Good Morning David:

I just completed reading your "memo" to the Planning Commission regarding the UGA Deliberations on October 1. I appreciate your reference to the District's information as we have worked hard ensuring we have a compliant Capital Facilities Plan. But I do have a comment or suggestion.

It appears to me one critical question regarding the Blaine UGA's has not been asked. That question is:

"Would the level of service to the City of Blaine and their associated UGA's be affected (improved) by a change and/or elimination of the Birch Bay UGA?"

It is apparent to me that at some point in these deliberations this question must be addressed especially if your suggested "Option 3" is to be considered.

I am trying to arrange my schedule so that I can attend the meeting tonight. The change in the Planning Commission schedule caused the meeting tonight to fall on our Board of Fire Commissioner meeting night. We will have representation there in some form but we may be a little late.

Thanks for taking this into consideration.

Tom
