

INDEX Subcommittee update

We have met as a group twice and IT and I have collaborated multiple times to create mock ups for each of the stake holders that we will present to the group at large on March 7th.

The following is an overview identifying the target audience, the need and the mock up draft for each stakeholder group:

Courts

- Certified Credit for all inmates who have completed time on an Offense within a time frame with an option to restrict by a jurisdiction. Automated and emailed to each court automatically once per week or as desired by the jurisdiction.
- Certified Credit for a specific inmate who has completed time with the ability to look up by case number and or name.
- All inmates currently in custody with at least one offense from the selected jurisdiction and their other offenses, including bond, disposition... etc.

Public Defenders

- Overview of any specific inmate's history in custody including all bookings, offenses, arrests, bail, intake and release dates...etc. Selectable by inmate.

Prosecutors

- Overview of any specific inmate's history in custody including all bookings, offenses, arrests, bail, intake and release dates...etc. Selectable by inmate.
- All inmates currently in custody with at least one offense from the selected jurisdiction and their other offenses, including bond, disposition... etc.

Public and private entities

- Updated website information to include dynamic clickable fields and updates for all inmates in custody, bookings and releases.

Policy Makers

- Statistical data on bookings by agency
- Tracking of all inmates currently in custody by jurisdiction with additional offenses where applicable
- Tracking of young adult offenders who are justice involved with emphasis placed on noting length of stay-keeping in mind that greater than 72 hours has a larger impact. Broken down by gender and crime.

We are showing significant progress in all of these key areas and will have drafts for each at the meeting.

Next steps will be

- Collaboration to get final drafts
- Verify report integrity
- Identifying delivery vehicle(s)
- Connecting infrastructure
- Beta testing
- Production roll out
- Confirmation and monitoring
