

Appendix E - Vision Week Vision Summary

Topic	Vision
Community	Retain the character (rural, recreational, cottage industry, forestry, home business)
	Enhance the infrastructure (transportation, communications, basic utilities, gov't svcs)
	Mitigate the impacts of development - developer pay for incremental service requirements
	Park for public events in Kendall while involving local ethnic community
	Central community area for Kendall residents to meet, shop and eat.
	Connect Kendall to Bay to Baker trail
	Neighborhood Parks for local children
	Annual festival to represent local community inclusive of Slavic population
	To keep strong history of foothills shared
	Keep uncluttered simple life, some move here to be away from the rat race
	Develop w/ foothills place to employ
	Community center where we want it with the services we need!
	Provide affordable opportunities for locals as well as the recreation industry - "make it nice for the locals too"
	The county will realize that there is a need to support small business in the various communities and adjust zoning accordingly and support same
	Create additional opportunity for land ownership
	Provide local and affordable health care
	Community service and center for social functions
	Efficient cost effective transportation w/ buses, trails, park and ride facilities
	Develop a Glacier Village concept with a possible foundation to help form a sense of community.
	Establish seasonal events and artist markets and other services
	Maintain rural character
Viable and sustainable local economy	
Locally available community services with a long term vision of self direction	
Economy	Identify areas that would be appropriate for light industrial application that would incorporate ecotourism, education, product manufacturing with opportunities for co-operative ownership.
	Growth more business
	Tax incentives/ breaks for new businesses and small businesses
	encourage local businesses: support from community
	More school activities after school (with parents), track meets, Silver Lake parks
	Tax breaks for low/no pollution business
	Encourage tree farming with organic focus (low pollution)
	Encourage golf course
	Encourage immigrant community participation and ideas
	Target more growth for jobs
	Better technology of communications
	Encourage local living wage jobs
	Local sustainability
	Locally based economy
	Eco-friendly
	maintain natural resources
sustainable forestry practices	
Recreational-based tourism	
Growth and Change	Maintain rural character
	Protect environment while allowing property rights and for agricultural use
	Forestry and resource lands are protected and there are regulations in place to make it easier to keep these lands within the families that work them

New developments will arise after our existing developments are functional, and will have sewer and water

All property users will be considered equally and fairly with regard to restrictions and regulations

Central business district with transportation hub (park and ride, bus, bike racks) connecting to trails for walking and biking that connect to communities and school.

Transfer station in or near Central district with recycling, RV dump, clean green dump)

This would centralize services protecting outer lands for conservation and public parks, agriculture, forestry

Not against growth as long as growth pays for services

Nonpolluting efficient transportation

Communication - cell phone; DSL

Public safety access

The group sees great potential for locally sustainable and eventually independent economy in our area. Potential not foreseen by many, but possible if other people could "catch" the vision with them. Many hurdles would have to be surmounted for it to work.

Identity

Create policies which nurture a sense of community, such as prioritizing clustered development over sprawl and creating community spaces

Clean resi area w/ responsible neighbors

By preserving trails, wildlife preservation, clean environment and providing adequate open space, the character of the community will change to provide plenty of affordable housing, good jobs, services and activities for kids and families. As more stable families inhabit the area, crime will decrease and sense of community will raise awareness of neighborhood needs and concerns.

Preserve rural character and wildlife, flora and fauna, clean air and clean water

Land Use

Maintain current zoning/limit up-zoning (will maintain rural character, protect habitat)

Preserve democracy/public process

Limit undue influence of elected representatives by special (\$) interests (including developers)

Focus development on current vs. projected population

More jobs

More schools

More homes

Land use reflects the genuine use of the citizens

Provide more recreational opportunities while maintaining and improving water and sewer systems and roads w/ future growth

Road improvements for safe biking and pedestrian: esp. to and from Kendall School

In 20 years we will have better traffic flow for Kendall with planned growth in Kendall with appropriate infrastructure (schools, utilities, social and health services, entertainment, technology services, cell phone, internet) and the rest of the area will return to its focus on preserving agricultural land, commercial forestry and recreational land. More parks and gym, recreational opportunities - camping and others - are in place, strong environmental compliance and local enforcement which is reasonable and not rigid

Reverse decline of agricultural based industry

Maximize rural character and make sure growth remains small and tightly controlled to match the infrastructure already in place

Promote small cottage industries and recreational tourism

Limit large commercial growth to the infrastructure already in place

Encourage cottage industry

Preserve rural density and rural character

Preserve and expand the rural recreational character of the East county

Utilize existing zoning and infrastructure

Transportation

- Enforce existing regulations
- safety/shoulder size a top priority
- public awareness of "share the road"
- transfer station for buses @ Smith/Hannegan intersection or Smith/Meridian
- Published and mailed updates on available mass and alternate systems
- personal airbags
- cooperation
- travel only as needed
- More road and fix the ones we got
- Widen roadway
- Put in turning lanes
- Implement: A safe travel corridor, that is not crowded, and uses public transportation and bicycle lanes to meet the needs of the community. Use mass transportation to specifically handle peak seasonal or tourist events.
- Safer roads, utilizing passing lanes/turnouts/greater speed enforcement/extended routes/park and ride to mtn.
- Jobs that do not create additional traffic
- Improved/reliable transportation (buses)
