, Point Roberts Special District;

b. WCC 20.72.651 Facility design, Point Roberts Special District;

c. WCC 20.72.653 Tree canopy retention, Point Roberts Special District;

d. WCC 20.72.654 Site design/view corridors, Point Roberts Special District.

C. Measures to protect critical areas and surface and
groundwater resources:

1. Protect the functions and values of critical areas
(geologically hazardous areas, frequently flooded areas,
critical aquifer recharge areas, wetlands, and habitat
conservation areas) and the ecological processes that
sustain them, through WCC 16.16 Critical Areas
provisions, adopted herein by reference.
2. Minimize the adverse effects of discharges from on-site sewage systems on ground and surface waters through WCC 24.05, adopted herein by reference.

3. Preserve and protect unique and important water resources through development standards in WCC 20.71 Water Resource Protection Overlay District, adopted herein by reference:

4. Protect surface and ground water resources through stormwater management standards established in the County’s Development Standards per WCC 20.80.630 and 12.08.035 and referenced in the following Zoning Code provisions, adopted herein by reference:
   a. 20.32.656 Drainage, Residential Rural District;
   b. 20.34.659 Drainage, Rural Residential-Island District;
   c. 20.36.656 Drainage, Rural District;
   d. 20.37.655 Drainage, Point Roberts Transitional District;
   e. 20.44.652 Drainage, Recreation and Open Space District;
   f. 20.59.704 Drainage, Rural General Commercial District;
   g. 20.60.655 Drainage, Neighborhood Commercial District;
   h. 20.61.704 Drainage, Small Town Commercial District;
   i. 20.63.654 Drainage, Tourist Commercial District;
   j. 20.64.655 Drainage, Resort Commercial District;
   k. 20.67.653 Drainage, General Manufacturing District;
   l. 20.69.655 Drainage, Rural Industrial and Manufacturing District.

5. Assure that subdivisions meet requirements for critical areas, shoreline management, and stormwater management through the standards in the following Whatcom County Land Division regulations, adopted herein by reference:
   a. WCC 21.04.034 Application Procedures, Short Subdivisions
   b. WCC 21.05.037 Hearing Examiner Notice Hearing and Decision, Preliminary Long Subdivisions
6. Limit water withdrawals resulting from land division through the standards in the following Whatcom County Land Division regulations, adopted herein by reference:
   a. WCC 21.04.090 Water supply, Short Subdivisions
   b. WCC 21.05.080 Water supply, Preliminary Long Subdivisions

7. Regulate groundwater withdrawals by requiring surveyors of public water systems and private water system applicants to comply with Washington State Department of Ecology ground water requirements per WCC 24.11.050, adopted herein by reference.

8. Limit phosphorus entering Lake Whatcom and Lake Samish due to the application of commercial fertilizers to residential lawns and public properties through WCC 16.32, adopted herein by reference.

9. Protect vital drinking water, sensitive habitats, and recreational resources within the Department of Ecology’s designated Western Washington Phase II Municipal Stormwater Permit area and the Lake Whatcom watershed by prohibiting illicit discharges to the county’s stormwater collection system through WCC 16.36 Illicit Discharge Detection and Elimination Program, adopted herein by reference.

D. Measures to protect against conflicts with the use of agricultural, forest, and mineral resource lands:

1. Ensure separation of new residences from agricultural and forestry uses through setback requirements in the following Zoning Code provisions, adopted herein by reference:
   a. WCC 20.80.255 Agricultural District, Supplementary Requirements;
   b. WCC 20.80.256 Forestry districts, Supplementary Requirements;
   c. WCC 20.80.258 All districts, Supplementary Requirements.

2. Ensure separation of businesses from agricultural uses through setback requirements in the following Zoning Code provisions, adopted herein by reference:
   a. WCC 20.59.600 Buffer area, Rural General Commercial District;
b. WCC 20.60.550 Buffer area, Neighborhood Commercial District;

c. WCC 20.61.600 Buffer area, Small Town Commercial District;

d. WCC 20.63.600 Buffer area, Tourist Commercial District;

e. WCC 20.64.550 Buffer area, Resort Commercial District;

f. WCC 20.67.550 Buffer area, General Manufacturing District;

g. WCC 20.69.550 Buffer area, Rural Industrial and Manufacturing District.

3. Require that all discretionary project permits within one half mile of areas designated in this plan as Rural, Agriculture, Commercial Forestry, or Rural Forestry, or within 300 feet of areas designated as Mineral Resource Lands, be subject to disclosure practices in the in the following Whatcom County Code provisions, adopted herein by reference:

a. WCC 20.40.662 Use of Natural Resources, Agriculture District;

b. WCC 20.42.652 Use of Natural Resources, Rural Forestry District;

c. WCC 20.43.662 Use of Natural Resources, Commercial Forestry District;

d. WCC 20.14.02 Right to Farm;

e. WCC 20.14.04 Right to Practice Forestry;

RURAL LANDS – LAND USE

Rural Designation

Lands outside the County’s urban and resource areas include a variety of uses and densities. Traditionally, Whatcom County’s rural areas have been characterized by a spectrum of uses ranging from farms and large-lot residential areas to recreational communities and small towns. The more intensive uses in that spectrum
Exhibit A: Comprehensive Plan Amendments
April 25, 2013 Planning Commission Recommendation

(commercial/industrial areas and residential areas with densities greater than one unit per five acres) are contained within the boundaries of Rural Community, Rural Tourism, or Rural Business designations (LAMIRDs) and Rural Residential Overlays Neighborhood designations.

The remainder of the rural areas are designated Rural and contain traditional rural residential and farm uses as well as small home-based and conditionally-permitted businesses. The rural character of the lands designated as Rural should not be compromised by the encroachment of more intensive development. Commercial and industrial uses in the rural areas not contained within a Rural Community designation must meet GMA criteria for small-scale tourism or isolated business uses (RCW 36.70A.070(5)(d)(ii) and (iii).

Portions of the rural area that historically contain larger lots have been zoned for densities of one dwelling per ten acres. These areas provide for a variety of densities important to the rural character and must be retained. Rezones from R10A to allow higher densities are limited to those R10A areas that are adjacent to established higher densities.

Goal 2GG: Designate Rural areas to contain a variety of uses and densities while retaining their traditional rural character.

Policy 2GG-1: Provide a variety of residential choices at rural densities which are compatible with the character of each of the rural areas.

Policy 2GG-2: The Rural designation includes areas of traditional rural uses and gross residential densities at or below one unit per five acres. To reduce the inappropriate conversion of undeveloped land into sprawling, low density development in the rural area, more intensive development shall be contained within Rural Community, Rural Tourism, or Rural Business designations, which are limited areas of more intensive rural development (LAMIRDs), and predominantly residential areas with established densities greater than one unit per five acres shall be contained in Rural Neighborhood designations.

Policy 2GG-3: Uses and densities within the Rural designation should reflect established rural character. Rezones within the Rural designation should be consistent with the established rural character and densities in the general area of the proposed rezone. Land in the R10A district may be rezoned to a rural zone that allows a higher density only if:

A. Rezoning area abuts zoning of higher density or intensity (parcels are abutting even if there is a public or private road between them), or

B. All the following items are satisfied:
1. Residential density (the average size of parcels that contained a residence as of January 1, 2013) within 500 feet of the area to be rezoned is less than 7.5 acres.

2. The proposed rezoning area is not in a designated urban growth area reserve.

Policy 2GG-4: Minimize potential conflicts of rural residential development near designated natural resource lands to prevent adverse impacts on resource land uses.

Policy 2GG-5: Provide landowners with incentives and options to develop their property at densities that may be less than the underlying zone, when necessary to protect critical areas and high-value resource lands.

Policy 2GG-6: Ensure that flexible development patterns such as cluster subdivisions effectively preserve open space and agricultural land and do not create the need for more intensive rural services.

Policy 2GG-7: Development within Rural designations shall be consistent with rural character as described in this chapter.
DRAFT WCC Sections Affected by January 4, 2013 Compliance Order

WCC TITLE 20 ZONING.

20.32 Residential Rural (RR) District

20.32.253 Maximum density and minimum lot size.

The following districts with their associated lot sizes as indicated below, are only allowed within Rural Neighborhoods and Rural Communities, as outlined described in the Comprehensive Plan: RR-2A, RR-1, RR-2, RR-3. The RR-5A and RR-10A districts are allowed throughout in the rural areas; the Comprehensive Plan contains policies regarding application of these districts within the Residential Rural Designation. For boundary line adjustments on lots not conforming to minimum lot sizes in this zoning district, lot size averaging may be used by calculating the average lot size of legal lots of record within 500 feet of the outside perimeter of the lots proposed for boundary line adjustment.

20.32.300 Lot clustering, reserve area and reserve tract.

20.32.305 Lot clustering.

(1) The purpose of lot clustering is to provide an alternative method of creating economical building lots with spatially efficient sizes. Clustering is intended to reduce development cost, increase energy efficiency and reserve areas of land which are suitable for agriculture, forestry, or open space or possible future development.

(2) The clustering option is also intended to help preserve open space and the character of areas and reduce total impervious surface area thereby reducing runoff while assuring continued viable undeveloped natural vegetated corridors for wildlife habitat, protection of watersheds, preservation of wetlands, preservation of aesthetic values including view corridors, and preservation of potential trail and recreation areas.

20.32.310 Design standards.

The creation of new building lots, pursuant to this section, shall be governed by the following recommended design standards:

(1) Clustered building lots may be only created through the subdivision or short subdivision process.
(2) Building lots shall be designed and located to the fullest extent possible to be compatible with valuable or unique natural features, as well as physical constraints of the site.

(3) Where practical, the majority of building sites shall be arranged in a cluster or concentrated pattern to be compatible with physical site features, allow for the efficient conversion of the “reserve tract” to other uses in the future, and have no more than two common encroachments on existing county roads. The arrangement of clustered building lots is intended to discourage development forms commonly known as linear, straight-line or highway strip patterns.

(4) Common access to clustered building lots shall be provided by short length roads or loop roads. In addition, urban growth areas and urban growth area reserves, interior streets shall be designed to allow access to the “reserve tract” for the purpose of future approved development in urban growth areas and urban growth area reserves.

20.32.315 Reserve area.

(1) A note on the subdivision plat shall establish a reserve area per the definition in WCC 20.97.344 that is protected in perpetuity so long as it is not within an urban growth area. The minimum percentage of the parent parcel required to be within a reserve area is shown in WCC 20.32.253.

(2) A reserve area may contain infrastructure necessary for the subdivision, including but not limited to underground utilities, stormwater ponds, and on-site septic system components, and, in reserve areas designated for agriculture, structures used for agricultural purposes. Above-ground hard surface infrastructure such as roads and water tanks may be included in a reserve tract, but the area they occupy shall not be included in the reserve area percentage required in WCC 20.32.253.

20.32.320 Reserve tract.

For the purposes of this section, “reserve tract” is defined as that portion of a proposed subdivision or short subdivision which is intended for agricultural, forestry, or open space or future development purposes. All “reserve tracts” created through the subdivision process shall be subject to the following provisions:

(1) After a site is initially subdivided pursuant to this chapter, the “reserve tract” may be retained by the subdivider, conveyed to residents of the subdivision or conveyed to a third party.

(2) The “reserve tract” may be considered as a building lot; provided, that such lot is included in the overall density calculation of the original parcel of record, and that development within a “reserve area” easement is consistent with the uses permitted in reserve areas in this chapter.
(3) The “reserve tract” may be further subdivided only through the long subdivision process and only under the following circumstances:

(a) The county finds that in developing adjacent tracts it would help to further the objectives listed in WCC 20.32.305(2) by dividing the reserve tract and increasing the area of reserve proportionately on the adjacent land being subdivided so that there is no net reduction in reserve area; and when the reserve tract is owned by the original developer or a third party, no property owner within the original subdivision will be significantly adversely affected or suffer a substantial decrease of property value as a result of dividing the reserve tract.

(b) When the Comprehensive Plan and zoning have been updated as part of the normal process (other than a revision initiated by the private sector or done for a specific area) and the public process has been gone through, subject to findings that there is no adverse impact to critical areas and development is in compliance with rural land use Comprehensive Plan policies, and when the reserve tract is owned by the original developer or a third party, no property owner within the original subdivision will be significantly adversely affected or suffer a substantial decrease of property value as a result of dividing the reserve tract.

(4) The purpose of the reserve tract as stated in subsections (1), (2) and (3) of this section shall be communicated in writing on the face of the plat or short plat. The number of developable building sites remaining (if any) with the original parcel of record, based on the assigned density, shall also be prominently displayed on the plat or short plat. Whatcom County shall make every effort to assist all agents in communicating clearly such information to all purchasers and prospective purchasers of building lots or “reserve tracts.” Any remaining density beyond the number of lots created on the plat may be assigned to either the lots or the reserve tract, but future subdivision shall not reduce the size of the reserve area below the minimum percentage of the original parent parcel required in WCC 20.32.253.

(5) The above requirements in subsections (2) to (4) of this section shall be recorded as a deed restriction at the time of filing of the final plat or short plat, and shall constitute an agreement between Whatcom County and the owner of record. Said deed restriction may be amended by mutual agreement between said parties after review for consistency and compliance with the Official Whatcom County Zoning Ordinance, the Whatcom County Subdivision Ordinance and the Whatcom County Comprehensive Plan.

20.34 Rural Residential-Island (RR-I) District
20.34.300 Lot clustering, reserve area, reserve tract and density transfer.

20.34.305 Lot clustering.

(1) The purpose of lot clustering is to preserve the rural character of Lummi Island and to provide an alternative method of creating economical building lots with spatially efficient sizes. Clustering is intended to reduce development cost, increase energy efficiency and reserve areas of land which are suitable for agriculture, forestry, or open space in accordance with the adopted zoning density requirements, as applied to the entire subdivision or short subdivision.

(2) The clustering option is also intended to help preserve open space and reduce total impervious surface area thereby reducing runoff while assuring continued viable undeveloped natural vegetated corridors for wildlife habitat, protection of watersheds, preservation of wetlands, preservation of aesthetic values including view corridors, and preservation of potential trail and recreation areas.

20.34.310 Design standards.

The creation of new building lots, pursuant to this section, shall be governed by the following recommended design standards:

(1) Clustered building lots may be only created through the subdivision or short subdivision process.

(2) Building lots should—shall be designed and located to the fullest extent possible to be compatible with valuable or unique natural features, as well as physical constraints of the site.

(3) Where practical, the majority of building sites should—shall be arranged in a cluster or concentrated pattern to be compatible with physical site features, and have no more than two common encroachments on existing county roads. The arrangement of clustered building lots is intended to discourage development forms commonly known as linear, straight-line or highway strip patterns.

(4) Common access to clustered building lots should—shall be provided by short length roads or loop roads. In addition, interior streets shall be designed to allow access to the “conservation reserve tract.”
20.34.315 Reserve area.

(1) A note on the subdivision plat shall establish a reserve area per the definition in WCC 20.97.344 that is protected in perpetuity so long as it is not within an urban growth area. The minimum percentage of the parent parcel required to be within a reserve area is shown in WCC 20.32.253.

(2) A reserve area may contain infrastructure necessary for the subdivision, including but not limited to underground utilities, stormwater ponds, and on-site septic system components, and, in reserve areas designated for agriculture, structures used for agricultural purposes. Above-ground hard surface infrastructure such as roads and water tanks may be included in a reserve tract, but the area they occupy shall not be included in the reserve area percentage required in WCC 20.34.252.

20.34.320 Conservation-Reserve tract.

For the purposes of this section, "conservation-reserve tract" is defined as that portion of a proposed subdivision or short subdivision which is intended for agricultural, forestry, or open space purposes which does not exceed adopted zoning density requirements, as applied to the entire subdivision or short subdivision. All "conservation-reserve tracts" created through the subdivision process shall be subject to the following provisions:

(1) After a site is initially subdivided pursuant to this section, the "conservation-reserve tract" may be retained by the subdivider, conveyed to residents of the subdivision or conveyed to a third party.

(2) The "conservation tract" may be considered as a building lot; provided, that such lot is included in the overall density calculation of the original parcel of record and that development within a "reserve area" easement is consistent with the uses permitted in reserve areas in this chapter.

(3) The conservation-reserve tract is created and is unbuildable beyond any building density remaining at the time of land division. This is intended to ensure that the conservation-reserve tract open space will remain in the same location adjacent to the clustered lot it serves.

(4) The purpose of the conservation-reserve tract as stated in subsections (1), (2), and (3) of this section shall be communicated in writing on the face of the plat or short plat; also, the number of developable building sites remaining (if any) with the original parcel of record, based on the assigned density, shall also be prominently displayed on the plat or short plat. Whatcom County shall make every effort to assist all agents in communicating clearly such information to all purchasers and prospective purchasers of building lots or "conservation-reserve tracts." Any remaining density beyond the number of lots created on the plat may be assigned to either the lots or the reserve tract, but future subdivision shall not
reduce the size of the reserve area below the minimum percentage of the original parent parcel required in WCC 20.34.252.

(5) That the above stated requirements in subsections (2), (3), and (4) of this section shall be recorded as a deed restriction at the time of filing of the final plat or short plat, and shall constitute an agreement between Whatcom County and the owner of record. Said deed restriction may be amended by mutual agreement between said parties after review for consistency and compliance with the official Whatcom County Zoning Ordinance, the Whatcom County Subdivision Ordinance and the Whatcom County Comprehensive Plan.

......

20.36 Rural (R) District

......

20.36.253 Maximum density and minimum lot size.

The R-2A district is allowed only within areas designated as Rural Neighborhoods, as described in the Comprehensive Plan. R-5A and R-10A districts are allowed in the Rural areas; the Comprehensive Plan contains policies regarding application of these districts within the Rural designation. The R-10A district is allowed in Urban Growth Area Reserve designations.

For boundary line adjustments on lots not conforming to minimum lot sizes in this zoning district, lot size averaging may be used by calculating the average lot size of legal lots of record within 500 feet of the outside perimeter of the lots proposed for boundary line adjustment.

20.36.300 Lot clustering, reserve area and reserve tract.

20.36.305 Lot clustering.

(1) The purpose of lot clustering is to provide an alternative method of creating economical building lots with spatially efficient sizes. Clustering is intended to reduce development cost, increase energy efficiency and reserve areas of land which are suitable for agriculture, forestry, or open space, or possible future development.

(2) The clustering option is also intended to help preserve open space and the character of areas and reduce total impervious surface area thereby reducing runoff while assuring continued viable undeveloped natural vegetated corridors for wildlife habitat, protection of watersheds, preservation of wetlands, preservation of aesthetic values including view corridors, and preservation of potential trail and recreation areas.

(3) Lot clustering is required for residential developments on parcels 10 acres or greater when:

(a) The property is located within a short-term planning area and public water and sewer are not available; or

(b) The property is located within an urban growth area reserve—long-term planning area.

20.36.310 Design standards.

The creation of new building lots, pursuant to this section, shall be governed by the following recommended design standards:

(1) Clustered building lots may be only created through the subdivision or short subdivision process.

(2) Building lots shall be designed and located to the fullest extent possible to be compatible with valuable or unique natural features, as well as physical constraints of the site.

(3) The majority of building sites shall be arranged in a cluster or concentrated pattern to be compatible with physical site features, allow for the efficient conversion of the "reserve tract" to other uses in the future, and have no more than two common encroachments on existing county roads. The arrangement of clustered building lots is intended to discourage development forms commonly known as linear, straight-line or highway strip patterns.

(4) Common access to clustered building lots shall be provided by short length roads or loop roads. In addition, interior streets shall be designed to allow
access to the “reserve tract” for the purpose of future approved development in urban growth areas and urban growth area reserves.

(5) Where the boundaries of a proposed cluster subdivision includes land in more than one rural zone designation (R2-A, R-5A and R-10A) the following shall apply:
   (a) The total number of units permitted shall be computed by separately calculating the number of lots allowed in each zone district based on the amount of land area within the district. The number of lots allowed in each district shall be totaled to arrive at the total number of lots.
   (b) Lot clusters may be distributed or arranged on property(s) covered by the subdivision such that density from an R-5A or R-10A portion of a subdivision may be transferred to an adjacent portion of the subdivision with a different rural zoning designation (R-2A, R-5A or R-10A); provided, the total number of lots for the entire subdivision does not exceed the number calculated in subsection (5)(a) of this section; and provided further, that the lot design is consistent with subsections (1) through (4) of this section. Density from R-2A portions of the subdivision may not be transferred to R-5A or R-10A portions of the subdivision.

(6) In order to preserve rural character, no more than 16 residential lots shall be permitted in one cluster and there shall be at least 500 feet of separation between any new clusters, except when the cluster subdivision is located on a parcel or contiguous parcels in the same ownership, greater than 20 acres.

20.36.315 Reserve area.

(1) A note on the subdivision plat shall establish a reserve area per the definition in WCC 20.97.344 that is protected in perpetuity so long as it is not within an urban growth area. The minimum percentage of the parent parcel required to be within a reserve area is shown in WCC 20.36.253.

(2) A reserve area may contain infrastructure necessary for the subdivision, including but not limited to underground utilities, stormwater ponds, and on-site septic system components, and, in reserve areas designated for agriculture, structures used for agricultural purposes. Above-ground hard surface infrastructure such as roads and water tanks may be included in a reserve tract, but the area they occupy shall not be included in the reserve area percentage required in WCC 20.36.253.

20.36.320 Reserve tract.

For the purposes of this section, “reserve tract” is defined as that portion of a proposed subdivision or short subdivision which is intended for agricultural, forestry, or open space or future development purposes. All “reserve tracts” created through the subdivision process shall be subject to the following provisions:
(1) After a site is initially subdivided pursuant to this section, the "reserve tract" may be retained by the subdivider, conveyed to residents of the subdivision or conveyed to a third party.

(2) The "reserve tract" may be considered as a building lot; provided, that such lot is included in the overall density calculation of the original parcel of record and that development within a "reserve area" easement is consistent with the uses permitted in reserve areas in this chapter.

(3) The "reserve tract" may be further subdivided only through the long subdivision process and only under one of the following circumstances:

(a) The county finds that in developing adjacent tracts it would help to further the objectives listed in WCC 20.36.305(2) by dividing the reserve tract and increasing the area of reserve proportionately on the adjacent land being subdivided so that there is no net reduction in reserve area; and when the reserve tract is owned by the original developer or a third party, no property owner within the original subdivision will be significantly adversely affected or suffer a substantial decrease of property value as a result of dividing the reserve tract; or

(b) When the Comprehensive Plan and zoning have been updated as part of the normal process (other than a revision initiated by the private sector or done for a specific area) and the public process has been gone through, subject to findings that there is no adverse impact to critical areas and development is in compliance with rural land use Comprehensive Plan policies, and when the reserve tract is owned by the original developer or a third party, no property owner within the original subdivision will be significantly adversely affected or suffer a substantial decrease of property value as a result of dividing the reserve tract; or

(c) The site is within a short-term planning area and public water and sewer serve the proposed development on the reserve tract.

(4) The purpose of the reserve tract as stated in subsections (1), (2) and (3) of this section shall be communicated in writing on the face of the plat or short plat; also, the number of developable building sites remaining (if any) with the original parcel of record, based on the assigned density, shall also be prominently displayed on the plat or short plat. Whatcom County shall make every effort to assist all agents in communicating clearly such information to all purchasers and prospective purchasers of building lots or "reserve tracts." Any remaining density beyond the number of lots created on the plat may be assigned to either the lots or the reserve tract, but future subdivision shall not reduce the size of the reserve area below the minimum percentage of the original parent parcel required in WCC 20.36.253.

(5) The requirements of subsections (2) to (4) of this section shall be recorded as a deed restriction at the time of filing of the final plat or short plat, and shall constitute an agreement between Whatcom County and the owner of record. Said deed restriction may be amended by mutual agreement between said parties after
review for consistency and compliance with the Official Whatcom County Zoning Ordinance, the Whatcom County Subdivision Ordinance and the Whatcom County Comprehensive Plan.

20.82 Public Utilities

20.82.030 Conditional uses.
The following uses shall require a conditional use permit or major project permit and shall be subject to a threshold determination in accordance with the Whatcom County SEPA Ordinance:

(3) New water lines with a nominal pipe size greater than eight inches except for the following, which are permitted outright:

(a) New water lines located and installed by a public utility or municipality within urban growth areas, or limited areas of more intensive rural development (LAMIRDs), or Rural Neighborhoods, or:

(b) New water lines outside urban growth areas or limited areas of more intensive rural development (LAMIRDs) in conformance with a state approved water comprehensive plan pursuant to RCW 43.20.260 and consistent with the Whatcom County Comprehensive Plan, which shall be permitted outright so long as they are water transmission lines per WCC 20.97.452, or provide service at an intensity historically and typically found in rural areas, per RCW 36.70A.030(17), including but not limited to agricultural uses. Water service for uses or densities not permitted in rural or resource areas shall not be extended or expanded outside urban growth areas or limited areas of more intensive rural development (LAMIRDs), except where necessary to protect basic public health and safety and the environment and when such services are financially supportable at rural densities and do not permit urban development, per RCW 36.70A.110(4).

20.97 Definitions
20.97.344 Reserve area.

When the lot clustering method of land division or subdivision is used, the "reserve area" is an easement on a proposed division, subdivision or short subdivision which is reserved for agricultural, forestry, or open space purposes in perpetuity, or for other future-approved development purposes as specified in Whatcom County Code.

20.97.345 Reserve tract.

When the lot clustering method of land division or subdivision is used, the "reserve tract" is that portion of a proposed cluster division, subdivision or short subdivision which is not one of the cluster lots. A reserve area easement may cover all or part of a reserve tract. A portion of a reserve tract may be developed but above-ground development shall not occur within a reserve area easement.

20.97.452 Water Transmission Lines

"Water transmission lines" means pipes used to convey water from source, storage, or treatment facilities to points of distribution or distribution mains, and from source facilities to treatment or storage facilities. This also can include transmission mains connecting one section of distribution system to another section of distribution system as long as this transmission main is clearly defined on the plans and no service connections are allowed along the transmission main.

WCC TITLE 24 HEALTH CODE

24.11 Drinking Water.

24.11.050 General requirements.

A. Applicants must submit all required forms, letters and documents to the director.

B. The director will consider applications for water availability proposing to use groundwater, spring water, surface water, sea water or rainwater.

C. The director shall evaluate the availability of a public water system prior to approving the use of a private water system. If it is determined that a public water
system is available and willing to provide water, the applicant must connect to that public water system when:

1. The applicant proposes to use surface water, spring water, rainwater, or contaminated groundwater; or

2. The applicant proposes to build on a lot located in a short subdivision or long subdivision that Whatcom County approved based on the availability of public water; or

3. The existing public water system has transmission water lines adjacent to the property line of the applicant and connection is consistent with RCW.36.70A.110(4); or

4. The existing public water system has defined a "service area boundary" in accordance with the Whatcom County Coordinated Water System Plan which includes the property of the applicant.

Proposed Rezoning (PC Recommendation)

- Existing Zoning Boundary
- Proposed Zoning Boundary
- Proposed Rezone Area

* Rural Residential Density Overlay

Proposed Zoning - RR5A (not in parentheses)
Existing Zoning - (RR2)
WHATCOM COUNTY
PLANNING COMMISSION

Rural Element Amendments to Comprehensive Plan, Whatcom County Code, and Official Zoning Map

FINDINGS OF FACT AND REASONS FOR ACTION

2) An addendum to the May 1, 2009 determination of non-significance (DNS) was issued under the State Environmental Policy Act (SEPA) on April 12, 2013.

3) The proposed amendments were posted on the County website on March 11, 2013.

4) Notice that the proposal had been posted on the County website was sent to citizens, citizens groups, cities, service providers, media and other groups on the County’s e-mail list on March 11, 2013.

5) Notice of the subject amendment was submitted to the Washington State Department of Commerce on March 11, 2013.

6) Notice of the Planning Commission hearings for the subject amendment was published in the Bellingham Herald on March 16, 2013.

7) Notice of the Planning Commission hearing for the subject amendment was posted on the County’s website on March 8, 2013.

GMA Requirements

9) The Washington Growth Management Act (GMA) requires county comprehensive plans to include a rural element that protects the county’s established rural character by containing or otherwise controlling rural development.

10) GMA (RCW 36.70A.070(5)(a)) allows counties to consider local circumstances in its rural element but requires counties to develop a written record explaining how the rural element harmonizes the planning goals in RCW 36.70A.020 and
meets the requirements of RCW 36.70A. (See Conclusions 2 and 3 below).

11) GMA allows, but does not require, counties to designate "limited areas of more intensive rural development" (LAMIRDs) (RCW 36.70A.070(5)(d)) and describes three types of development patterns that may be considered LAMIRDs:

a) Type I: "Rural development consisting of the infill, development, or redevelopment of existing commercial, industrial, residential, or mixed-use areas, whether characterized as shoreline development villages, hamlets, rural activity centers, or crossroads developments...Any development or redevelopment in terms of building size, scale, use, or intensity shall be consistent with the character of the existing areas." (RCW 36.70A.070(5)(d)(i)) In RCW 36.70A.070(5)(d)(iv), GMA states, "Existing areas are those that are clearly identifiable and contained and where there is a logical boundary delineated predominately by the built environment, but that may also include undeveloped lands as provided in this subsection." GMA requires counties to establish logical outer boundaries for areas of more intensive rural development and describes considerations that must be addressed in establishing those boundaries Per RCW 36.70A.070(5)(d)(v), existing areas are those that existed on July 1, 1990.

b) Type II: "The intensification of development on lots containing, or new development of, small-scale recreational or tourist uses, including commercial facilities to serve those recreational or tourist uses, that rely on a rural location and setting but that do not include new residential development..." (RCW 36.70A.070(5)(d)(ii)

c) Type III: "The intensification of development on lots containing isolated nonresidential uses or new development of isolated cottage industries and isolated small-scale businesses that are not principally designed to serve the existing and projected rural population and nonresidential uses, but do provide job opportunities for rural residents..." (RCW 36.70A.070(5)(d)(iii)

12) GMA requires that the rural element of a county comprehensive plan provide for a variety of rural densities, uses, essential public facilities, and rural governmental services needed to serve the permitted densities and uses, and allows counties to use innovative zoning techniques that will accommodate appropriate rural densities and uses that are consistent with rural character.

13) GMA requires that the rural element of a county comprehensive plan provide measures governing rural development that protect the rural character by:

a) Containing or otherwise controlling rural development;

b) Assuring visual compatibility of rural development with the surrounding rural area;

c) Reducing the inappropriate conversion of undeveloped land into sprawling, low-density development in the rural area;

d) Protecting critical areas, as provided in RCW 36.70A.060, and surface and ground water resources; and
e) Protecting against conflicts with the use of agricultural, forest, and mineral resource lands designated under RCW 36.70A.170.

14) GMA requires local governments that are required or choose to plan under GMA to utilize a process established by the Washington State Attorney General to assure that proposed regulatory or administrative actions do not result in an unconstitutional taking of private property. (RCW 36.70A.370) The Whatcom County Prosecutor’s office informed the Planning Commission and County Council of this requirement and, in accordance with Attorney General’s Advisory Memorandum, advised them regarding the proposed amendments with respect to avoiding unconstitutional taking of private property.

15) The legislature finds that to retain and enhance the job base in rural areas, rural counties must have flexibility to create opportunities for business development. Further, the legislature finds that rural counties must have the flexibility to retain existing businesses and allow them to expand. (RCW 36.70A.011)

Growth Management Hearings Board Decisions: *Futurewise vs. Whatcom County*

16) In *Futurewise v. Whatcom County and Gold Star Resorts, Inc.* (#05-2-0013 Sept. 20, 2005 Final Decision and Order), the Western Washington Growth Management Hearings Board (WWGMHB) found Whatcom County out of compliance on three issues: The policies pertaining to Small Town, Crossroads Commercial, Resort and Recreational Subdivision, Suburban Enclave, and Transportation Corridor land use designations allow the creation of more intensive areas of rural development that do not comply with RCW 36.70A.070(5)(d); The Rural Residential zones (RR-1, RR-2, RR-3), Eliza Island (EI) zone, Rural two-acre (R-2A), and Rural Residential Island (RRI) zones allow residential densities that are not rural in the rural areas and are not in limited areas of more intensive rural development per RCW 36.70A.070(5)(d); and Urban Residential three-per-acre (UR-3) zoning in urban growth areas (except the UR-3 in Lake Whatcom watershed and the airport hazard area) failed to achieve appropriate urban densities.

17) In June, 2007 Whatcom County rezoned approximately 1,700 acres in the Ferndale and Everson UGAs to UR-4 in 2007 (Ord. 2007-030 and 2007-045) to address the urban density noncompliance issue in the September 20, 2005 *Futurewise v. Whatcom County and Gold Star Resorts, Inc.* decision.

18) The WWGMHB issued a finding of compliance on the urban density issue on August 30, 2007.

19) The September 20, 2005 *Futurewise v. Whatcom County and Gold Star Resorts, Inc.* decision relating to the land use designations and rural density issues was reversed in Whatcom County Superior Court in 2006. The Superior Court decision was, in turn, reversed by the Division I Court of Appeals in 2007, which reinstated the 2005 WWGMHB decision and ordered Whatcom County to comply with that decision (140 Wn. App. 378). In December, 2009 the
Supreme Court of the State of Washington reversed the Court of Appeals' holding that the hearings board did not improperly apply a bright line in addressing the challenge to Whatcom County's rural densities, but affirmed the Court of Appeals' decision that Whatcom County's comprehensive plan did not comply with the Growth Management Act's LAMIRD provisions. The Supreme Court remanded the rural density challenge to the Hearings Board for reconsideration without applying a bright line rule, and ordered Whatcom County to "revise its comprehensive plan to conform to the LAMIRD provision of the Growth Management Act and then apply the statutory criteria to establish appropriate areas of more intensive rural development." (167 Wn.2d 723, 735, 222 P.3d 791)

20) In August, 2009 Whatcom County amended Whatcom County Code (WCC) Chapter 20.34 Rural Residential – Island District (one of the zones found to be out of GMA compliance in the 2005 Futurewise vs. Whatcom County decision) to change the required minimum lot size from three acres to five acres (Ord. 2009-062).

22) In 2011 the Washington Supreme Court issued a ruling in Kittitas County (172 Wash.2d 144) regarding the GMA requirement that county comprehensive plans must contain measures that protect the rural character.

23) On September 9, 2011, the GMHB Order Following Remand from the Supreme Court regarding the remaining rural density from case #05-2-0013 (remanded by the 2009 Supreme Court decision) found Ordinance 2011-013's retention of rural zoning with density of one dwelling per two acres was compliant with the GMA because it was limited to areas in which similar densities had already been established.

25) The January 9, 2012 GMHB Final Decision and Order (FDO) in Futurewise et al v. Whatcom County (#11-2-0010c) found the amendments adopted under Ordinance 2011-013 out of compliance with respect to several issues involving Comprehensive Plan policies, LAMIRD boundaries and development regulations, and found invalidity on some of those issues.

26) The January 4, 2013 GMHB Compliance Order in Futurewise et al v. Whatcom County (#11-2-0010c) found some amendments adopted under Ordinance 2012-032 out of compliance with respect to several issues involving Comprehensive Plan policies, LAMIRD boundaries and development regulations, and found invalidity on some of those issues.

27) The January 4, 2013 GMHB Compliance Order in Futurewise et al v. Whatcom
County (#11-2-0010c) found the population monitoring requirements of Policy 2DD-1 adopted by Ordinance 2012-032 does not create an internal inconsistency which violates GMA and is a “measure to contain and control rural development” that complies with GMA.

Other Relevant Growth Management Hearings Board Decisions

28) Regarding the term “built environment,” the built environment includes those facilities which are manmade, whether they are above or below ground, and the built environment must predominate within a LAMIRD, though it may include limited undeveloped lands. (Anacortes vs. Skagit County, Case No. 00-2-0049c, Final Decision and Order, February 6, 2001)

29) The WWGMHB found that RCW 36.70A.115 does not impose an obligation on counties to conduct a needs and capacity analysis for areas outside the UGAs and that provision does not require a rural lands analysis but instead merely requires the County to ensure sufficient capacity of land for development to accommodate the growth allocated in the County’s countywide planning policies. (Friends of Skagit County vs. Skagit County, Case No. 07-2-0025c, Final Decision and Order, pp-43-43, May 12, 2008)

30) The WWGMHB found the uses a county allows within LAMIRDS designated per RCW 36.70A.070(5)(d)(i) must be consistent with (though not necessarily the same as) the uses as of July 1, 1990, and allowance of a broader range of uses as conditional uses is not compliant with GMA. (Dry Creek Coalition and Futurewise vs. Clallam County, Case No. 07-2-0018c, Final Decision and Order, April 23, 2008)

31) The WWGMHB found Clallam County’s Rural Neighborhood Conservation (NC) Overlay (Clallam County Code 33-10-015), which permits rural densities outside LAMIRDs greater than one dwelling per five acres based on a calculation of the density of developed lots within 500 feet of a property, to be compliant with the Growth Management Act. The Board stated, “Because infill allowed by the NC overlay is limited to neighborhoods that have already been substantially developed, this will not lead to the ‘inappropriate conversion of undeveloped lands into sprawling, low-density development...’”, a reference to Goal 2 of the GMA. (Dry Creek Coalition and Futurewise v. Clallam County, WWGMHB No. 07-2-0018c, Compliance Order, November 3, 2009, p.10)

32) The Washington State Supreme Court has held that a growth management hearings board cannot base its evaluation of a county’s permitted rural densities on a “bright line” rural density of one dwelling per five acres. (Thurston County vs. Western Washington Growth Management Hearings Board, 164 Wn.2d 329, 190 P.3d 38, 2008; and Gold Star Resorts vs. Futurewise and Whatcom County, 167 Wn.2d 723, 735, 222 P.3d 791, December 17, 2009)

33) The WWGMHB found Whatcom County used appropriate Type I LAMIRD criteria to revise its comprehensive plan designation boundary in the Lake Samish area. (Leenstra vs. Whatcom County, WWGMHB Case No. 03-2-0011, Final Decision and Order, September 26, 2003)

34) The WWGMHB found Jefferson County was not clearly erroneous when it
designated a LAMIRD adjacent to an urban growth area where the City of Port Townsend had decided it was inappropriate to expand its urban growth area. (People for a Liveable Community, Jim Lindsay, et al. vs. Jefferson County, WWGMHB Case No. 03-2-0009c, Final Decision and Order, August 22, 2003)

35) The WWGMHB found that the use of the term "or" rather than "and" in RCW 36.70A.070(d)(i)(C) "appears to indicate a Legislative determination that the factors of building size, scale, use, or intensity are ones that may be considered in determining the character of the existing area, but that development is not required to meet every one of those parameters. If the Legislature had intended to use the word 'and' in the statute, they would have done so." (Dry Creek Coalition vs. Clallam County, WWGMHB Case No. 08-2-0033, Final Decision and Order, June 12, 2009, p.8)

**Whatcom County Policy and Requirements**

36) WCC 2.160.080 requires that, in order to approve the proposed comprehensive plan amendments the Planning Commission and County Council must find all of the following:

a) The amendment conforms to the requirements of the Growth Management Act, is internally consistent with the county-wide planning policies and is consistent with any interlocal planning agreements.

b) Further studies made or accepted by the Department of Planning and Development Services indicate changed conditions that show need for the amendment.

c) The public interest will be served by approving the amendment. In determining whether the public interest will be served, factors including but not limited to the following shall be considered:

i) The anticipated effect upon the rate or distribution of population growth, employment growth, development, and conversion of land as envisioned in the comprehensive plan.

ii) The anticipated effect on the ability of the county and/or other service providers, such as cities, schools, water and/or sewer purveyors, fire districts, and others as applicable, to provide adequate services and public facilities including transportation facilities.

iii) Anticipated impact upon designated agricultural, forest and mineral resource lands.

d) The amendment does not include or facilitate spot zoning.

e) Urban growth area amendments that propose the expansion of an urban growth area boundary are required to acquire development rights from a
designated TDR sending area, with certain exceptions.

37) Whatcom County’s County-wide Planning Policies include policies related to rural lands:
   a) County-wide Planning Policy B.1 states, “The county shall work with citizens to define a variety of types of rural areas based on the characteristics and needs of different areas.”
   b) County-wide Planning Policy B.2 states, “The county shall discourage urban level development outside Urban Growth Areas and outside of areas currently characterized by a development threshold greater than a rural development density.”
   c) County-wide Planning Policy B.3 states, “Whatcom County shall promote appropriate land uses and allow for infill within rural settlements characterized by existing commercial industrial, and intensive residential development greater than a rural development density. These areas should be clearly delineated and not expanded beyond logical outer boundaries in accordance with RCW 36.70A.070(5). Impacts on rural character, critical areas and other economic considerations as well as the availability of capital facilities and rural levels of service must be considered before allowing infill in these areas.”
   d) County-wide Planning Policies P.1 and P.2 reflect GMA Planning Goal (6) (RCW 36.70A.020(6), which states private property shall not be taken for public uses without just compensation, and Whatcom County Charter Section 1.11, which states no regulation or ordinance shall be drafted and adopted without consideration of and provisions for compensation to those unduly burdened.

Public Participation

38) Whatcom County’s County-wide Planning Policies include policies related to citizen involvement:
   a) County-wide Planning Policy A.2 states, “The county and the cities shall provide opportunities for citizens to become involved in the growth management planning process through various mechanisms, such as surveys, public workshops, meetings, hearings, and advisory committees.”
   b) County-wide Planning Policy A.4 states, “Citizen comments and viewpoints shall be incorporated into the decision-making process in development of draft plans and regulations. Consideration of citizen comments shall be evident in the decision-making process.”

39) The Whatcom County Planning Commission held open work sessions on the proposed amendments on March 14, 2013 and held public hearings on March 28, 2013. Since publication of the first draft amendments on March 11, 2013, the most current draft amendments have been continuously posted on the County’s web site, as have all documents presented to the Planning Commission and all written public comments.
CONCLUSIONS

1) The proposed amendments are consistent with the goals and requirements of the Washington Growth Management Act (GMA) and are in the public interest, and the proposed amendments to Whatcom County Code and the Official Zoning Maps are consistent with the Comprehensive Plan.

2) The rural element of the Comprehensive Plan harmonizes the GMA planning goals in RCW 36.70A.020.
   a. Urban growth. Comprehensive Plan Policy 2DD-1 encourages development in urban areas by concentrating growth in urban areas per the adopted population projections and monitoring rural growth and taking actions as necessary to keep rural growth consistent with adopted projections. The proposed amendments do not affect this policy.
   b. Reduce sprawl. Proposed Comprehensive Plan Policy 2DD-8 and policies guiding growth within rural land use designations (under Goals 2GG, 2JJ, 2KK, 2LL) reduce the inappropriate conversion of undeveloped land into sprawling, low density development in the rural area through use of LAMIRDs with clearly defined boundaries and criteria for creating or changing those boundaries consistent with RCW 36.70A.070(5)(d). Policies 2MM-1 and 2 control and contain areas of higher rural densities. The proposed amendments do not affect these policies.
   c. Transportation. Comprehensive Plan Policy 2DD-1, which encourages growth in urban areas and keeps rural growth consistent with adopted projections, is consistent with effective planning of efficient countywide multimodal transportation systems. Policies 2FF-1, 2FF-2, 2FF-4 and the text describing rural character and lifestyle support rural employment opportunities, which can reduce vehicle trips from rural to urban areas. The proposed amendments do not affect these policies.
   d. Housing. Comprehensive Plan Policies 2GG-2 and 2GG-3, in conjunction with the development regulations in WCC 20.32 Residential Rural District and 20.36 Rural District, allows for residential development at a variety of densities appropriate to established rural character and development patterns. The proposed amendments change Policy 2GG-3 to better ensure a variety of rural densities.
   e. Economic development. Comprehensive Plan Policies 2DD-8, 2DD-9, 2EE-8, 2FF-1, 2FF-2, 2FF-3, 2FF-4, and 2JJ-5 support retention and expansion of existing businesses in rural areas within the capacity of natural resources and appropriate levels of rural services. The proposed amendments do not affect these policies.
   f. Property rights. Neither the rural element nor the process leading to its adoption has taken private property for public use without just compensation or involved arbitrary and discriminatory actions. On March 28, 2013 the Planning Commission was briefed on the Attorney General’s Advisory Memorandum on Avoiding Unconstitutional Takings of Private
Property, per RCW 36.70A.370.

g. Permits. Nothing in the rural element prevents permit applications from being processed in a timely and fair manner.

h. Natural resource industries. Comprehensive Plan Policy 2FF-2 and development regulations in WCC 20.69 Rural Industrial/Manufacturing District support resource-based industries. Policies 2DD-2.D, 2FF-3, 2GG-4 support minimizing conflicts with resource uses. The proposed amendments do not affect these policies.

i. Open space and recreation. Policies 2DD-2.A.2, 2DD-2.A.3, 2DD-2.B, 2DD-2.C, which adopt by reference various development regulations, provide measures to assure visual compatibility with surrounding rural areas, reserve open space through lot clustering, and to protect wildlife habitat and water resources. The proposed amendments do not affect these policies.

j. Environment. Policy 2DD-2.C, which adopts by reference various development regulations, provides measures to protect critical areas and surface and ground water resources. The proposed amendments do not affect this policy.

k. Citizen participation and coordination. Throughout the process to develop and adopt amendments to the rural element, citizens and local jurisdictions have been kept informed and invited to participate through use of e-mail and internet.

l. Public facilities and services. Policy 2DD-2.A.4, which adopts by reference WCC 20.80.212 Concurrency, ensures that no subdivision, commercial development or conditional uses be approved without a written finding that service providers have adequate capacity to serve the development and that no County facilities will be reduced below applicable levels of service as a result of the development. The proposed amendments do not affect this policy.

m. Historic preservation. Policy 2DD-7 supports maintaining the historic character and cultural roles of each rural area and community. The proposed amendments do not affect this policy.

3) The rural element of the Comprehensive Plan and the county development regulations, as amended, meet the requirements of the Growth Management Act, RCW 36.70A.

a. The rural element includes measures that protect the rural character per RCW 36.70A.070(5)(c) in Policies 2DD-1, 2DD-2, 2GG-2, 2GG-3, and 2MM-1-4.

b. The rural element provides for limited areas of more intensive rural development, limited per the requirements of RCW 36.70A.070(5)(d), in policies 2HH-1 through 3, 2JJ-1 through 8, 2KK-1 and 2, and 2LL-1-4. The proposed amendments do not affect these policies.

c. The rural element contains a description of rural character and lifestyle
that considers local circumstances as permitted in RCW 36.70A.070(5)(a), and contains the GMA definition of rural character per RCW 36.70A.030(15). The proposed amendments do not affect that description.

d. Policies 2DD-8, 2DD-9, 2EE-8, 2FF-1, 2FF-2, 2FF-4, and 2JJ-5 support retention and expansion of existing businesses in rural areas, as supported by RCW 36.70A.011. The proposed amendments do not affect these policies.

e. Comprehensive Plan policies describing rural land use designations and rural services (under Goals 2EE, 2GG, 2JJ, 2KK, 2LL, and 2MM), and the development regulations that implement those policies, are consistent with RCW 36.70A.070(5)(b), which requires the rural element to provide for a variety of rural densities, uses, essential public facilities and rural governmental services. The proposed amendments change Policy 2GG-3 to better ensure a variety of rural densities.

f. Policies 2DD-2.A.2, 2DD-2.A.3, 2DD-5, 2DD-6, 2GG-6, and 2MM-2 support innovative techniques, consistent with RCW 36.70A.070(5)(b). The proposed amendments do not affect these policies.

g. The County has evaluated the Comprehensive Plan and development regulation amendments to ensure that they do not result in an unconstitutional taking of private property, per RCW 36.70A.370.

4) The amendments to the rural element of the Comprehensive Plan and the county development regulation resolve the noncompliance and invalidity findings of the January 4, 2013 GMHB Compliance Order in *Futurewise et al v. Whatcom County* (#11-2-0010c):

a. Variety of Rural Densities: Comprehensive Plan Policy 2GG-3 restricts rezonings from R10A to districts allowing higher densities, thus ensuring a variety of rural densities similar to that which already exists.

b. Lot Clustering: Amendments to WCC Title 20 revise rural lot clustering provisions to provide enforceable criteria and to prohibit residential development within reserve areas.

c. Rural Neighborhoods: Amended boundaries of the Fort Bellingham/Marietta, North Bellingham, and Welcome Rural Neighborhoods, along with the amendments to the zoning maps, exclude several larger parcels in order to be more consistent with the small-lot 2011 development pattern.

d. Water Lines: The amendments to WCC 20.82.030 and 20.97.452 clarify that urban-scale water service cannot be extended into rural areas by adding a definition of "transmission line" based on the definition in WAC 246-290-010(267), and by amending wording in the Health Code, WCC 20.11.050(C) which implied that service connections could be made to transmission lines.
5) Additional conclusions regarding LAMIRD boundaries:
   a. With regard to Parcel No. 400123 029037 0000, situated in the I-5/Birch Bay Lynden Road/Valley View Road LAMIRD, the Board originally held in its FDO of January 9, 2012 that the subject parcel should not be included in the LAMIRD because there was an insufficient built environment on that parcel.

   In response, based on new evidence of a built environment, including a structure and site preparation work existing in July 1990, we declined to remove that parcel from the LAMIRD. We believe the new evidence refuted the conclusion of the Board.

   In response, in its FDO dated January 4, 2013, the Board stated that allowing a LAMIRD at this location was probably a mistake in the first place and again required that the parcel be removed. The owner of the parcel appealed both of the Board decisions which are pending.

   The owner of the subject parcel has supplied additional information relating to the loss of value of the parcel as a result of the downzone which the Board has mandated. That information, consisting of letters from a Certified General Real Estate Appraiser and a real estate broker with decades of experience in this area of Whatcom County demonstrates that the uses remaining for this property after the downzone from RGC to RSA are not financially viable.

   We are concerned that such a downzone would result in a violation of RCW 36.70A.020(6) which provides that we should not take property without compensation. We conclude that the benefit to the community by downzoning this property is not roughly proportional to the damage to the property owner. This action likely violates RCW 82.02.020 et. seq., and provisions of the Washington State and United States Constitutions.

   In addition, the exclusion of this 2.5 acre parcel does not comport with RCW 36.70A.070(5)(d)(iv) which requires a logical outer boundary for all LAMIRDS. The Board failed to comply with this section of the Growth Management Act.

   For the reasons stated above, and based on the new evidence and on the belief that the Board previously erred, we respectfully decline to remove this parcel from the LAMIRD.

   b. With regard to Parcel No. 390225 470286 0000 situated in the Smith & Guide Meridian LAMIRD, in its FDO dated January 9, 2013, the Board determined that this parcel should not be included in the LAMIRD because its inclusion does not create a logical outer boundary. New evidence was submitted to the County regarding this parcel. We find the new evidence refutes the conclusion of the Board.
The owner of the parcel appealed the Board decision, which is pending. The Board's FDO dated January 9, 2013, is the first time that the zoning of this parcel has been questioned. It has been zoned for commercial uses since 1990 when it was zoned General Commercial. Moreover, the new evidence indicates that commercial use has been ongoing on the parcel for decades.

In addition, the one-acre parcel (Parcel No. 390225 510322 0000) situated directly north of the parcel has also contained continuous commercial use for decades. Over the years, this smaller parcel has contained a Culligan Water retailer, a veterinarian office, and a paintball business. Presently, a church is located there.

Finally, the Board believes that the distance between the portion of the Smith & Guide Meridian LAMIRD the Board retained and Parcel No. 390225510322 0000 is too far. We disagree and note that 472 lineal feet of Guide Meridian frontage, which is the east boundary of Parcel No. 390225470286 0000, is minimal considering that the Smith & Guide Meridian LAMIRD contains over one mile of Guide Meridian frontage. The Guide is a five-lane state highway.

Due to the prior uses, existing uses and the decades of commercial zoning, retaining Parcel No. 390225 510322 0000 and Parcel No. 390225 4702860000 in the Smith & Guide Meridian LAMIRD is consistent with the location and outer boundary criteria of Policy 2HH-1.A- C and complies with RCW 36.70A.070(5)(d)(iv).

We are concerned that such a downzone would result in a violation of RCW 36.70A.020(6), which provides that we should not take property without compensation. We conclude that the benefit to the community by downzoning these properties is not roughly proportional to the damage to the property owner. As such, this exaction likely violates RCW 82.02.020 et. seq., and provisions of the Washington State and United States Constitutions.

For the reasons stated above and based on the new evidence, we respectfully decline to remove Parcel No. 390225 510322 0000 and Parcel No. 390225 470286 0000 from the LAMIRD.

6) The subject comprehensive plan amendment complies with the approval criteria of WCC 2.160.080, which requires that the County must find the following criteria, are satisfied in order to approve the proposed comprehensive plan amendment.

   a. The amendment conforms to the requirements of Growth Management Act, is internally consistent with the County-Wide Planning Policies and is consistent with any interlocal planning agreements.
i. Growth Management Act

The amendments are consistent with the Growth Management Act as described in Conclusions 3 and 4, above.

ii. County-Wide Planning Policies

County-wide Planning Policy B.1 states, “The county shall work with citizens to define a variety of types of rural areas based on the characteristics and needs of different areas.” Beginning in November of 2008, Whatcom County has engaged the public in the development of the rural element amendments through public meetings, e-mail, and the County’s web site. The proposed amendment to WCCP Policy 2GG-3 ensures a variety of rural densities by restricting rezoning from R10A to districts that allow higher density.

County-wide Planning Policy B.2 states, “The county shall discourage urban level development outside Urban Growth Areas and outside of areas currently characterized by a development threshold greater than a rural development density.” The proposed amendments retain requirements that higher rural densities be contained in designated LAMIRDs and Rural Neighborhoods, per WCCP Policy 2GG-2, and remove land from the Fort Bellingham/Marietta, North Bellingham, and Welcome Rural Neighborhoods.

County-wide Planning Policies P.1 and P.2 reflect GMA Planning Goal (6) (RCW 36.70A.020(6)), which states private property shall not be taken for public uses without just compensation, and Whatcom County Charter Section 1.11, which states no regulation or ordinance shall be drafted and adopted without consideration of and provisions for compensation to those unduly burdened. The Comprehensive Plan amendments do not result in a taking of private property for public use without compensation. On March 28, 2013 the Whatcom County Prosecuting Attorney’s office advised the Planning Commission on the Attorney General’s Advisory Memorandum on Avoiding Unconstitutional Takings of Private Property, per RCW 36.70A.370.

iii) Whatcom County Comprehensive Plan

Proposed amendments to the Zoning Code regarding lot clustering and water line extension are consistent with WCCP Policies 2GG-6 and 2EE-4, respectively. Changes to Rural Neighborhood boundaries are consistent with the criteria provided under WCCP Goal 2MM.

iv) Interlocal Agreements

The interlocal agreements between Whatcom County and the cities require coordination on adopting population projections and reviewing UGAs. The amendments do not adopt new population projections.
without City-County coordination.

b. Further studies made or accepted by the department of planning and development services indicate changed conditions that show need for the comprehensive plan amendment.

The need for this Comprehensive Plan amendment and accompanying Zoning Code and Zoning Map amendments is generated by the Growth Management Hearings Board’s January 4, 2013 Compliance Order.

c. The public interest will be served by approving the comprehensive plan amendment. In determining whether the public interest will be served, factors including but not limited to the following shall be considered:

i. The anticipated effect upon the rate or distribution of population growth, employment growth, development, and conversion of land as envisioned in the Comprehensive Plan.

The proposed amendments either retain existing zoning intensities and densities or reduce them in rural Whatcom County.

ii. The anticipated effect on the ability of the County and/or other service providers, such as cities, schools, water and/or sewer purveyors, fire districts, and others as applicable, to provide adequate services and public facilities including transportation facilities.

No amendments are proposed that increase densities or intensity of uses or increase the demand for services and facilities beyond levels needed to serve development under existing zoning.

iii. Anticipated impact upon designated agricultural, forest and mineral resource lands.

No amendments are proposed that increase adverse impacts on designated resource lands.

d. The amendment does not include or facilitate spot zoning.

WCC 20.97.186 defines “illegal spot zoning” as “a zoning action by which a smaller area is singled out of a larger area or district and specially zoned for a use classification totally different from, and inconsistent with, the classification of surrounding land and not in accordance with the Comprehensive Plan. Spot zoning is zoning for private gain designed to favor of benefit a particular individual or group and not the welfare of the community as a whole.” Rezonings proposed under these amendments apply to areas, or to lots identified
by the Growth Management Hearings Board as not meeting GMA requirements for inclusion in a LAMIRD, and therefore none meet this definition of spot zoning.

e. Urban growth area amendments that propose the expansion of an urban growth area boundary shall be required to acquire development rights from a designated TDR sending area, unless one of the exceptions set forth in WCC 2.160.080(A)(5) applies to the amendment.

No urban growth area amendments are proposed.
RECOMMENDATION

Based upon the above findings and conclusions, the Whatcom County Planning Commission recommends approval of:

- Exhibit A, Whatcom County Comprehensive Plan amendments,
- Exhibit B, Whatcom County Code amendments,
- Exhibit C, Official Whatcom County Zoning Map amendments.

The Planning Commission further recommends that the County Council docket a review of the Whatcom County Code’s lot clustering provisions, including but not limited to a review of required reserve area percentages and ways to ensure agricultural viability for agricultural reserve areas.

WHATCOM COUNTY PLANNING COMMISSION

Michelle Luke, Chair

Sam Ryan, Secretary

May 3, 2013

Commissioners present at the April 25, 2013 meeting when the vote was taken: Ben Elenbaas, Rod Erickson, Gary Honcoop, Michelle Luke, David Onkels, Mary Beth Teigrob, and Gerald Vekved.

Vote: Ayes: 7, Nays: 0, Abstain: 0, Absent: 2. Motion carried to adopt the above amendments.

Re: Smith & Guide Meridian Type I LAMIRD
Whatcom County Assessor’s Parcel No. 390225 470286 0000

Dear Planning Commission:

This letter is intended to shed light on the Growth Management Hearings Board’s (“Board”) Compliance Order (“Order”) issued on January 4, 2013 and Whatcom County’s anticipated compliance action. By way of background, the Order addressed Whatcom County Ordinance 2012-032 (“Ordinance”) that was enacted in the summer of 2012.

We represent Doug Pullar, who is the owner of the above-referenced property (herein the “Property”). The Property is a 13.5 acre parcel located at 5541 Guide Meridian – at the north end of the Smith & Guide LAMIRD. Since the early 1990s, the easterly 6.5 acres of the Property has been zoned General Commercial. As a result of the 2011 and 2012 Ordinance, this section of the Property was included in the Smith & Guide Meridian LAMIRD. The Property has previously been used to sell gravel beginning in the late 1980s. For the last several summers, fruit is sold at a fruit stand on the Property. Please find attached a letter from Mr. Pullar explaining the Property and its historic uses.

In the Order, the Board determined that the logical outer boundary of the Smith & Guide Meridian LAMIRD violated the GMA. The Board specifically took issue with the north end of the Smith & Guide Meridian LAMIRD. In adopting the Smith & Guide Meridian LAMIRD boundary in 2011 and 2012, the County recognized the commercial uses on the one acre parcel at the far north end of the Smith & Guide Meridian LAMIRD and this Property. Unfortunately, the Board disagreed with the County. It reasoned that this “dog-leg” extending the LAMIRD boundary north to include the one acre parcel does not create a logical outer boundary that is “clearly identified and contained.” The Board also found a violation of GMA Goal 2 which is to reduce the “inappropriate conversion of undeveloped land into sprawling, low-density sprawl.”
Now, the County proposes to redraw the boundaries to exclude the Property as well as the one acre parcel to the north. This would change the designation of those parcels from “Rural Community” to “Rural” with R5A zoning.

Unfortunately, the Board did not recognize or understand the definition of a “Rural Community” as articulated by Goal 2HH-1. This goal deals directly with the criteria for Type I LAMIRD designations and requires the “existing (1990) residential built environment was more intensively developed than surrounding areas.” Here, the one acre parcel\(^1\) has been continuously used for commercial purposes for decades. It had been a Culligan Water retailer, a veterinarian office, and a paintball business. Presently, a church is located on it. Similarly, the Property has been used to sell gravel beginning in the late 1980s.

Additionally, if for some reason this is not enough of a “built environment,” the Rural Community designation under “additional location criteria” requires consideration of existing zoning prior to designation as a Rural Community.” Areas that were not intensively developed can be included if inclusion would help “preserve the character of an existing (built) natural neighborhood… and including the area does not create a new pattern of low-density sprawl.” See Whatcom County Comprehensive Plan Policy 2HH-1.C.2.e.e. dated July 24, 2012. The Property was originally zoned as “General Protection” then was changed in 1990 to “General Commercial.” As mentioned above, the zoning then was changed to “Rural General Commercial” in 2011.

Finally, the Board seems very concerned about the “seven undeveloped acres” between the one acre parcel and the rest of the Smith & Guide Meridian LAMIRD. For perspective, these seven acres are the east half of the Property and are a mere 472 lineal feet of Guide Meridian frontage.\(^2\)

The logical outer boundary as proposed by the County in 2012 is “clearly identified and contained.” The one acre parcel and the Property contain meet the criteria contained in Goal 2HH-1 such that each warrant inclusion in the Smith & Guide Meridian LAMIRD. Moreover, the uses on both the Property and the one acre parcel do not constitute an “inappropriate conversion of undeveloped land into sprawling, low-density sprawl” because of the decades of commercial type use. Changing the zoning from some type of commercial zoning to some type of rural zoning flies in the face of logic and the entire purpose of the GMA.

\(^1\) The Board attempts to minimize it by calling it the “property with the small building”.

\(^2\) The Smith & Guide Meridian LAMIRD has almost one mile of frontage on both sides of the Guide Meridian.
We respectfully request that the Planning Commission ignore the staff’s recommendation and retain the Rural Community Comprehensive Plan designation and associated RGC zoning currently in place on the Property.

If the Planning Commission agrees with this assessment, the staff’s Proposed Conclusions would need to be modified. Specifically, Conclusion I. d. found on page 21 of the March 11, 2013 Rural Element Update Staff report would need to be deleted.

Thank you for your consideration.

Very truly yours,

BELCHER SWANSON LAW FIRM, PLLC

BRADLEY D. SWANSON

Cc: client
To: Whatcom County Planning Commission and the
Whatcom County Council

The fundamental goal of land management is to designate uses for land that best meets the needs of
the citizens and the land.

Residential lands tend to be found in low traffic esthetic areas or low traffic easy access areas. Family
residences in high traffic areas create stress in the traffic flow. Residential ingress and egress create
added safety issues. Now add school buses into this flux with their often stopping to pick up or drop off
children, it really defeats the ease in moving traffic. When the multiple red lights of a school bus go on
all traffic both north and south stops, knowing the penalty is brutal driving through a stopped school
bus.

The very fact that residences are diminishing in number testifies the fact that the Guide Meridian is not
a desirable residential location and rightfully so.

So what is the best use for these properties along the Guide Meridian with its high volume noisy traffic?
Businesses; businesses thrive in high volume corridors due to the high visibility they gain. Even when the
Guide Meridian was a traffic nightmare prior to its upgrade, businesses with foresight knew success was
in exposure and access. Now that the Guide Meridian has been thoughtfully upgraded the higher
volume of traffic provides even better exposure and access.

Any entrepreneur contemplating a location to start a business would have to consider the Guide
Meridian as a top location. Current businesses that provide services and goods the public needs do very
well along the Guide Meridian. The land is desirable for business.

(See attachment A) The zoned properties along the Guide Meridian set forth in the zoning from 1990
Smith Road north have multiple businesses with vacant parcels interspersed. These vacant parcels in the
1990’s zoned area will provide future business sites for entrepreneurs in this corridor. County officials
gave good thought and consideration as to what this land was best suited. They got it right.

(See attachment B) Now we have some new considerations for what the land is best suited. The myriad
of rules, regulations, management acts, etc. have proposed zoning be altered to provide more
residential or whatever. If compliance with the Growth Management Act or whatever rule or regulation
requires change, then the current county officials must again evaluate the properties and decide what’s
best for the needs of the people and property.

I don’t believe residences, parks, walking paths, schools, bicycle paths, nature trails, or other activities
are best suited along the Guide Meridian with its’ high volume noisy traffic. High volume traffic is most
compatible with business, and as our county population grows, more businesses can develop providing
jobs, services and a healthy tax base. Now is not the time to strangle useful development of those
properties.
Many county citizens find it less stressful doing business close to home than fighting the streets of Bellingham; that's why businesses have left the core of Bellingham to the outskirts or into the county. For consumers doing business along the Guide, it saves time, saves fuel, and saves stress.

As a property owner at 5541 Guide Meridian in this 1990 commercial zone corridor, I realized the needs of future businesses and therefore provided fire hydrants and waste water drainage. When the Guide Meridian was recently upgraded, the water mains were increased to 12" north of Smith Road on the west side of the highway. Having a veterinary clinic to the north, a full car service to the south, and the above mentioned property improvements, my property was ideal for a future business. I have been patient in hoping a business compatible with my liking would eventually be established and eventually will.

The county assessor assessed all parcels whether occupied by business or not at a commercial rate, and rightfully so. I've paid those assessments from 1992 to current the full time I have owned the property. I felt the transfer of property to a business would be much easier if the taxes were correct.

(See attachment C) In conclusion the synopsis suggests the county has violated RCW 36.70A.070(5)(d) by failing to include adequate measures to protect the rural character. Some areas along the Guide Meridian will always have rural character due to their topography or location. The Nooksack flood plain, gullies, streams, lakes, and low volume traffic north of the Badger Road have changed little and will have rural character for a very long time.

If a policy or regulation is set forth to stop business growth and create a more rural atmosphere, then we will have businesses interspersed with residences, and that would be poor planning.

Secondly, most families choosing to live along the Guide Meridian would be tempted to have front yard sales of old cars, trucks, tractors, or whatever as many do at present. They would not plant Gingko trees or ornamentals to create a more rural oasis interspersed between businesses. That would be silly. Healthy tax generating businesses makes more sense.

The county must decide if it is better off having well-planned businesses providing jobs, services, and a tax base, or will it be better off having many residences maximizing their investment in land by selling their or their friends old motor homes, trucks, etc. One way or another, the land dictates the use and the Guide Meridian with its' high traffic flow is ideal for business.

Thank you for your time and consideration.

Sincerely,

Doug Pullar

Bellingham, WA 98226

Re: Birch Bay-Lynden and Valley View Type I LAMIRD
    Whatcom County Assessor’s Parcel No. 400123 029037 0000
    Proposed Findings of Fact and Conclusions

Dear Planning Commission:

    This letter is a follow-up to our letter dated March 28, 2013 regarding the same.

    In support of retaining Parcel No. 400123 029037 0000 in the Birch Bay-Lynden and Valley View LAMIRD, we prepared changes to County Staff’s “Proposed Findings of Fact and Reasons for Action.” Our changes are contained in the attached Exhibit A.¹

    As a result of these proposed changes to County Staff’s “Proposed Findings of Fact and Reasons for Action,” County Staff’s “Proposed Conclusions” must be changed. Our changes are contained in the attached Exhibit B.²

    Additional information for your consideration is attached as Exhibits C and D.

    Again, we respectfully request that the Planning Commission ignore the staff’s recommendation and retain the Rural Community Comprehensive Plan designation and associated RGC zoning currently in place on Parcel No. 400123 029037 0000.

    Thank you for your consideration.

Very truly yours,

[Signature]

JACK O. SWANSON

Cc: client

¹ Note that all additions are underlined and all deletions are struck-through.
² See Note 1.
Exhibit A

Add the following Findings of Fact and Reasons for Action:

With regard to Parcel No. 400123 029037 0000, situated in the I-5/Birch Bay Lynden Road/Valley View Road LAMIRD, the Board originally held in its FDO of January 4, 2012 that Parcel No. 400123 029037 0000 should not be included in the LAMIRD because there was an insufficient built environment on that parcel. In response, based on new evidence of a built environment, including a structure and site preparation work existing in July 1990, we declined to remove Parcel No. 400123 029037 0000 from the LAMIRD. We believe the new evidence refuted the conclusion of the Board.

In response, in its FDO dated January 9, 2013, the Board stated that allowing a LAMIRD at this location was probably a mistake in the first place and again required that Parcel No. 400123 029037 0000 be removed. The owner of Parcel No. 400123 029037 0000 appealed both of the Board decisions which are pending. We support those appeals.

The owner of Parcel No. 400123 029037 0000 has supplied additional information relating to the loss of value of the parcel as a result of the downzone which the Board has mandated. That information consists of letters from an appraiser and a real estate broker showing that the uses remaining for this property after the downzone from RGC to R5A are not financially viable. We are concerned that such a downzone would result in a violation of RCW 36.70A.020(6) which provides that we should not take property without compensation. We conclude that the benefit to the community by downzoning this property is not roughly proportional to the damage to the property owner. As such, this action likely violates RCW 82.02.020 et seq., and provisions of the Washington State and United States Constitution.

Additionally, the exclusion of this 2.5 acre parcel does not comport with RCW 36.70A.070(3)(d)(iv) which requires a logical outer boundary for all LAMIRDS. Attached is a map that clearly shows that the Board failed to comply with this section of the Growth Management Act.

For the reasons stated above, and based on the new evidence and on the belief that the Board previously erred, we respectfully decline to remove Parcel No. 400123 029037 0000 from the LAMIRD.
Exhibit B

Delete Proposed Conclusion I. e.:

Birch–Bay–Lynden & Valley–View LAMIRD: The amendments to the LAMIRD boundary and zoning map excludes one parcel to create a Type I LAMIRD boundary that is consistent with the requirements of RCW 36.70A.070(5)(d)(iv).

Revise the second and third paragraphs of Proposed Conclusion J. a. ii.:

County-wide Planning Policy B.2 states, “The county shall discourage urban level development outside Urban Growth Areas and outside of areas currently characterized by a development threshold greater than a rural development density.” The proposed amendments retain requirements that higher rural densities be contained in designated LAMIRDs and Rural Neighborhoods, per WCCP Policy 2GG-2, and remove land from the Smith & Guide Meridian and Birch–Bay–Lynden & Valley–View-Rural Community (Type I LAMIRDs), and the Fort Bellingham/Marietta, North Bellingham, and Welcome Rural Neighborhoods.

County-wide Planning Policy B.3 states, “Whatcom County shall promote appropriate land uses and allow for infill within rural settlements characterized by existing commercial industrial, and intensive residential development greater than a rural development density. These areas should be clearly delineated and not expanded beyond logical outer boundaries in accordance with RCW 36.70A.070(5). Impacts on rural character, critical areas and other economic considerations as well as the availability of capital facilities and rural levels of service must be considered before allowing infill in these areas.” The proposed amendments retain Comprehensive Plan policies under Goals 2HH, 2JJ, 2KK, and 2LL that provide criteria and policies for limited areas of more intensive rural development. Proposed amendments to the Smith & Guide Meridian and Birch–Bay–Lynden & Valley–View–Rural Community boundaries creates a Type I LAMIRDS that is area compliant with RCW 36.70A.070(5)(d)(iv).

Bellingham, WA 98226

Re: Rural Element
Whatcom County Assessor’s Parcel No. 400123 029037 0000
(the “Property”)

Dear Planning Commission:

We are writing this letter in connection with the Planning Commission’s deliberations on the rural element, particularly the Birch Bay/Valley View LAMIRD. Based on the Growth Management Hearings Board (“Board”) order dated January 4, 2013, we understand the Planning staff is recommending to the Planning Commission that property be removed from the Birch Bay/Valley View LAMIRD.

We have been asked by the property owner to provide evidence in connection with that proceeding.

First, a little bit about us. I am currently a designated real estate broker licensed under the laws of the State of Washington. I have my own office, Tom Filion’s Land Office, which I have operated since 1977. Prior to getting my broker’s license, I was licensed as a salesperson from 1971.

In my capacity as a broker/salesperson of real estate, I have had extensive dealings in Whatcom County and particularly in the area of Whatcom County north of Bellingham, and in the larger area surrounding the Property.

I have worked with Sam Boulos, one of the owners of the Property, for over 30 years and have frequently assisted him in acquiring other lands as well. I am quite familiar with the Property, and with its location at the intersection of Valley View Road, Birch Bay Lynden Road, and immediately adjacent to the northbound entrance to Interstate 5. In addition to providing real estate services for Mr. Boulos, my other

THOMAS H. FILION / BROKER /
companies have provided maintenance and assistance in managing his various properties
around the County.

When Sam and his partners acquired the Property in 1989, I am aware that his
intention was to develop the site to commercial uses. The Property was zoned Gateway
Industrial at the time which provided for a wide variety of commercial uses which would
be appropriate on a property immediately adjacent to a freeway. I know Sam is in the
gasoline sales business, and am aware that his original intention was to establish a gas
station at the Property’s location.

It is my understanding that the Board has declined to include Sam’s Property in
the LAMIRD with the adjoining property currently owned by Gold Star Resorts, Inc. It
is hard to understand why the Board would make such a ruling. Omitting the Property
from the LAMIRD at this corner of the intersection seems to take a strange bite out of the
overall land which really makes little sense in my view.

Apparently, the Planning staff, in response to the Board’s order, has decided that
the Property should be downzoned from Rural General Commercial (RGC) to Rural 5
Acres (R5A). When I look at the configuration of the lands, this seems quite unusual to
me. I have been asked to review the R5A zoning and determine what kinds of activities
might be appropriate on this site at this location.

As part of my analysis to determine what uses in the rural district might be
appropriate on the Property, I evaluated the surrounding area by considering the active
uses and the zoning. I also reviewed the zone text for the Rural (R) District and the
permitted, accessory, administrative approval uses, and conditional uses allowed in that
district. I also reviewed of July 24, 2012 amendments and the proposed language in the
March 13, 2013 draft submitted to the Planning Commission by the staff.

The prevented uses are found at WCC 20.36.050. I believe none of those uses are
worthwhile in terms of a development project for the Property.

Let’s take single family detached dwelling as an example. The Property has
commercial zoning on two sides of it and highly traveled roads on the two other sides.
While Valley View Road may not be as travelled as some, Birch Bay Lynden Road
certainly makes up for it as does the freeway.

Agriculture is not worthwhile here either. The site has been graveled in
preparation for more intense uses. As such, the soils are virtually unusable for
agriculture.

Sod farming, fish farms, small woodlot management, tree farming, etc., are not
feasible.

The provision which allows private, non-commercial, recreation occupancy of a
recreational vehicle is so restrictive as to be unlikely to be used by anyone.
Non-commercial extracting of sand, gravel, and other materials must be used on the Property.

None of the remaining uses mentioned under the list of permitted uses in the district seem useful at all.

Likewise, none of the accessory uses seem significant enough to warrant making improvements to utilize the Property.

With regard to administrative approval uses, many of them are residential in nature. In my opinion, this site is not suitable for residential development as stated above. The remainder of the allowed uses seem to require the existence of a home on site in which the family operating the use must reside in order to operate. There are plenty of places in Whatcom County where these kinds of activities can occur without having to buy a site like this one and develop all of the infrastructure needed to pursue the proposed activities. Furthermore, even the processing of agricultural uses cannot occur here, because of the requirement that the products be grown on the site, which, again, is unsuitable for agriculture.

Finally, let’s look at the conditional uses.

Many of the conditional uses are not allowed outside rural communities and short term planning areas unless criteria can be demonstrated. This provides little incentive for someone to develop a site so small with those types of uses. The same is true of the schools, churches, retirement homes.

An animal hospital is unlikely due to the number of veterinary hospitals located in north Whatcom County. By our count, there are 3 in Lynden, 2 in Blaine, and 2 in Ferndale, all within a few minutes drive of the Property. In my experience, profit margins in the animal hospital business are low and would not likely justify the capital investment in order to provide such a service at this location.

Regarding .156 Commercial Kennels and Stables, the same is true as animal hospitals. Further, the Property is not large enough for a stable.

Housing or camping facility are unlikely in this marketplace. While the use of the site in the late 80’s and early 90’s included RV camping, that operation was never wildly successful and this site is really too small.

Things like landing strips and surface mining activities are obviously inappropriate. Cottage industries might work on this site, but without an existing home and other infrastructure to support the cottage industry, there is little reason to develop the site for that purpose. Most cottage industries locate where buildings already exist that are functional for the purposes of the business. Once the business takes off, it moves to a business park. There are several such opportunities nearby. Moreover, people who start
cottage industries are not normally flush with capital to provide all that new infrastructure upfront.

Small scale commercial processing, forestry, agricultural products, makes no sense. The demand for firewood in this area is met by a firewood processor in the neighborhood who works from his home.

Bed and breakfast lodgings do not typically locate next to freeways. Rather, they prefer more remote locations which have some kind of natural amenities for the lodgers.

Sections .171, .172, .173 and .174 relate to processing of minerals or agricultural products, nurseries, and the like.

Section .175 is only allowed in the R10.

Regarding .176 through .187, the site does not seem well suited to any of those activities. Some require a significant investment in infrastructure.

The items listed from .189 to .195 will require a location inside a rural community or a short term planning area. Section .196 is wetland mitigation banks which obviously do not fit here.

In conclusion, based upon my years of experience and analysis of the various uses and the site and surrounding areas, it is my conclusion that the Property has little value with rural district zoning assigned to it. This is not the case with the RGC, which has numerous commercial type uses which are allowed and when utilized by the property owner could prosper.

Thank you for the opportunity to comment on this matter. Hopefully it will assist the Planning Commission in its deliberations.

Sincerely,

TOM FILON
April 8, 2013

RE: 13-243

Whatcom County Planning Commission
Whatcom County Courthouse
Bellingham, WA 98225

Dear Sirs,

I have been requested by attorney Jack Swanson to address several issues regarding the "re-zone" of the Mahmoud and Yanolla Boulos property located near Custer, WA at the north easterly quadrant of the Birch Bay-Lynden Rd/Interstate-5 interchange.

This letter shall serve to address several issues with regard to the potential highest and best use of the property and the impact upon values that a zone change would have on the subject property.

1. **Neighborhood Analysis:** The subject property is located in the Custer area of northwestern Whatcom County. The Custer area is generally defined as lying southerly of Loomis Trail Rd, northerly of Grandview Rd, easterly of Kickerville Rd, and westerly of Sunrise Rd. Access throughout the area is good via a system of hard surfaced state and county maintained roadways. The neighborhood features a mixture of land uses throughout the area including commercial, light industrial, agricultural, and suburban residential. Typically, residential parcels in the neighborhood are located on small acreage tracts ranging in size from small platted lots in established residential subdivisions, up to sites of more than 20 acres in size. In addition to the suburban residential uses, there are numerous operating farms in the general vicinity including operating dairy, berry, and dry crop farm operations. Commercial and industrial uses are primarily centered in the I-5 corridor and are concentrated at various interchange locations including the Grandview interchange, the Birch Bay Rd interchange, and the South Blaine interchange with Interstate-5. Residents in the area rely upon the communities of Blaine, Lynden, and Ferndale for sources of goods,
services, and employment. The major factors to preclude more rapid land use change in the vicinity includes the absence of utilities infrastructure, most notably sewer and water. The subject property is located near the northwest portion of the Custer neighborhood in the Birch Bay-Lynden Rd/I-5 interchange area which is one of the busier interchanges on Interstate-5 outside of the corporate limits of Bellingham and/or Ferndale.

2. **Property Description:** The subject site consists of 2.37 acres of land that is essentially rectangular in configuration. It occupies a key corner at the Birch Bay-Lynden Rd / I-5 interchange being at the northeasterly corner of Valley View Rd and the Birch Bay-Lynden Rd intersection with Interstate-5. The site is generally level and at street grade and is mostly cleared except for small trees and deciduous varieties of vegetation. It is unknown if any significant wetlands are in existence on the subject site. The existence of wetlands may impact potential development of the subject property for any type of use, whether it be commercial or residential. A wetlands study would have to be examined in order to determine to what extent, if any, wetlands may impact the potential development and/or use of the subject site. The site commands frontage along the northerly side of Birch Bay-Lynden Rd at the Interstate-5 interchange with Birch Bay-Lynden Rd and also commands frontage along the easterly side of Valley View Rd just north of Birch Bay-Lynden Rd intersection. The site has good visibility and frontage.

3. **Current Zoning:** Currently, the site is zoned Rural General Commercial, which is a land use classification in Whatcom County that allows for a multitude of low impact commercial uses commensurate with the neighborhood in which it is located. In a general sense, the Rural General Commercial classification is intended to accommodate and supply commercial needs within specific areas for a broad range of commercial uses serving the surrounding rural trade area. The intent is to allow for smaller scale commercial development and redevelopment commensurate with available public services and is intended to not compete directly with Highway Commercial, or Gateway Industrial land uses which generally involve commercial and non-residential uses of a much more dense and higher impact nature. To a certain extent, the Rural General Commercial classification is similar to Small Town Commercial where there is not the intent to attract businesses and customers from great distances, however, it does reflect the need to provide for traditional commercial uses in unincorporated Whatcom County. Generally, this type of land use would include the repair of vehicles and equipment, mini-storage facilities, certain eating and drinking establishments, (with limited structural sizes), professional office buildings including veterinary practices, small grocery stores, tool and equipment rental, public markets, and certain wholesale and retail warehousing and distribution facilities. The Rural General Commercial classification is not intended to compete directly with Gateway Industrial, or Highway Commercial Enterprises where a much more dense concentration of commercial uses are generally encouraged. In this regard, it is noted that a significant amount of Gateway Industrial and Highway Commercial zoning is located along the I-5 corridor from Blaine south to the City of Bellingham. In these areas, warehousing, distribution facilities, motels and hotels,
and trans-shipping uses are generally located. The Birch Bay Square shopping center is located less than 200 yards from the subject property on the opposite side of Interstate-5 at the northwest quadrant of I-5 and Birch Bay-Lynden Rd.

4. **Proposed Zone Change:** The proposed zone change from Rural General Commercial to a R-5A classification in a rural district is a significant change in the potential uses that would be allowed on the subject property. The Rural District has been designed to maintain low density rural residential development in areas designated as rural on the comprehensive plan. The intent of the Rural District is to allow for a variety of low intensity uses that are compatible and complimentary with the conservation of agricultural, forestry, and other related uses. In the Rural District, permitted uses outright include: single family residential, agriculture, sod farming, fish farms, small wood lot management, and recreational sites of a non-permanent nature. The Rural Residential District has been primarily associated with much of unincorporated Whatcom County and includes significant areas throughout the western belt of Whatcom County including the R-5A, R-10A, and somewhat more dense R-2A zone classifications. Those areas of the county with the R-5A and R-10A zone classifications are generally improved with single family residential structures and are used for suburban residential purposes.

5. **Definition of Highest and Best Use:** The term “highest and best use” as it normally relates to real estate is generally defined as that use or those uses to which a given property may be put that would yield the greatest net return to the land in terms of dollars over a specified period of time.

When specifically applied to the highest and best use of land, it is generally that use from among reasonable, probable, and legal alternative uses found to be physically possible, appropriately supported, financially feasible, and which results in the highest land value.

Implied within the definitions is the recognition of the contribution of that specific use to community environment or to community development goals in addition to maximizing the value of the individual property owners. The use must be legal, there must be a profitable demand for such use, and it must return to the land net return for the longest period of time. The highest and best use of the subject site as vacant generally takes into consideration four factors. Those factors are:

- a) Physical possibility
- b) Legal permissibility
- c) Economic viability
- d) Maximum productivity

All four of those factors are taken into consideration in the analysis of real estate as it relates to the potential highest and best use of a parcel of land, and hence, its potential market value.
6. **Definition of Market Value:** The term “market value” as it will be referred to in this report as defined by Title XI of FIRREA as adopted by the OCC Regulation 12 CFR 34 is:

The most probable price which a given property should bring in a competitive and open market under all conditions requisite to a fair sale, with the seller and buyer each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus.

a. Buyer and seller are typically motivated;

b. Both parties are well informed or well advised and each acting in what they consider their own best interest;

c. A reasonable time is allowed for exposure in the open market;

d. Payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and

e. The price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the transaction.

(12 C.F.R. Part 34.42(g); 55 Federal Register 34696, August 24 1990 ,as amended at 57 Federal Register 12202, April 9, 1992; 59 Federal Register 29499, June 7, 1994)

The foregoing definitions of highest and best use and market value are critical to the analysis of the subject property. As indicated previously in this letter, the subject property originally had a zone classification of Rural General Commercial, and there is a proposal to change the zone classification to Rural District Classification, in this case, to R-5A.

In this appraiser’s opinion, that will have a significant disadvantageous impact upon the potential use and value of the subject property.

First of all, the subject property constitutes 2.37 acres of land, which is smaller than the minimum site size specified in the R-5A zone classification. While it is recognized that any existing lot of record can be considered a legal building site provided that it does not abut a larger parcel owned by the same party, nevertheless, the minimum site size of the subject property does not meet the minimum size requirements mandated by the Rural District classification.

As described here before in this letter, the subject property is located at a major interchange on the I-5 freeway system in northwestern Whatcom County.

There is no demonstrated demand anywhere within the Whatcom County marketplace for suburban residential parcels on or near major Interstate freeway interchanges.
Again, it is emphasized that the subject property is located within the Custer neighborhood, and from a sub-neighborhood standpoint, the subject property is located within the Interstate-5 corridor. One of the inherent principals in the analysis of vacant land is that value is retained when the land use pattern is ideally balanced, and value is reduced when uses are imbalanced.

This is important to note since properties located on or near the various interchanges throughout Whatcom County reveal a significant pattern in consistent land use.

There are currently 18 interchanges in Whatcom County ranging from the South Lake Samish-Nulle Rd interchange in southern Whatcom County, to the downtown Blaine interchange near the United States/Canadian Border. Generally, there is a consistency in land use patterns throughout all of the interchange locales in Whatcom County specifically, and certainly in other counties in Western Washington as well.

The only interchange in Whatcom County that is not impacted by commercial and/or industrial growth is the South Lake Samish interchange at Nulle Rd near the Whatcom County/Skagit County border. There are no commercial influences in the interchange area; however, the next interchange to the south, the Alger interchange has a fast food facility and automobile service facility at the southeasterly quadrant of the Alger interchange.

The North Lake Samish interchange with Interstate-5 has a convenience store and gas station located at the southwesterly interchange quadrant, and there is a park and ride lot located at the northeasterly quadrant, and there is a shooting facility directly east of the off and on ramps to the North Lake Samish interchange with Interstate-5.

At the Fairhaven Parkway interchange, a major retail outlet is located at the northwesterly quadrant and an automobile service facility and an AM-PM minimart is located at the southwesterly quadrant. A parking lot is located at the southeasterly quadrant, and two derelict homes are located at the northeasterly quadrant.

The Fielding Street interchange also features non-single family residential influences. The Sehome mall dominates the westerly side of Interstate-5, and the northeasterly side features multi-family and commercial uses, and the southeasterly quadrant is improved with older modest quality single family residential housing stock and that area is zoned for multi-family residential purposes.
The Lakeway Drive interchange in Bellingham is dominated by commercial uses at all quadrants with the exception of the northeasterly quadrant which is improved with an old modest quality single family residential dwelling.

The Iowa Street interchange with Interstate-5 features commercial uses at all four quadrants.

The Sunset Drive interchange has intense commercial uses at three of the four quadrants, and the only reason the northwesterly quadrant has not been developed commercially is that the State of Washington and the City of Bellingham have denied access for commercial purposes to a large under improved homesite with a Class B access for single family residential purposes only.

The Meridian Street interchange is all commercial with the exception of the Bellingham Golf and Country Club location.

The Northwest Avenue interchange features two places of worship on the southerly side of Interstate-5, and a major automobile dealership located at the northerly side and a planned multi-family, single family residential development also on the northerly side.

The Bakerview interchange is also intensely developed with commercial uses including the existing Fred Meyer complex, several automobile service facilities, and this interchange is also the location of the planned new “Costco” relocation.

The Slater Rd interchange has commercial uses along the northwesterly and southeasterly quadrants, and the Lummi Indian Tribe is proposing a major commercial facility located at the southwesterly quadrant of the interchange. The northeasterly quadrant features an older single family residential dwelling.

Both interchanges serving the City of Ferndale are serviced by intense commercial uses, including automobile service facilities, banks, food service establishments, and warehousing.

The Grandview Rd interchange features intense warehousing and distribution facilities in the Grandview industrial park located at the northwesterly quadrant of the interchange, and the northeasterly, southeasterly, and southwesterly quadrants have been recently annexed into the City of Ferndale and are planned for Highway Commercial and Light Industrial uses. There are no residential uses planned or allowed at that interchange.

The Birch Bay Rd interchange, where the subject property is located, is intensely improved with the Birch Bay Square shopping center at the northwesterly quadrant, and there is commercial development located at the southwesterly quadrant including a gas station, storage facilities, and a drive-thru coffee stand. There is no development on either the northeasterly or south easterly sides of the Birch Bay-Lynden Rd interchange. This is due primarily to the lack of utilities infrastructure.
The interchanges in the Blaine vicinity, including the Blaine truck route, the Sweet Rd on and off ramp, and downtown Blaine are also intensely improved with non-single family residential uses, including tourist oriented businesses, retail facilities, and multi-family residential uses.

It is clear, that interchange activity does not result in single family residential development. Quite the contrary, with the concentration of vehicular traffic and the collection systems that interstate systems draw upon reduces the desirability of properties from a residential standpoint, but certainly encourage uses or properties for commercial or industrial purposes.

The law of balance holds that value is created and maintained in proportion to the equilibrium obtained in the amount and location of the central uses of real estate.

If the subject property were to be classified as rural with a R-5 zone classification, it would be essentially an “island” in a sea of commercial and non-residential activity. It is emphasized that it is located in one of the major interchanges in unincorporated Whatcom County.

While the Birch Bay-Lynden Rd interchange does not carry the same volume of traffic that interchange activity attracts in and around the Bellingham and Ferndale areas, certainly, the amount of interchange activity at the Birch Bay-Lynden Rd interchange is among the heaviest in unincorporated Whatcom County. It is noteworthy to point out, that traffic is now regulated by stop signs both exiting from Interstate-5 and entering into the Interstate system, whereas, several years ago, there were no stop signs in place.

To further underscore the impact that traffic and incompatibly of land uses have upon value, one only has to look at the experience in Whatcom County in the West Bakerview Rd corridor. Up until 15 years ago, the West Bakerview Rd corridor was a relatively quiet and less traveled street, and the majority of the land uses along both the north and south sides of West Bakerview Rd from Guide Meridian west to Interstate-5 consisted of small acreage sites ranging from one to two acres in size improved with older, as well as newer, single family residential structures. However, with the construction of the Bellis Fair Shopping Center, the Fred Meyer shopping center, the construction of Whatcom Community College, and all of the growth and economic dynamics that have affected Guide Meridian, land use patterns changed significantly to the point where there are no owner occupied homes in the West Bakerview Corridor currently. There are several older existing properties currently in existence, but they are occupied on an interim only basis by tenants. The majority of these older single family residential dwellings have been razed or removed to make way for new multi-family and/or commercial growth. This helps further underscore the fact that high traffic areas, or areas near interchanges and major arterials are not conducive to single family residential usage.

In this appraisers opinion, from a land use standpoint, it would be highly unlikely, that the subject property would ever be purchased for single family residential uses. That being said, there may be conditional uses that could be adaptable to
the site if zoned for Rural Residential purposes. Those uses may include some minimal wholesale marketing activities associated with the agricultural, aquacultural, forestry and minimal resource uses permitted within Whatcom County. However, those wholesale marketing activities are limited in nature restricting size to no more than 500 square feet of floor area. In addition, family daycare homes may be permitted, however, without adequate utilities, this use would more than likely be denied.

In analyzing the subject property from a highest and best use standpoint, the following determination is summarized:

I. Physical adaptability – the size of the subject site is a 2.37 acre parcel of land and would be a sufficient size to accommodate single family residential purposes.

II. Legal permissibility – If zoned for suburban residential purposes, the subject property as a 2.37 acre parcel would be legal.

III. Economic viability – In this category, the test of highest and best use fails. The subject property would not be considered economically viable as a single family residential homesite based upon its location and undesirability from a suburban residential standpoint.

IV. Maximal productivity – As with its economic viability, the site, from the determination of maximum productivity, the value of the subject property as a suburban residential standpoint also fails the test. The subject site would not yield the greatest net return to the land since, it would be an undesirable small acreage parcel for suburban residential purposes.

7. Summary: In summary, the rezone of the subject property from Rural General Commercial to Rural Residential 5A is not considered to be justified based upon its location and the subsequent demand for small acreage parcels in that location for suburban residential purposes.

The highest and best use of the subject property would more than likely be as combined with other larger parcels in the area to maximize use and productivity in an assemblage standpoint for a larger more well planned Rural General Commercial use. Assigning a Rural Residential land use classification to a small acreage parcel in the interchange area of the Birch Bay-Lynden Rd interchange is not considered wise land use planning.

Sincerely,

[Signature]
