Subject: Whatcom County Rural Element Update - Additional statistic in LAMIRD Report

Good afternoon,

PDS has added a statistic to Appendix E of the LAMIRD Report document posted on the "Proposed" page of the web site, <http://www.whatcomcounty.us/pds/plan/long/projects/lamird/proposed.jsp>. The far right hand columns of the Appendix E spreadsheet estimate "maximum potential new residential lots" for each of the affected areas under both the current zoning and the proposed zoning in the ordinance introduced April 26. This statistic is not intended to estimate potential new dwelling units but it does provide a comparison between the potential lots that could be created under both zoning scenarios. A note on the spreadsheet explains the statistic in greater detail.

If you have any questions regarding the spreadsheet, please let me know.
