

**NOTES:**

1. This drawing illustrates a typical 2-lane asphalt road section. Actual roadway base, surfacing design and subgrade treatment shall be based on soils and traffic analyses as per section 510.C.
2. Sidewalks shall be required as per Section 508.A.
3. Refer to Table 2 and Section 510 for additional information.
4. See drawing 508.F-1 for vertical curb and gutter.
5. Add 8 feet to width for parking allowance on one side or 16 feet to width for parking allowance on both sides of the street. For pocket parking see drawing 505.C-2.
6. 2:1 side slope is the maximum but the clear zone may dictate a shallower slope.
7. Subgrade preparation shall be in accordance with WSDOT Standards Specifications 2-06.
