Re: Evaluation of Sand at 533 King Tut Rd, Bellingham WA Tax # 3902144955250000

To Whom it may on concern:

I have evaluated the sand that is currently on site at the above address. The sand no longer can be used for septic systems. The sand was approved to be used for Gravity Mound Septic Systems only. Washington State Health Code changes removed the use of any Gravity Mounds systems state wide. State code requires pressuring fill systems. The sand on site meet a gravity fill standard that does not meet the ASTM C-33 standards.

Thank you,

Adam P. Prince
President
