To Whom it May Concern

I live in "Paradise" part of the Columbia Valley.

I support the minority report of the Foothills Subarea Plan.

I am in favor of improved services to the existing population.

I support alternative number three.

I am very concerned about water quality and quantity. Also for the loss of the rural character of the Columbia Valley.

Air quality is already a problem here.

We need the improvement of services and resolution of existing problems for the existing population before adding more people to compound the problems.

Thank you

Leta Koon
