Project Status

The new Spillman Technologies (Spillman) Records Management System went live in November 2013. During 2014 and 2015 various integrations with other local, state and federal criminal justice systems were implemented. The Sheriff's Office, Spillman and County Information Technology are working on advanced reporting capabilities, planning for increasing system redundancy and citizen access to crime information. In early 2017, WHAT-COMM 911 implemented a new Computer Aided Dispatch (CAD) system and it has been successfully integrated with the Spillman software. A pilot project using Crystal Reports server for advanced reporting and distribution of information from the Spillman system is underway. In 2019, efforts are currently underway to procure and implement the Spillman Inmate Discipline Module, Spillman Mobile Arrest Forms Module and a Crime Mapping Module.

It is expected that this multi-year project will be closed out in 2019.
