INTRODUCED: August 8, 2006**

ORDINANCE NO. 2006-036

**INTERIM ORDINANCE AMENDING THE WHATCOM COUNTY SHORELINE
MANAGEMENT PROGRAM, SECTION 23.100.20.57, AQUACULTURE
REGULATIONS**

WHEREAS, residents of Whatcom County have made significant sacrifices and forgone harvest opportunity and restrictions on land and water use; and

WHEREAS, residents have volunteered considerable time, money, and resources to the restoration of native salmon runs; and

WHEREAS, various economic sectors in Whatcom County such as recreational and tourism businesses, the fishing industry, and fisheries depend on healthy wild fish populations; and

WHEREAS, scientific evidence indicates marine net pens degrade the marine environment through impacts to water quality, sediment quality, and the health of benthic and pelagic organisms; and

WHEREAS, the goals of federal, state, and local salmon recovery efforts are jeopardized by the negative impacts of commercial marine salmon net pens; and

WHEREAS, currently there are no commercial marine salmon net pens operating in Whatcom County and precautionary approaches to marine habitat protection are in the county's best interest; and

WHEREAS, the Whatcom County Council finds the following facts in support of this ordinance:

FINDINGS-

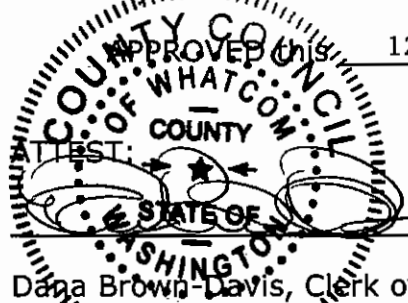

1. The Washington State Pollution Control Hearings Board has determined that escapement of introduced Atlantic salmon are a serious biological pollutant under the Federal Clean Water Act and the State's Water Pollution Control Act, Chapter 90.48, RCW.
2. Farmed salmon pose a threat to wild salmon stocks through the use of antibiotics to treat net pens, causing an increase of antibiotic resistant bacteria in a marine environment.
3. Scientific studies have shown that Atlantic salmon are capable of competing with native fish species for increasingly scarce quality habitat.

4. The Washington State Department of Fish and Wildlife reports that over 500,000 Atlantic salmon have escaped from net pens into Washington State's waters in the last decade and even larger numbers of Atlantic salmon have escaped into British Columbia's waters.
5. Recent scientific evidence documents the presence of Atlantic salmon in 78 rivers and streams in British Columbia, and spawning populations have been documented in three Vancouver Island rivers.

NOW, THEREFORE, BE IT ORDAINED by the Whatcom County Council that the Whatcom County Shoreline Management Program, Section 23.100.20.57 is temporarily amended as indicated in Exhibit A to this ordinance.

BE IT FURTHER ORDAINED by the Whatcom County Council, pursuant to RCW 36.70.795, that this ordinance shall be effective for not longer than six months following its effective date, but may be renewed for one or more six-month periods if subsequent public hearings are held and findings of fact are made prior to each renewal.

APPROVED this 12 day of September, 2006.

 ATTEST:

 Dana Brown-Davis, Clerk of the Council

APPROVED BY:

 Karen Frakes

 Civil Deputy Prosecutor

WHATCOM COUNTY COUNCIL

 WHATCOM COUNTY, WASHINGTON

 Laurie Caskey-Schreiber, Council Chair

APPROVED DENIED

 Pete Kremen, County Executive

 Date: 9-15-06

EXHIBIT A

(SHORELINE REGS.)

23.100.20.57

Commercial salmon net-pen facilities shall not be located closer than twelve statute miles by transit on the surface of the water from the mouth of any river containing significant anadromous fish runs. in Whatcom County waters.
