

NOTE: Changes already approved by Planning Commission are shown in yellow. Proposed staff changes, not yet acted upon by the Commission, are shown in gray.

Exhibit B

CHAPTER 16.08 STATE ENVIRONMENTAL POLICY ACT (SEPA)

16.08.090. Environmental checklist

E. Evaluation/Worksheet for Fossil and Renewable Fuel Facilities: Air and environmental health are elements of the environment in WAC 197-11-444 and subjects addressed in WAC 197-11-960, Environmental Checklist. As provided in WAC 197-11-906(1)(c), Whatcom County hereby adds a procedure and criteria to help identify the affected environment, impacts, and potential mitigation regarding air quality and climate and risks from spills and/or explosions. For any proposed change of use or expansion of facilities that manufacture, process, store or transport any fossil fuel, renewable fuel, or hydrocarbon feedstock, the proponent will provide an expert evaluation or fill out the County’s SEPA “Worksheet for Fossil and Renewable Fuel Facilities.” This expert evaluation or Worksheet provides detailed information required to evaluate impacts to air, land and water during review of a SEPA environmental checklist. The form of the worksheet shall be prepared and updated as needed once per year by the SEPA Responsible Official in consultation with the Planning Commission and taking into account the comments of the Climate Impacts Advisory Group and its members. The expert evaluation or Worksheet shall analyze the “significance” of direct, indirect, and cumulative impacts including but not limited to those arising from:

1. Windborne transport of fossil or renewable fuel emissions across Whatcom County;
2. Lifecycle greenhouse gas emissions for renewable facilities and facility emissions above existing levels for fossil fuel facilities;
3. Transits of tankers or barges and their support vessels that have the potential to create risks of spills or explosion or interfere with commercial and treaty tribe fishing areas; and
4. Releases of stormwater and wastewater to groundwater, marine waters, intertidal wetlands, streams within the shorelines, and to their headwaters; and
5. Potential for loss of life and/or property related to risks from spills or explosions associated with refining and transport of renewable or fossil fuels or related feedstocks within Whatcom County.

In determining whether possible impacts are “significant” and “probable,” the Responsible Official shall determine whether the answers on information in the expert evaluation or the Worksheet for Fossil Fuel Facilities accurately analyze the severity of potential harm, independently from analysis of probability of occurrence, in compliance with WAC 197-11-330. Also, as provided in WAC 197-11-794, “the severity of an impact should be weighed along with the likelihood of its occurrence” and “an impact may be significant if its chance of occurrence is not great, but the resulting environmental impact would be severe if it occurred.”

The worksheet and supplemental information provided in the expert evaluation or Worksheet required for fossil and renewable fuel facilities shall be considered procedures and criteria added to Whatcom County’s SEPA policies and

36 procedures pursuant to WAC 197-11-906(1)(c) and are deemed necessary to be consistent with the provisions of SEPA
37 contained in RCW 43.21C.020, RCW 43.21C.030 and RCW 43.21C.031. However, the expert evaluation or Worksheet may
38 not be required if an environmental impact statement is prepared.

39 *Discussion/Notes: Suggest reference to WAC 197-11-906(1)(c) as basis to require worksheet*
40 *since it allows for additional procedures and criteria. WAC 197-11-315 refers to Ecology and 30-*
41 *day review for planned actions, which is not proposed.*

42 **Rationale for Changes (shown within highlighting):**

43 The worksheet will take time to develop and likely will not be available when Council adopts the
44 ordinance. Additionally, larger or more complex projects would benefit from expert evaluation of
45 the issues listed above.

46 It may not be necessary to update the worksheet every year. Therefore, the proposed change is to
47 update the worksheet “as needed.” On January 30, 2020, the Planning Commission passed a
48 motion to remove the reference to the Climate Impact Advisory Committee, as the SEPA Official may
49 consult with any committee (including but not limited to the Climate Impact Advisory Committee)
50 when preparing/updating the worksheet. On February 27, 2020, the Planning Commission inserted
51 a clause that requires the SEPA Official to consult with the Planning Commission when
52 preparing/updating the worksheet.

53 The proposed SEPA rules authorize GHG mitigation for “facility emissions” for fossil fuel facilities
54 (proposed WCC 16.08.160.F.1.b.i(a) – Exhibit B, near the bottom of page 4). The proposed SEPA
55 rules require “lifecycle” GHG emission analysis for renewable facilities (proposed WCC
56 16.08.160.F.1.b.ii – Exhibit B, page 5). The information required in the evaluation/worksheet
57 should correspond to these SEPA requirements.

58 The evaluation/worksheet addresses impacts “including but not limited to” the five listed issues. PDS
59 is recommending deleting the phrase “including but not limited to” because it is open-ended and
60 undefined. Applicants will not know what they are required to address if this phrase is retained.

61 Finally, if an environmental impact statement (EIS) is required, then the evaluation/worksheet will not
62 be needed since significant adverse impacts will be addressed in the EIS.

63 **16.08.160 Substantive authority.**

64 A. The policies and goals set forth in this chapter are supplementary to those in the existing authorization of Whatcom
65 County.

66 B. The county may attach conditions to a permit or approval for a proposal so long as:

- 67 1. Such conditions are necessary to mitigate specific probable adverse environmental impacts identified in
68 environmental documents prepared pursuant to this chapter; and
- 69 2. Such conditions are in writing; and
- 70 3. The mitigation measures included in such conditions are reasonable and capable of being accomplished; and
- 71 4. The county has considered whether other local, state, or federal mitigation measures applied to the proposal are
72 sufficient to mitigate the identified impacts; and

69 5. Such conditions are based on one or more policies **or provisions** in subsection D, **E, or F** of this section and cited in
70 the license or other decision document.

71 **Rationale for Changes (shown with highlighting): Subsections E and F below**
72 **include provisions relating to placing conditions on projects.**

73 C. The county may deny a permit or approval for a proposal on the basis of SEPA so long as:

74 1. A finding is made that approving the proposal would result in probable significant adverse environmental impacts that
75 are identified in a FEIS or final SEIS prepared pursuant to this chapter; and

76 2. A finding is made that there are no reasonable mitigation measures capable of being accomplished that are sufficient
77 to mitigate the identified impact; and

78 3. The denial is based on one or more policies **or provisions** identified in subsection D, **or F** of this section and identified
79 in writing in the decision document.

80 **Rationale for Changes (shown with highlighting): Subsection F below includes a**
81 **provision relating to denying projects.**

82 D. The county designates and adopts by reference the following policies as the basis for the county's exercise of SEPA
83 authority pursuant to this section:

84 1. The county shall use all practicable means, consistent with other essential considerations of state policy, to improve
85 and coordinate plans, functions, programs, and resources to the end that the state and its citizens may:

86 a. Fulfill the responsibilities of each generation as trustee of the environment for succeeding generations;

87 b. Assure for all people of Washington safe, healthful, productive, and aesthetically and culturally pleasing
88 surroundings;

89 c. Attain the widest range of beneficial uses of the environment without degradation, risk to health or safety, or
90 other undesirable and unintended consequences;

91 d. Preserve important historic, cultural, and natural aspects of our national heritage;

92 e. Maintain, wherever possible, an environment which supports diversity and variety of individual choice;

93 f. Achieve a balance between population and resource use which will permit high standards of living and a wide
94 sharing of life's amenities; and

95 g. Enhance the quality of renewable resources and approach the maximum attainable recycling of depletable
96 resources.

97 2. The county recognizes that each person has a fundamental and inalienable right to a healthful environment and that
98 each person has a responsibility to contribute to the preservation and enhancement of the environment.

99 3. The county adopts by reference the policies in the following county documents:

100 Whatcom County Comprehensive Land Use Plan (inclusive of goal statements and all subarea components)

101 Whatcom County Shoreline Management Program

102 Whatcom County Subdivision Ordinance

103 Whatcom County Solid Waste Management Plan

104 Whatcom County Critical Areas Ordinance

105 All official land use controls adopted by Whatcom County.

106 E. Relationship to Federal, State and Regional Regulations. Many of the environmental impacts addressed by these
107 SEPA policies are also the subject of federal, state and regional regulations. In deciding whether a project specific
108 adverse environmental impact has been adequately addressed by an existing rule or law of another agency with
109 jurisdiction, the County shall consult orally or in writing with that agency and may expressly defer to that agency. In
110 making this deferral, the County shall base or condition its project approval on compliance with these other existing
111 rules or laws. In deciding whether these regulations provide sufficient impact mitigation, the County shall consult orally
112 or in writing with the responsible federal, state or other agency with jurisdiction and environmental expertise and may
113 expressly defer to that agency. The County shall base or condition its project decision on compliance with these other
114 existing regulations, rules, laws, or adopted enforceable plans. The County shall not so defer if such regulations did not
115 anticipate or are otherwise inadequate to address a particular impact of a project.

116
117 Rationale for Changes (shown with highlighting): The replacement language
118 above is taken from the State SEPA rules (WAC 197-11-158(4)) to better reflect
119 these State rules.

120
121 F. Specific Environmental Policies

122 1. Air Quality and Climate:

123 a. Air pollution can be damaging to human health, plants and animals, visibility, aesthetics, and the overall quality
124 of life. Mitigation of ~~criteria~~air pollutant impacts will normally be the subject of air permits required by the
125 Northwest Clean Air Agency (NWCAA) and/or State Department of Ecology (DOE) and no further mitigation by
126 the County shall be required. However, where a project being reviewed by the County generates public nuisance
127 impacts, ~~or~~ odors or greenhouse gas emissions impacts not addressed through the regulations of NWCAA or DOE,
128 the County may require mitigation under SEPA.

129
130 Rationale for Changes (shown with highlighting): Criteria pollutants are specific
131 types of pollutants identified in the Federal Clean Air Act. The NWCAA addresses
132 a wider variety of pollutants. Additionally, the State Department of Ecology may
133 require a “Prevention of Significant Deterioration” permit for certain industrial
134 sources of air pollution (e.g. refineries). Using the term “public” nuisance in the text
135 above will maintain consistency with WCC 20.66.704 and WCC 20.68.704, the
Light Impact Industrial and Heavy Impact Industrial provisions relating to odors.

136 b. Climate change is resulting in increased temperatures, reduced summertime snowpack, reduced stream flows
137 and increased stream temperatures, more intense storms with increased potential for flooding and damage to roads,
138 dikes and critical infrastructure such as water and waste treatment facilities. While climate change is a global
139 phenomenon, it is the policy of Whatcom County to do its fair share to reduce local emissions and to ensure that
140 projects with a likelihood of more than a moderate adverse impact on air quality and climate that may be
141 authorized by the County address greenhouse gas emissions impacts. Mitigation may be achieved through the
142 provisions contained in County land use and development regulations or through the State Environmental Policy
143 Act where land use code provisions do not address mitigation of greenhouse gas emissions impacts.

144
145 Rationale for Changes (shown with highlighting): On October 24, 2019, the
146 Planning Commission approved a motion to remove the proposed GHG mitigation
147 requirements from the Zoning Code and keep proposed GHG provisions in SEPA
148 (with further discussion on the SEPA language at a later date). The above changes
149 would delete the reference to GHG mitigation in the Zoning Code. GHG
150 mitigation through SEPA is addressed below.

151 i. Greenhouse Gas Emissions – Fossil Fuel Facilities and Fossil Fuel Transshipment Facilities: The following
152 policies shall apply to fossil fuel facilities and fossil fuel transshipment facilities.

153 (a) Emissions Calculated: The SEPA Responsible Official may require mitigation for greenhouse gas
154 emissions of fossil fuel facilities and fossil fuel transshipment facilities, as calculated consistent with the
155 definition of facility emissions in WCC 16.08.17520.97.124.1.

156 (b) Assessment: Greenhouse gas emissions impacts shall be assessed using the most current scientifically
157 valid modeling techniques version of the GREET Model developed by Argonne National Laboratories or,
158 where feedstocks are from Canada, using the latest version of the GH Genius model developed by Canadian
159 agencies for quantification of upstream emissions from production of feedstocks produced in Canada.

161 Rationale for Changes (shown with highlighting): Industry representatives have
162 indicated concern about the models referenced above. The proposed changes
163 would allow appropriate methods to be used in calculating greenhouse gas
164 emissions.

166 (c) Mitigation: Greenhouse gas emissions that create specific adverse environmental impacts may be offset
167 for proposals subject to WCC 20.68.801 through either code requirements or, if not addressed through code
168 requirements, through mitigation projects that provide real, additional and quantifiable greenhouse gas
169 mitigation. Such mitigation must not be required by any other regulatory mechanism and there shall be no
170 double counting of emission reductions where identified as mitigation of greenhouse gas emissions impacts
171 for permits subject to WCC 20.68.801.

172 Rationale for Changes (shown with highlighting): On October 24, 2019, the
173 Planning Commission approved a motion to remove the proposed GHG mitigation
174 requirements from the Zoning Code and keep proposed GHG provisions in SEPA
175 (with further discussion on the SEPA language at a later date). The above changes
176 would delete the reference to GHG mitigation in the Zoning Code. The double
177 counting language above is somewhat confusing. It seems to indicate that, if
178 mitigation is required by a different agency, then County-required mitigation must
179 be different and additional. But a general concept is that, if another agency
180 requires adequate mitigation, County mitigation is not required. Therefore, PDS is
181 recommending that this language be deleted.

182 Additionally, SEPA allows for mitigation of “specific adverse environmental
183 impacts” (RCW 43.21C.060). This language has been inserted above.

184 ii. Greenhouse Gas Emissions – Renewable Fuels Facilities and Renewable Fuel Transshipment Facilities: The
185 SEPA Responsible Official shall require documentation of lifecycle greenhouse gas emissions associated with
186 renewable fuel facilities. The SEPA Responsible Official will consider the lifecycle greenhouse gas emissions
187 analysis when making the threshold determination. The SEPA Responsible Official shall require
188 documentation of emissions consistent with b.i(a) and b.i(b) above. The applicant shall demonstrate that the
189 lifecycle greenhouse gas reductions associated with the renewable fuels provide a net reduction even when
190 considering transportation and upstream emissions. If there is a net increase in emissions locally, the SEPA
191 Responsible official may require mitigation per b.i(c) above.

192 On October 10, 2019, the Planning Commission provided direction that renewable fuel
193 facilities should not be required to mitigate greenhouse gas emissions if they reduce
194 lifecycle greenhouse gas emissions. Therefore, the greenhouse gas language above has
195 been modified, including deletion of the mitigation language.

iii. Greenhouse Gas Emissions – Other Uses Within the Heavy Impact Industrial District:

(a) Method of analysis: Determined by SEPA Responsible Official following consultation with federal and state agencies with jurisdiction or expertise.

(b) Mitigation: Determined by SEPA Responsible Official. See 1.c.

c. It is the County's policy to minimize or prevent adverse air quality impacts. Federal, state, regional, and county regulations and programs cannot always anticipate or adequately mitigate adverse air quality impacts. If the decision-maker makes a written finding that the applicable federal, state, regional, and/or County regulations did not anticipate or are inadequate to address the particular impact(s) of the project, the decision-maker may condition the proposal to mitigate its adverse impacts or, if impacts cannot be mitigated, may deny a project under the provisions of the State Environmental Policy Act.

2. Plants and Animals:

a. Many species of birds, mammals, fish, and other classes of animals and plants living in both rural and urban environments and are of ecological, educational, and economic value. Fish and wildlife populations are threatened by habitat loss and by the reduction of habitat diversity. For the purposes of this policy, animals and plants of ecological, educational, and economic value include priority habitats and species as listed in the Washington Department of Fish and Wildlife’s Priority Habitats and Species, as amended, consistent with WCC 16.16.710, and High Biodiversity Value Areas per the Whatcom County 2017 Ecosystem Report, as amended.

b. It is the County’s policy to minimize or prevent the loss of fish and wildlife habitat that have substantial ecological, educational, and economic value. A high priority shall also be given to meeting the needs of state and federal threatened, endangered, and sensitive species of both plants and animals. Special consideration shall be given to anadromous fisheries and marine mammals.

c. It is the County’s policy to ensure applicants provide verifiable documentation of consistency with federal and state laws regarding treaty rights, clean water rights (both water quality and water quantity), and endangered species protection such as through attaining permits or conducting consultations. The decision-maker may condition or deny the project to mitigate its specific adverse environmental impacts if the decision-maker finds that a proposed project would reduce or damage rare, uncommon, unique or exceptional plant or wildlife habitat, designated wildlife corridors, or habitat diversity for plants or animals species of substantial educational, ecological, or economic value, or interfere with treaty rights, clean water rights, or endangered species protection.

Discussion/Notes: If amendments are made to the Comprehensive Plan policies then the County will in effect update policies under the County’s SEPA substantive authority.

Rationale for Changes (shown with highlighting): Federal and state agencies would typically determine compliance with federal and state laws when they issue or deny a permit or other authorization for a project. The language above implies that certain federal and state permits/authorizations must be issued before the County can do SEPA review on a project. The State SEPA rules (WAC 197-11-158(4)) indicate:

In deciding whether a project specific adverse environmental impact has been adequately addressed by an existing rule or law of another agency with jurisdiction, the GMA county/city shall consult orally or in writing with that agency and may expressly defer to that agency. In making this deferral, the GMA county/city shall base or condition its project approval on compliance with these other existing rules or laws.

This concept of consultation is already embodied in the proposed amendments in WCC 16.08.160.E above. Therefore, the language in yellow above should be deleted.

241 **16.08.175 Purpose of this article and adoption by reference.**

242 This article contains uniform usage and definitions of terms under SEPA. The county adopts the following sections
243 by reference, as supplemented by WAC 173-806-040:

244

245 WAC

- 246 197-11-700 Definitions.
- 247 197-11-702 Act.
- 248 197-11-704 Action.
- 249 197-11-706 Addendum.
- 250 197-11-708 Adoption.
- 251 197-11-710 Affected tribe.
- 252 197-11-712 Affecting.
- 253 197-11-714 Agency.
- 254 197-11-716 Applicant.
- 255 197-11-718 Built environment.
- 256 197-11-720 Categorical exemption.
- 257 197-11-721 Closed record appeal.
- 258 197-11-722 Consolidated appeal.
- 259 197-11-724 Consulted agency.
- 260 197-11-726 Cost-benefit analysis.
- 261 197-11-728 County/city.
- 262 197-11-730 Decision maker.
- 263 197-11-732 Department.
- 264 197-11-734 Determination of nonsignificance (DNS).
- 265 197-11-736 Determination of significance (DS).
- 266 197-11-738 EIS.
- 267 197-11-740 Environment.
- 268 197-11-742 Environmental checklist.
- 269 197-11-744 Environmental document.
- 270 197-11-746 Environmental review.
- 271 197-11-750 Expanded scoping.
- 272 197-11-752 Impacts.
- 273 197-11-754 Incorporation by reference.
- 274 197-11-756 Lands covered by water.
- 275 197-11-758 Lead agency.
- 276 197-11-760 License.
- 277 197-11-762 Local agency.
- 278 197-11-764 Major action.
- 279 197-11-766 Mitigated DNS.

- 280 197-11-768 Mitigation.
- 281 197-11-770 Natural environment.
- 282 197-11-772 NEPA.
- 283 197-11-774 Nonproject.
- 284 197-11-775 Open record hearing.
- 285 197-11-776 Phased review.
- 286 197-11-778 Preparation.
- 287 197-11-780 Private project.
- 288 197-11-782 Probable.
- 289 197-11-784 Proposal.
- 290 197-11-786 Reasonable alternative.
- 291 197-11-788 Responsible official.
- 292 197-11-790 SEPA.
- 293 197-11-792 Scope.
- 294 197-11-793 Scoping.
- 295 197-11-794 Significant.
- 296 197-11-796 State agency.
- 297 197-11-797 Threshold determination.
- 298 197-11-799 Underlying governmental action.

299 In addition to those definitions contained within WAC 197-11-700 through 197-11-799, when used in this article,
 300 the following terms shall have the following meanings, unless the context indicates otherwise:

301 A. “Early notice” means the county’s response to an applicant stating whether it considers issuance of a
 302 determination of significance (DS) likely for the applicant’s proposal (mitigated determination of
 303 nonsignificance (MDNS) procedures).

304
 305 B. “ERC” means environmental review committee established in WCC 16.08.045.

306
 307 C. “Facility Emissions” means the greenhouse gas emissions associated with fossil fuel or renewable fuel
 308 refineries or fossil or renewable fuel transshipment facilities based upon:

- 309 (1) the transportation within the borders of Whatcom County of refined and unrefined fossil fuels to and
 310 from a facility located within the Cherry Point Heavy Industrial area, and
- 311 (2) the refining and processing of fossil fuels located within the Cherry Point Heavy Industrial area, and
- 312 (3) the upstream emissions generated by the production and transport of raw products to the facility such as
 313 crude oil feedstocks or other fuels used in production or energy generation at facilities.

314
 315
 316
 317
 318
 319
 320

Rationale for Changes (shown with highlighting): On October 24, 2019, the Planning Commission approved a motion to remove the proposed GHG mitigation requirements from the Zoning Code and keep proposed GHG provisions in SEPA (with further discussion on the SEPA language at a later date). The definition of “facility emissions” was in the proposed Zoning Code language. However, this term no longer is used in the Zoning Code. Therefore, it would be moved from the Zoning Code to the County’s SEPA rules.

359

D. "Greenhouse Gas Emissions" means gases that trap heat in the atmosphere. "Greenhouse gas," "greenhouse gases," "GHG," and "GHGs" includes carbon dioxide, methane, nitrous oxide, hydrofluorocarbons, perfluorocarbons, and sulfur hexafluoride, and any other gas or gases designated by the federal clean air act (United States Code Title 42, Chapter 85), state clean air act (Chapter 70.94 RCW), ~~or~~ state limiting greenhouse gas emissions law (Chapter 70.235 RCW).

E. "Lifecycle greenhouse gas emissions" means the aggregate quantity of greenhouse gas emissions (including direct emissions and significant indirect emissions), related to the full fuel lifecycle, including all stages of fuel and feedstock production and distribution, from feedstock generation or extraction through the distribution and delivery and use of the finished fuel to the ultimate consumer, where the mass values for all greenhouse gases are adjusted to account for their relative global warming potential.

Rationale for Changes (shown with highlighting): On October 24, 2019, the Planning Commission approved a motion to remove the proposed GHG mitigation requirements from the Zoning Code and keep proposed GHG provisions in SEPA (with further discussion on the SEPA language at a later date). The definitions of "greenhouse gas emissions" and "lifecycle greenhouse gas emissions" are in the proposed Zoning Code language. However, these terms are only used in the definition of "renewable fuels" in the Zoning Code. They are most often used in the proposed SEPA rules. Therefore, these terms would be inserted into the County's SEPA rules.

FE. "Ordinance" means the procedure used by the county to adopt regulatory requirements.

GD. "Responsible official" shall mean the director of the department which bears responsibilities for the SEPA process or his/her designee.

HE. "SEPA rules" means Chapter 197-11 WAC adopted by the Department of Ecology. (Ord. 98-048 Exh. A; Ord. 84-122 Part 8).

CHAPTER 20.66 LIGHT IMPACT INDUSTRIAL (LII) DISTRICT

20.66.200 Prohibited uses.

All uses not listed as permitted, accessory, administrative approval, or conditional uses are prohibited, including but not limited to the following, which are listed here for purposes of clarity:

.201 Reserved.

.202 Adult businesses except those allowed as an administrative approval use under WCC 20.66.131.

.203 In the Bellingham Urban Growth Area the following uses are prohibited: ~~petroleum refinery and the primary manufacturing of products thereof,~~ primary manufacturing and processing of rubber, plastics, chemicals, paper, asbestos and products derived thereof, and primary metal industries.

~~.204 New fossil-fuel refinery; or new fossil fuel transshipment or facility unless permitted as a part of an existing refinery modification otherwise permitted under this code.~~

Rationale for Changes (shown with highlighting): The existing refineries are south of Grandview Rd., in the Heavy Impact Industrial zone. There are no refineries north of Grandview in the Light Impact Industrial zone.

Discussion/Notes: Prohibit fossil fuel related industries in the LII District; already prohibited in the Bellingham UGA. It does not appear that such uses exist in the LII zone; thus, we have only addressed the prohibition of fossil-fuel refinery and fossil fuel transshipment facility unless part of an existing refinery (e.g. transshipment).

391 CHAPTER 20.68 HEAVY IMPACT INDUSTRIAL (HII) DISTRICT

392 20.68.050 Permitted uses.

393 Unless otherwise provided herein, permitted and accessory uses shall be administered pursuant to the applicable provisions of
394 Chapter 20.80 WCC, Supplementary Requirements, and Chapter 20.84 WCC, Variances, Conditional Uses, Administrative
395 Uses and Appeals, the Whatcom County SEPA Ordinance, the Whatcom County Subdivision Ordinance and the Whatcom
396 County Shoreline Management Program- ~~and implementing regulations. The purpose of the SIC numbers listed within this~~
397 ~~chapter is to adopt by reference other activities similar in nature to the use identified herein. (Policies of the subarea~~
398 ~~Comprehensive Plan may preclude certain permitted uses to occur in particular subareas. Please refer to the policies of the~~
399 ~~applicable subarea plan to determine the appropriateness of a land use activity listed below.)~~

400 .051 The manufacture and processing of food including meat (including packinghouses and slaughterhouses), dairy, fruits,
401 vegetables, seafood, grain mill, large scale bakery, sugar and beverage products, provided the following criteria are met:

402 (1) Holding pens associated with packinghouses and slaughterhouses shall be limited to that necessary to accommodate
403 animals intended for processing within 24 hours.

404 (2) The facility shall comply with the solid waste handling standards as set forth in Chapter 173-350 WAC, as administered
405 by the Whatcom County health department as adopted by reference in Chapter 24.06 WAC.

406 (3) If required by the Washington State Department of Ecology, the following permits shall be obtained:

- 407 (a) State waste discharge permit (Chapter 173-216 WAC);
- 408 (b) Industrial stormwater permit – general permit (Chapter 173-226 WAC);
- 409 (c) An NPDES permit (Chapter 90.48 RCW and Chapter 173-220 WAC).

410 .052 Manufacturing and processing of textiles including weaving cotton, synthetic, silk or wool fabrics; knitting yarn and
411 thread mills; textile bleaching, dyeing and printing; and carpet manufacture.

412 .053 The manufacture and processing of lumber and wood including sawmills; planing mills; millwork; veneer, plywood and
413 prefabricated wood products; wooden containers and cooperage.

414 .054 The following are permitted uses except as otherwise prohibited:

415 (1) The manufacture and process of paper including pulp, paper and paperboard mills; and building paper and board mill
416 products.

417 (2) The manufacture and processing of chemicals and allied products including industrial inorganic and organic chemicals;
418 synthetic resins, rubber, fibers and plastic materials; soap, detergents and cleaning preparations; paint, linseed oil, shellac,
419 lacquer and allied products; chemicals from gum and wood; and agricultural chemicals.

420 ~~(3) Refining and storage of petroleum and asphalt fossil fuels, limited as follows:~~

421 ~~(a) fossil fuel refineries, existing legally as of [XXX effective date].~~

422 ~~(b) fossil fuel transshipment facilities existing legally as of [XXX effective date].~~

423 ~~Discussion/Notes: Allow existing legal fossil fuel uses.~~

424 Rationale for Changes (shown with highlighting): Existing fossil fuel facilities have
425 been moved to proposed WCC 20.68.068 below.

427 ~~(34)~~ The manufacture and processing of rubber and plastic products.

428 ~~(45)~~ Leather tanning and finishing.

- 429 ~~(56)~~ The manufacture and processing of cement and glass; and concrete, gypsum, plaster, abrasive, asbestos and nonmetallic
430 mineral products.
- 431 ~~(67)~~ Primary metal industries including blast furnaces and steel works; mills for primary smelting, secondary smelting,
432 refining, reducing, finishing, rolling, drawing, extruding, and casting of ferrous and nonferrous metals; and the manufacture
433 of miscellaneous metal products.

434 (7) Storage of asphalt in the Heavy Impact Industrial Zone.

435 *Discussion/Notes: Retained from (3) above in case of construction related businesses.*

436 ~~(9) The refining, storage, blending, manufacture and transshipment of renewable fuels, existing legally as of [XXX effective~~
437 ~~date]. Expansions of such existing facilities are subject to the provisions of Section 20.68.153.~~

438 Rationale for Changes (shown with highlighting): Existing renewable facilities have
439 been moved to proposed WCC 20.68.068 below.

441 .055 The fabrication of metal products including metal cans, hardware, hand tools, cutlery, heating apparatus, plumbing
442 fixtures, structural metal and stamping.

443 .056 The manufacture of machinery including engines; turbines; farm machinery and equipment; construction, mining and
444 materials handling equipment; machine tools and dies; and special and general industrial equipment.

445 .057 The manufacture of electrical machinery including transmission and distribution equipment, and industrial apparatus.

446 .058 The manufacture of transportation equipment including automobiles, trucks, buses, airplanes, boat building and repair,
447 railroad equipment, bicycles and motorcycles.

448 .059 Bulk commodity storage facilities, and truck, rail, vessel and ~~pipeline~~ transshipment terminals and facilities except for
449 fossil fuel facilities or fossil fuel transshipment facilities subject to the provisions of 20.68.153. New fossil fuel storage and
450 transshipment facilities are expressly prohibited except as provided in Section 20.68.153.

451 Rationale for Changes (shown with highlighting): Proposed WCC 20.68.068, WCC 20.68.153,
452 and WCC 20.68.205 address permitted, conditionally permitted, and prohibited fossil fuel
453 fuel facilities. The above change would simplify the proposed language by indicating that fossil
fuel facilities are not addressed by WCC 20.68.059.

454 .060 Stationary thermal power plants with generating capacity of less than 250,000 kilowatts, floating thermal power plants
455 with generating capacity of less than 50,000 kilowatts, and other power plants utilizing renewable resources from solar, wind
456 (Chapter 20.14 WCC) or water sources.

457 .061 Heavy construction contractors.

458 .062 Public uses and community facilities including police and fire stations, libraries, activity centers, community centers,
459 park and recreation facilities identified in an adopted city or county Comprehensive Plan or Park Plan, and other similar
460 noncommercial uses, excluding state education facilities and correction facilities.

461 .063 One one-story detached accessory storage building per lot; provided, that the floor area shall not exceed 200 square feet
462 and shall only be used for personal storage and not for habitation or business; and provided further, that the storage building
463 shall contain no indoor plumbing but may be served with electrical power for lighting.

464 .064 Uses allowed in the Light Impact Industrial Zone as permitted uses, WCC 20.66.100, shall be permitted outright within
465 the Heavy Impact Industrial District in the Bellingham UGA.

466 .065 Trails, trailheads, restroom facilities and associated parking areas for no more than 30 vehicles.

467 .066 Marijuana production or processing facility.

468 .068 Existing fossil-fuel refineries, fossil-fuel transshipment facilities, renewable fuel refineries, renewable fuel
469 transshipment facilities, piers and docks legally established as of [XXX effective date of ordinance], uses including repairs,
470 improvements, maintenance, modifications, remodeling or other changes including but not limited to the following, provided
471 that a conditional use permit is not required by WCC 20.68.153:

472 (1) Accessory and appurtenant buildings, structures, and processing equipment.

473 (2) Office space.

474 (3) Parking lots.

475 (4) Radio communications facilities.

476 (5) Security buildings, fire stations, and operation centers.

477 (6) Storage buildings.

478 (7) Routine maintenance and repair.

479 (8) Environmental improvements and other projects, excluding storage tanks, that are required on the subject site by federal,
480 state, regional, or local regulations.

481 (9) Road projects and bridges.

482 (10) Temporary trailers.

483 (11) Heating and cooling systems.

484 (12) Cable installation.

485 (13) Information technology improvements.

486 (14) Continuous emissions monitoring systems or analyzer shelters.

487 (15) Wastewater and stormwater treatment facilities.

488 (16) Replacement and upgrading of existing equipment.

489 (17) Safety upgrades.

490 (18) Storage tanks.

491 (19) Other similar structures or activities.

492

493

494

495

496

497

Rationale for Changes (shown with highlighting): Moving permitted uses associated with existing refineries and transshipment facilities from former proposed WCC 20.68.802 to the permitted use section of the Heavy Impact Industrial Zoning District for consistency with other sections of the Code. Additional items have been inserted as permitted uses to address public comments. On January 30, 2020 the Planning Commission passed a motion to modify some of the language above, which was originally proposed by PDS. Planning Commission modified the introductory clause and subsections (1) and (18).

498 .070 New renewable fuel refineries or renewable fuel transshipment facilities.

499

500

501

Rationale for Changes (shown with highlighting): On December 12, 2019, the Planning Commission passed a motion that renewable fuel facilities be allowed as a permitted use (instead of a conditional use, as proposed by Council).

502 0.71 Expansion of existing legal renewable fuel refineries or renewable fuel transshipment facilities, provided that the
503 expansion is for renewable fuels only.

504
505 Rationale for Changes (shown with highlighting): On January 16, 2020, the
506 Planning Commission passed a motion that expansion of renewable fuel facilities
507 be allowed as a permitted use (instead of a conditional use, as proposed by the
County Council).

508 .081 Freight railroad switching yards and terminals, excluding uses addressed in .059.

509 .082 Marine port facilities, excluding uses addressed in .059, and excluding new piers, docks, or wharves.

510 .085 Type I solid waste handling facilities.

511 .086 Type II solid waste handling facilities.

512 20.68.100 Accessory uses.

513 .101 Employee recreation facilities and play areas.

514 .102 Restaurants, cafes and cafeterias operated primarily for the convenience of employees, clients and customers of the
515 district.

516 .103 Temporary buildings for construction purposes for a period not to exceed the duration of such construction.

517 .104 When auxiliary to a principally permitted use: electric utility facilities; substations; generating plants, if less than 50
518 megawatt (MW) net plant capability; gas works; sewage disposal facilities; solid waste landfills and incinerators.

519 .105 Other accessory uses and buildings, including security services, customarily appurtenant to a principally permitted use.

520 .106 On-site treatment and storage facilities for hazardous wastes associated with outright permitted uses or approved
521 conditional uses subject to the most current siting criteria under Chapter 173-303 WAC.

522 .107 Mini-day care centers, and day care centers operated by, maintained by or funded by business in the district for the
523 purpose of serving the child care needs of employees whose place of employment lies within this zone district.

524 .108 Electric vehicle rapid charging stations and battery exchange facilities.

525 20.68.130 Administrative approval uses.

526 .131 Commercial mushroom substrate production limited to the Cherry Point Industrial Area and pursuant to the
527 requirements as contained in WCC 20.15.020(2) (commercial mushroom substrate production facilities). (Ord. 2006-031 § 1
528 (Exh. A), 2006).

529 20.68.150 Conditional uses.

530 The following uses require a conditional use permit in the HII Zoning District.

531 .152 Uses allowed in the Light Impact Industrial zone as permitted uses, WCC 20.66.100, subject to the following:

532 (1) Outside of the Bellingham Urban Growth Area, approval shall be supported by a finding by the hearing examiner that
533 allowing the use will not limit the supply of land available to meet the demand for future heavy industrial uses.

534 (2) Filing of a deed restriction acknowledging that heavy industrial uses are the preferred uses in the zone and agreeing not to
535 protest proposed heavy industrial uses allowed in the zone in accordance with Chapter 20.68 WCC, and to refrain from legal
536 action against any heavy industrial use in compliance with the regulations of WCC Title 20 and any conditions of approval
537 which might have been proposed.

538 .153 Expansion of existing legal fossil or renewable fuel refineries, operations and the primary manufacturing of products
539 thereof or expansion of existing legal fossil or renewable fuel transshipment facilities. For purposes of this section, an
540 expansion is any fossil fuel refinery and/or transshipment facility development (including otherwise permitted or accessory
541 uses), vested after the effective date of this ordinance, that meets any one of the following thresholds:

542 • Cumulatively increases its maximum atmospheric crude distillation capacity of fossil fuels by more than 10,000
543 barrels (or 420,000 gallons) per day based upon an evaluation of physical equipment limitations conducted by a
544 licensed professional engineer; or

545
546 • Cumulatively increases the maximum transshipment capacity of the facility by more than 10,000 barrels (or
547 420,000 gallons) per day; or

548
549 • Cumulatively increases the maximum transshipment capacity of unrefined fossil fuels from the facility by more
550 than 10,000 barrels (or 420,000 gallons) per day; or

551
552 • Cumulatively increases fossil fuel storage tank capacity of the facility by more than 200,000 barrels (or
553 8,400,000 gallons) for the transshipment of fossil fuels outside of Whatcom County without value added
554 processing.

555 If a conditional use permit is obtained, the baseline for determining the cumulative increases is reset.

556 Such expansions shall be subject to the conditional use criteria below:

557

558
559 Rationale for Changes (shown with highlighting): On January 16 and 30, 2020, the
560 Planning Commission approved motions defining what activities constitute an
561 “expansion” and when a conditional use permit is required. On January 16, 2020, the
562 Planning Commission also approved a motion to move expansion of renewable fuel
563 facilities from conditional use to permitted use, as long as the expansion is for the
564 increased production of renewable fuels.

563 (1) The conditional use permit approval criteria listed under WCC 20.84.220 are met;

564 (2) Within shorelines, if applicable, County approval shall be contingent upon approval of a shoreline permit;

565 (3) The applicant has documented to the satisfaction of the County decision maker all of the anticipated sources, types, and
566 volumes of substances transferred in bulk at the facility. The permit shall be limited exclusively to those types and volumes
567 of materials or products as documented and approved.

568
569 Rationale for Changes (shown with highlighting): Sources of raw materials may change over time
570 and new sources may come on-line. It may be very difficult, if not impossible, to predict sources
571 of materials over the life of a project.

571 (4) Insurance requirements meet the provisions of WCC Section 22.05.125.

572 (5) Mitigation of transportation impacts consistent with Chapter 20.78 WCC, Transportation Concurrency Management, and
573 Chapter 16.24 WCC, Commute Trip Reduction.

574 (6) Mitigation of impacts to other services including fire and emergency response capabilities, water supply and fire flow, to
575 address risks created by expansions.

576 (7) Prior to issuance of any site preparation or construction permits, and prior to occupancy and/or operation of the expanded
577 facility, the applicant shall provide verifiable documentation to the county that the facility has been constructed consistent
578 with any applicable federal or state requirements, including but not limited to water rights and use.

579 Rationale for Changes (shown with highlighting): Criterion 7, addressing federal and state
580 requirements appears to be unnecessary because criterion 9 already addresses federal and
581 state permitting.

582 (8) Plans for stormwater and wastewater releases have been approved.

583 (9) Prior to commencement of any site preparation or construction activities, all necessary state leases shall be acquired for
584 any piers or aquatic lands improvements, and it shall be demonstrated to the satisfaction of the zoning administrator that the
585 project applicant has met any federal or state permit or consultation requirements, including properly addressing tribal treaty
586 rights or the provisions of the Magnuson Amendment through state and federal permitting decisions; and

587 (10) Minimization of greenhouse gas emissions and inclusion of local carbon offset mitigation projects; and

588 Rationale for Changes (shown with highlighting): On October 24, 2019, the Planning Commission
589 approved a motion to remove the proposed GHG mitigation requirements from the Zoning Code
590 and keep proposed GHG provisions in SEPA (with further discussion on the SEPA language at a
591 later date).

592 (11) Demonstration that the proposal will retain or add living wage jobs or contribute to the Whatcom County economy;

593 Rationale for Changes (shown with highlighting): On January 30, 2020, the Planning Commission
594 approved a motion to delete the living wage job language from the conditional use permit
595 approval criteria.
596

597 .154 Treatment and storage facilities for hazardous wastes subject to the following:

598 (1) The ~~eight~~ criteria for a conditional use listed under WCC 20.84.200.

599 (2) The most current state siting criteria under Chapter 173-303 WAC.

600 (3) It shall be the responsibility of the applicant to document to the satisfaction of the approving body the anticipated sources,
601 types, volumes and final disposition of hazardous wastes to be collected and the type of treatments associated with those
602 wastes. The permit shall be limited exclusively to those types of wastes and treatments as documented and approved.

603 (4) Total off-site facility capacity shall be limited to that needed to treat and store wastes generated within Whatcom County
604 by generators requiring off-site management of hazardous wastes; provided, however, waste streams may be sourced from
605 other jurisdictions through interagency zone designation agreements as approved by the county council, not to exceed 10
606 percent of the total local hazardous waste stream.

607 (5) Prior to occupancy of the facility, the State Department of Ecology shall certify to the county that the facility has been
608 constructed consistent with state requirements.

609 (6) As a condition of approval, the applicant shall be required to keep and maintain accurate and current records of the types,
610 amounts, sources, and final disposition of hazardous wastes collected. The applicant shall provide such records annually to
611 the county, or sooner upon county request. If the facility is found to be exceeding the waste stream limitations or permit
612 restrictions, the county staff shall so report to the approving body who shall have the authority to revoke the permit,
613 following a public hearing, if the limitation has been exceeded absent an emergency situation. Any emergency must be
614 documented by county staff.

615 (7) Annual inspections of the facility shall be a minimum requirement. The applicant shall be required to forward copies of
616 all facility inspection reports to the county. If deficiencies are found, the operator shall, within 15 days, submit to the county
617 for approval an implementation schedule of corrective measures. Such schedule shall include specific completion dates and
618 inspection reporting procedures.

619 If the state does not inspect the facility within the year, the applicant shall be required to arrange and bear all costs for an
620 inspection by a qualified and independent inspection agency satisfactory to the county.

621 (8) Should the facility be found to consistently operate in a manner unsatisfactory to the county in regard to the public health
622 and safety, the permit may be revoked by the approving body following a public hearing.

623 .156 Public and private parks facilities not included in an adopted city or county Comprehensive Plan or Park Plan.

624 .157 Trailheads with parking areas for more than 30 vehicles.

625 .158 Athletic fields.

626 ~~.159 New renewable fuel refineries or renewable fuel transshipment facilities, subject to the conditional use permit criteria~~
627 ~~identified in WCC 20.68.153.~~

628

Rationale for Changes (shown with highlighting): On December 12, 2019, the 629 Planning Commission passed a motion that new renewable fuel facilities should be 630 allowed as a permitted use (instead of a conditional use, as proposed by Council). 631 Therefore, a new code section, WCC 20.68.070, has been inserted indicating that 632 new renewable fuel facilities would be permitted outright uses.
--

633 .180 Major passenger intermodal terminals.

634 .187 Type III solid waste handling facilities; provided, that:

635 (1) The facility or site will not be located within the 100-year floodplain or the Lake Whatcom watershed. The facility or site
636 will not be located within any area identified in an adopted critical areas ordinance unless outside of the floodplain and at
637 least three feet in elevation higher than the floodway elevation;

638 (2) Solid waste handling facilities shall be located at least 1,500 feet from the following:

639 (a) All zoning district boundaries, except Commercial Forestry and Industrial Zones;

640 (b) Public parks, public recreation areas, or publicly-owned wildlife areas;

641 (c) Archaeological and historical sites that are registered with the State Office of Archaeology and Historic Preservation;

642 (d) Shorelines that are within the jurisdiction of the Shoreline Management Program;

643 (e) Rivers, streams or creeks that contain documented threatened or endangered fish species;

644 (f) This 1,500-foot buffer does not apply to:

645 (i) Structures used for offices, storage areas for equipment, and weigh scales. These facilities shall be set back from
646 the property line 100 feet or the standard zoning district setback, whichever is greater;

647 (ii) Inert landfills;

648 (3) Inert landfills shall be located at least 500 feet from the following:

649 (a) All zoning district boundaries, except Commercial Forestry and Industrial Zones;

650 (b) Public parks, public recreation areas, or publicly-owned wildlife areas;

- 651 (c) Archaeological and historical sites that are registered with the State Office of Archaeology and Historic Preservation;
- 652 (d) Shorelines that are within the jurisdiction of the Shoreline Management Program;
- 653 (e) Rivers, streams or creeks that contain documented threatened or endangered fish species;
- 654 (f) This 500-foot buffer does not apply to:
- 655 (i) Structures used for offices, storage areas for equipment, and weigh scales. These facilities shall be set back from
- 656 the property line 100 feet or the standard zoning district setback, whichever is greater;
- 657 (4) The facility or site will not result in filling or excavation, location of structures or buildings, driveways or machinery use
- 658 except for vegetation maintenance within 100 feet of any property line and except for driveways within 150 feet of any
- 659 county or state road right-of-way;
- 660 (5) The facility or site will have vehicular approaches designed to minimize conflict between automobile and truck traffic,
- 661 will maintain the carrying capacity of county roads, and will be located on a road classified as all weather, except where use
- 662 is shown to be intermittent and easily delayed until emergency conditions have passed;
- 663 (6) The facility or site has complied with the provisions of WCC 20.84.200 and all other ordinances and laws regulating solid
- 664 waste facilities and sites, such as but not limited to WCC Title 24, the Whatcom County SEPA Ordinance, as well as state
- 665 and federal regulations concerning solid waste facilities and sites;
- 666 (7) All landfills have a final closure plan meeting the requirements of WCC Title 24 and of Chapter 173-350 WAC, and the
- 667 closure plan includes:
- 668 (a) Reclamation in two to 10 acre increments, as appropriately responsive to the size and intensity of the particular
- 669 activity, with seeding to be accomplished annually but no later than September 30th; and
- 670 (b) Permanent vegetative cover that will maintain in healthy growing condition with the level of maintenance that is
- 671 covered through the financial assurance for post-closure activities;
- 672 (8) The buffer areas and visual screening shall include a minimum of 50 feet wide of landscaping meeting the requirements
- 673 of WCC 20.80.300 (Landscaping);
- 674 (9) Solid waste facilities or sites shall be located outside the 10-year time of travel boundary of a public water system's
- 675 delineated wellhead protection area;
- 676 (10) Solid waste facilities or sites that handle putrescible waste will be located at least 10,000 feet from airports serving
- 677 turbine-powered aircraft and at least 5,000 feet from airports serving piston-powered aircraft. These buffers shall be
- 678 measured from the boundary of the Airport Operations Zone or, if the airport is not within an Airport Operations Zone, from
- 679 the boundary of the airport property;
- 680 (11) In addition, the Whatcom County hearing examiner may impose conditions of approval which may be necessary to
- 681 protect the value and enjoyment of existing adjacent uses.
- 682 .188 Mitigation banks as a form of compensatory mitigation for wetland and habitat conservation area impacts when
- 683 permitted in accordance with the provisions of Chapter 16.16 WCC; provided, applications for mitigation banks shall be
- 684 processed as a major development project pursuant to Chapter 20.88 WCC.

685 **20.68.200 Prohibited uses.**

686 All uses not listed as permitted, accessory, administrative approval, or conditional uses are prohibited, including but not

687 limited to the following, which are listed here for purposes of clarity:

688 .201 Reserved.

689 .202 Adult businesses.

690 .203 In the Bellingham Urban Growth Area the following uses are prohibited: petroleum refinery and the primary
691 manufacturing of products thereof, primary manufacturing and processing of rubber, plastics, chemicals, paper, asbestos and
692 products derived thereof; and primary metal industries.

693 .204 New Fossil fuel refineries and the primary manufacturing of products thereof [XXX effective date].

694 Rationale for Changes (shown with highlighting): On December 12, 2019, the Planning Commission
695 passed a motion that new fossil fuel refineries should be prohibited, as proposed by Council.
696 “Fossil fuel refinery” is defined by proposed WCC 20.97.160.4. The “primary manufacturing”
697 text is unnecessary. It is also unnecessary to insert the effective date into the code.

698 .205. New Fossil fuel transshipment facilities, including bulk storage or transfer facilities for fossil fuels [XXX effective
699 date].

700 .206. New piers, docks, or wharves in Cherry Point Industrial District.

701 Rationale for Changes (shown with highlighting): Cite the full name of the zoning
702 district.

703 *Discussion/Notes: Prohibit New Fossil Fuel Refineries. Prohibit Crude Oil and Coal Export*
704 *Facilities – made broader to Fossil Fuel transshipment.*

705 .207 Coal-fired power plants.

706 (Ord. 2018-006 § 3 (Exh. C), 2018; Ord. 2016-011 § 1 (Exh. L), 2016; Ord. 99-078, 1999; Ord. 99-070 § 2, 1999; Ord. 91-
707 075, 1991).

708 **20.68.250 Minimum lot size.**

709 The minimum lot size shall be consistent with the area required to meet the building setback, lot coverage, buffer and
710 development standards of the district. (Ord. 97-057 § 1, 1997; Ord. 96-046 § 1, 1996).

711 **20.68.255 Minimum lot frontage.**

712 For the purpose of dividing property, minimum lot frontage shall be sufficient to provide adequate access and utility
713 development, and meet applicable building setback, buffer, and development standards of the district. In no case shall the
714 frontage be less than 30 feet. (Ord. 99-045 § 1, 1999).

715 **20.68.350 Building setbacks.**

716 Building setbacks shall be administered pursuant to WCC 20.80.200, 20.80.254 and 20.68.550. (Ord. 99-078, 1999).

717 **20.68.400 Height limitations.**

718 No maximum height is established; however, when a building exceeds 50 feet, the setback requirements of WCC 20.80.200
719 shall be increased by one foot for each foot of building height in excess of 50 feet, as applicable to all setbacks.

720 **20.68.450 Lot coverage.**

721 The maximum building or structural coverage shall not exceed 60 percent of the lot size.

722 **20.68.500 Open space.**

723 *Repealed by Ord. 97-057. (Ord. 96-046, 1996).*

724 **20.68.550 Buffer area.**

725 .551 The industrial user shall establish a buffer for building sites adjoining the boundary of the Heavy Impact Industrial
726 District (HII), which shall be located adjacent to the district boundary. The purpose of the buffer is to optimize the visual
727 appearance of the site by obscuring industrial activity from view by passing motorists, to contribute to on-site and off-site
728 impact abatement, and to move towards attaining compatibility with surrounding nonindustrial land uses and character.

729 .552 To implement the buffer requirements of this district, minimum setbacks for heavy industrial buildings and accessory
730 structures shall be established consistent with the following options:

731 (1) If a planting screen is not provided by the industrial user and no natural vegetative screening exists, the minimum
732 setback(s) shall be 660 feet, as measured from the edge of the district boundary. The setback area may be used for security
733 roads, parking, or open space.

734 (2) If natural sight-obscuring and dense vegetation exists, the minimum setback(s) shall be 250 feet, as measured from the
735 district boundary; provided, that a minimum width of 50 feet of natural vegetation is retained. The remainder of the
736 setback(s) may be used for security roads, parking, or open space.

737 (3) If a 50-foot buffer planting screen is established, pursuant to WCC 20.80.345, the minimum setback(s) shall conform to
738 the setback requirements of WCC 20.80.200, as measured from the district boundary. In addition, security roads may be
739 situated within the minimum buffer setback; provided, that the 50-foot-wide buffer planting is established.

740 (4) When a parcel situated within this district is located within the Bellingham Urban Growth Area and adjoins an Urban
741 Residential District or residential district within the city limits, setbacks for heavy industrial buildings and/or uses shall be
742 increased to 100 feet and landscaped in accordance with the requirements of WCC 20.80.345.

743 (5) In no case shall the setback from the northern and western boundaries of the Cherry Point heavy industrial area not
744 contiguous to another industrial zone be less than 660 feet, nor the natural vegetation removed except for parking and
745 security or protective uses.

746 .553 Uses other than heavy industrial will conform to the normal setback requirements as set forth in WCC 20.80.200 and
747 20.80.254(3) and the buffering requirements for light impact industrial uses WCC 20.66.551.

748 .554 If any part of said buffer area is separated from, or sold to any contiguous or adjacent owner, lessee or user, the parcel so
749 separated or sold shall be used only as a buffer area in accordance with the above requirements. (Ord. 2019-013 § 1 (Exh. A),
750 2019; Ord. 2018-006 § 3 (Exh. C), 2018; Ord. 99-078, 1999; Ord. 97-057 § 1, 1997; Ord. 96-046 § 1, 1996; Ord. 89-117,
751 1989; Ord. 87-12, 1987; Ord. 87-11, 1987).

752 **20.68.600 Sign regulations.**

753 Sign regulations shall be administered pursuant to WCC 20.80.400.

754 **20.68.650 Development criteria.**

755 (Ord. 96-056 Att. A § A1, 1996).

756 **20.68.651 Landscaping.**

757 Refer to WCC 20.80.300 for landscaping requirements. (Ord. 89-117, 1989).

758 **20.68.652 Off-street parking and loading.**

759 Off-street parking and loading provisions shall be administered pursuant to WCC 20.80.500. In addition, loading areas must
760 be located in such a manner that no loading, unloading and/or maneuvering of trucks associated therewith takes place on
761 public rights-of-way.

762 **20.68.653 Drainage.**

763 All development activities are subject to the stormwater management provisions of WCC 20.80.630 through 20.80.635. No
764 project permit shall be issued prior to meeting those requirements. (Ord. 2019-013 § 1 (Exh. A), 2019; Ord. 96-056 Att. A §
765 A2, 1996; Ord. 94-022, 1994).

- 766 **20.68.654 Driveways.**
767 Consistent with WCC 20.80.640, driveway plans shall be reviewed by the county engineer or State Department of
768 Transportation, as applicable. (Ord. 2013-057 § 1 (Exh. A), 2013; Ord. 84-38, 1984).
- 769 **20.68.655 Access.**
770 Access shall conform to the provisions of WCC 20.80.565 and 20.80.660. (Ord. 89-117, 1989).
- 771 **20.68.656 Maintenance.**
772 The owner, lessee or user shall be responsible for maintaining an orderly appearance of all properties, and shall be
773 responsible for assuring the care and maintenance of any natural growth, where appropriate.
- 774 **20.68.657 Enclosure.**
775 All manufacturing or fabrication processes which have the potential to produce off-site impacts of a detrimental nature,
776 including light, glare, odors and noise impacts, shall be sufficiently enclosed to mitigate the impacts. (Ord. 99-078, 1999).
- 777 **20.68.700 Performance standards.**
- 778 **20.68.701 Pollution control and nuisance abatement.**
779 Each industry is required to continuously employ the best pollution control and nuisance abatement technology when
780 reasonably and practicably available for each particular industry; provided, that where federal, state, or regional laws or
781 regulations provide for the level of technology to be employed, the appropriate standards shall apply.
- 782 **20.68.702 Heat, light and glare.**
783 All operations and facilities producing heat, light or glare, including exterior lights, shall be so constructed, screened or used
784 as to not unreasonably infringe upon the use and enjoyment of property beyond the boundaries of the district.
- 785 **20.68.703 Ground vibration.**
786 No ground vibration other than that caused by highway vehicles, trains or construction activity shall be permitted, which is
787 discernible without instruments, at or beyond the property line for the use concerned.
- 788 **20.68.704 Odors.**
789 No odors, dust, dirt, or smoke shall be emitted that are detectable, at or beyond the property line for the use concerned, in
790 such a concentration or of such duration as to cause a public nuisance, or threaten health or safety, or to unreasonably infringe
791 upon the use and enjoyment of property beyond the boundaries of the district. (Ord. 91-075, 1991).
- 792 **20.68.705 Noise.**
793 No use in this district shall exceed the maximum environmental noise level established by Chapter 173-60 WAC. (Ord. 91-
794 075, 1991).
- 795 **20.68.706 Toxic gases and fumes.**
796 Any release of toxic gases or fumes must be in compliance with Washington State and Northwest Air Pollution Control
797 Authority standards. (Ord. 91-075, 1991).
- 798 **20.68.707 Liquid pollutants.**
799 There shall be no off-site release to soil or surface drainage ways of water borne or liquid pollutants. (Ord. 91-075, 1991).

800 **20.68.708 Appearance.**

801 New facilities developed in the Bellingham Urban Growth Area shall be designed, constructed, operated, and maintained so
802 as to be harmonious and appropriate in appearance with the existing or intended character of the general vicinity, and such
803 uses shall not change the essential character of the same area. (Ord. 2018-006 § 3 (Exh. C), 2018; Ord. 99-078, 1999).

804 **20.68.709 Marijuana odor.**

805 For indoor facilities no odor or smoke shall be emitted that is detectable at or beyond the walls of the facility, in such a
806 concentration or of such duration as to cause a public nuisance, or threaten health or safety, or to unreasonably infringe upon
807 the use and enjoyment of neighboring use. The applicant shall install an exhaust system that is designed and constructed to
808 capture sources of contaminants to prevent spreading of contaminants or odors to other occupied parts of the building or
809 surrounding area. The system must be designed by a licensed Washington State professional engineer. (Ord. 2015-006 Exh.
810 A, 2015).

811 **20.68.800. Fossil Fuel or Renewable Fuel Refineries or Transshipment Facilities**

812 This section applies to fossil fuel refineries fossil fuel transshipment facilities, renewable fuel refineries, or renewable fuel
813 transshipment facilities.

814 **.801. Environmental Review and Greenhouse Gas Mitigation**

815 (1) State Environmental Policy Act (SEPA) review shall be conducted consistent with WCC Chapter 16.08. Fossil fuel or
816 renewable fuel facility capacity expansions or fossil fuel or renewable fuel transshipment facility expansions are subject to
817 applicable SEPA requirements.

818 (2) Greenhouse gas emission analysis required:

819 (a) For the first expansion requiring County land use permits after the date of this ordinance, a baseline calculation of
820 existing facility emissions of greenhouse gases shall be provided by the applicant addressing the average of the prior
821 three year throughput. See facility emissions definition in WCC 20.97.124.1 for the scope and geography of the
822 analysis. Calculation of baseline greenhouse gas emissions shall follow the methodology used for facility
823 greenhouse gas reports to the State of Washington Department of Ecology, and to the US Environmental Protection
824 Agency Electronic Greenhouse Gas Reporting Tool (e-GGRT), or successor state or federal emissions reporting tool
825 or requirements.

826 (i) The data used to calculate the current actual throughput average shall be obtained from official government
827 reports from the refinery to federal or state agencies regarding production of the refinery or a particular process unit
828 to be expanded. This information shall be provided by the project applicant and verified by the County at the time of
829 application for any land use or construction permits.

830 (ii) For crude oil, refinery capacity is based on atmospheric Crude Distillation Capacity (barrels per calendar day),
831 consistent with data collected by the US Energy Information Administration. The zoning administrator may approve
832 another measure of capacity or source that is consistent with (a) and (a)(i). (b) Facility emissions, defined in WCC
833 20.97.124.1, shall be quantified for each expansion of refining and storage capacity in the application for land use or
834 construction permits and in SEPA documents analyzing the impacts of an expanded facility.

835 (c) The emissions analysis shall identify how mitigation will offset greenhouse gas emissions generated.

836 (d) Calculations of the baseline facility emissions and the projected increases shall be consistent with rules and
837 methods adopted by the State of Washington Department of Ecology and shall include upstream greenhouse gas
838 emission calculations for feedstocks used in the refining process as provided in (e) below.

839 (e) Emissions generated upstream of the refinery facility for production and transport of raw materials used for
840 refinery expansions shall be quantified using the latest version of the GREET Model developed by Argonne
841 National Laboratories or, for raw materials produced in Canada, the latest version of the GH Genius model
842 developed by Canadian national agencies may be used.

843 (f) The County may condition the permit to ensure appropriate mitigation consistent with subsection (3) and may
844 require periodic monitoring of greenhouse gas reduction measure effectiveness. Greenhouse gas mitigation proposed
845 by the permit applicant shall be additional, real and quantifiable and shall not be required under any other regulatory
846 mechanism.

847 (g) Should a national or state greenhouse gas mitigation requirement be adopted that pre-empts or would cause
848 duplication through local greenhouse gas mitigation, the County may defer to the national or state program.

849 (3) Local mitigation of greenhouse gas emissions shall be required, whenever calculated greenhouse gas emissions above the
850 baseline for a 3-year average (per section .801(2)(a)), after the effective date of this section [XXX].

851 (a) The applicant shall identify local carbon offset projects including the type and extent, duration, and expected
852 greenhouse gas reductions, to the satisfaction of the County's SEPA Responsible Official. Greenhouse gas
853 mitigation proposed by the applicant shall be additional, real and quantifiable and shall not be required under any
854 other regulatory mechanism.

855 (b) The County may, upon request by the Applicant, approve a fee in lieu of providing a local mitigation project.
856 The County shall use collected fees in lieu of mitigation for local greenhouse gas mitigation projects that are
857 additional, real and quantifiable and not required under any other regulatory mechanism. The in lieu fee shall be set
858 at \$60 per ton of carbon, based on the following document: US Environmental Protection Agency, Technical Update
859 of the Social Cost of Carbon for Regulatory Impact Analysis Under Executive Order 12866 (May 2013, Revised
860 August 2016). The fee shall be collected annually for the life of the fossil fuel facility or fossil fuel transshipment
861 facility.

862 (c) Should a national or state greenhouse gas mitigation requirement be adopted that pre-empts or would cause
863 duplication through local greenhouse gas mitigation, the County shall defer to the national or state program.

864 Discussion/Note: Regarding the fee in lieu, per the US EPA, the Social cost of carbon (SC-
865 CO₂) "is a measure, in dollars, of the long-term damage done by a ton of carbon dioxide
866 (CO₂) emissions in a given year. This dollar figure also represents the value of damages
867 avoided for a small emission reduction (i.e., the benefit of a CO₂ reduction)." See:
868 <https://19january2017snapshot.epa.gov/climatechange/social-cost-carbon.html>. If the
869 County wishes to increase the mitigation fee it may do so by ordinance with an
870 accompanying rationale such as inflation, updated US EPA guidance or other factors.

871 Rationale for Changes (shown with highlighting): On October 24, 2019, the
872 Planning Commission approved a motion to remove the proposed GHG mitigation
873 requirements from the Zoning Code and keep proposed GHG provisions in SEPA
874 (with further discussion on the SEPA language at a later date). The above changes
875 would delete the proposed GHG provisions from the Zoning Code.

876 **.802 Non-Capacity Improvements**

877 (1) Expansions of existing legal fossil fuel refineries, fossil fuel transshipment facilities, renewable fuel refineries, or
878 renewable fuel transshipment facilities for non-capacity purposes are outright permitted uses. Examples of non-capacity
879 improvements include, but are not limited to:

880 (a) accessory buildings;

881 (b) office space;

882 (c) parking lots;

883 (d) radio communications facilities;

~~() security buildings,~~

~~() storage buildings, and~~

~~() other similar structures or activities.~~

~~(2) Regular equipment maintenance, replacement, safety upgrades, and environmental improvements are outright permitted uses, but shall mitigate greenhouse gas emissions if required by WCC 20.68.801.~~

Rationale for Changes (shown with highlighting): Moving permitted uses associated with existing refineries and transshipment facilities from proposed WCC 20.68.802 above to the permitted use section of the Heavy Impact Industrial Zoning District for consistency with other sections of the Code, where additional items have been inserted as permitted uses to address public comments. Additionally, the reference to GHG mitigation provisions in the Zoning Code has been deleted.

CHAPTER 20.74 CHERRY POINT INDUSTRIAL (CP) DISTRICT

20.74.010 Purpose.

The purpose of the Cherry Point Industrial District is to implement the policies of the Cherry Point Major Industrial Urban Growth Area section of the Whatcom County Comprehensive Plan by establishing a range of land uses and types of development appropriate for the Cherry Point UGA and to encourage large scale master planning of industrial sites to preserve sites of sufficient size to accommodate major port and industrial development. (Ord. 98-083 Exh. A § 57, 1998).

20.74.020 Applicability.

This chapter is applicable to the entire Cherry Point Major Industrial Urban Growth Area. (Ord. 98-083 Exh. A § 57, 1998).

20.74.030 Permitted uses.

(1) Primary permitted uses:

(a) Area south of Grandview: Uses shall include the range of port and large scale industrial uses allowed in the Heavy Impact Industrial District, Chapter 20.68 WCC, as well as large scale high technology businesses.

(b) Area north of Grandview: Uses shall include the range of port and large scale industrial uses allowed in the Light Impact Industrial District, Chapter 20.66 WCC.

(2) Secondary permitted uses shall include smaller scale industrial uses, nonretail commercial uses, and industry-related professional services, provided the secondary use supports or is supported by primary permitted uses in the Cherry Point Industrial Urban Growth Area. (Ord. 98-083 Exh. A § 57, 1998).

20.74.040 Accessory uses.

Accessory uses shall be the same as those permitted in the Heavy Impact Industrial District, Chapter 20.68 WCC. (Ord. 98-083 Exh. A § 57, 1998).

20.74.050 Conditional uses.

Conditional uses shall be the same as those permitted in the Heavy Impact Industrial District, Chapter 20.68 WCC. (Ord. 98-083 Exh. A § 57, 1998).

918 **20.74.055 Prohibited uses.**

919 Prohibited uses shall be the same as those prohibited in the Light Impact Industrial District as applicable (Chapter 20.66), the
920 Heavy Impact Industrial District as applicable; (Chapter 20.68 WCC), and the following:

921 Rationale for Changes (shown with highlighting): The Cherry Point Industrial District
922 includes both the Heavy Impact Industrial and Light Impact Industrial zone.
923 Therefore, both should be referenced.

924 (1) New piers, docks, or wharves.

925 (2) Conversion of Renewable Fuel Refinery or Renewable Fuel Transshipment Facilities to fossil fuel facilities is prohibited,
926 except as allowed under WCC 20.74.115 and WCC 20.68.153.

927 **20.74.060 Master site plan requirements.**

928 (1) Development in the Cherry Point Industrial District requires the review and approval of a master site plan, including
929 SEPA review. Acceptable master site plans include site plans and supporting information submitted and approved for
930 applications for a building permit, a short subdivision, a preliminary plat, a binding site plan, a major project permit or a
931 planned unit development.

932 (2) The minimum area for a master site plan (planning block) shall be 160 acres, or the entire property under common
933 ownership if the common ownership is less than 160 acres.

934 (3) Each planning block shall include one lot of not less than 40 acres in size to be designated as the site for a port or major
935 industrial activity; provided, that if the planning block is 40 acres or smaller, the requirement for the major industrial site
936 shall be waived.

937 (4) Within a planning block, one or more parcels smaller than 40 acres may be created for secondary uses.

938 (5) Review and approved of a master site plan for a planning block shall be included in the approval of any building permit,
939 short subdivision, preliminary plat, binding site plan, major project permit or a planned unit development and shall be subject
940 to the same review and approval standards, including SEPA review, as the plat, binding site plan or permit. Each master site
941 plan shall identify, as appropriate, the proposed phasing of the development including the construction of public and private
942 facilities and utilities. The master site plan or supporting documentation as appropriate shall also include any mitigation
943 required under SEPA and the county critical areas ordinance. (Ord. 98-083 Exh. A § 57, 1998).

944 **20.74.070 Minimum lot size and parcelization.**

945 The minimum lot size in the Cherry Point Industrial District shall be 40 acres; provided, that lots less than 40 acres may be
946 permitted as follows:

947 (1) When the lots are to be located within a development approved as a major project under Chapter 20.88 WCC consistent
948 with the master site plan requirements in this chapter.

949 (2) When the lots are to be located within a development approved as a planned unit development under Chapter 20.85 WCC
950 consistent with the master site plan requirements of this chapter.

951 (3) When the lots are part of a short subdivision, long subdivision or binding site plan approved as consistent with the master
952 site plan requirements of this chapter.

953 (4) When the administrator finds that the lot(s) will be developed with a use(s) that is consistent with the intent of the district
954 and will not interfere with the development of the primary large uses intended by the Comprehensive Plan.

955 (5) When an existing lot of record is less than 40 acres, provided further division is consistent with this section. (Ord. 98-083
956 Exh. A § 57, 1998).

957 **20.74.080 Design standards.**

958 Unless otherwise modified by this chapter, building height, setbacks, landscaping, open space and other building and site
959 design standards for areas south of Grandview Road shall be the same as those of the Heavy Impact Industrial District,
960 Chapter 20.68 WCC; and for the area north of Grandview Road, the same as those of the Light Impact Industrial District,
961 Chapter 20.66 WCC. (Ord. 98-083 Ex. A § 57, 1998).

962 **20.74.090 Traffic demand management.**

963 RCW 36.70A.365 requires the implementation of traffic demand management (TDM) programs for designating a Major
964 Industrial Urban Growth Area. Any employer in the Cherry Point Urban Growth Area that employs 100 or more full-time
965 employees at a single worksite who begin their regular work day between 6:00 a.m. and 9:00 a.m. on weekdays for at least 12
966 continuous months during the year are required to meet the TDM requirements of Chapter 16.24 WCC.

967 (1) Employers located in Cherry Point who have not implemented a TDM program shall implement a TDM program by
968 December 1, 2011.

969 (2) Employers in Cherry Point meeting the criteria for having to complete a plan after December 1, 2011, shall meet the
970 requirements of this section within one year of having met the criteria. (Ord. 2009-071 § 2 (Exh. B), 2009).

971 **20.74.100 Drainage.**

972 All development activities are subject to the stormwater management provisions of WCC 20.80.630 through 20.80.635. No
973 project permit shall be issued prior to meeting those requirements. (Ord. 2019-013 § 1 (Exh. A), 2019).

974 ~~**20.74.110 Change of Use**~~

975 ~~A change of use occurs when the occupancy of a building or a site use changes from one use to another in whole or in part. A~~
976 ~~change of use permit is required to document a change of use, even where no alterations are planned or required by the code.~~
977 ~~This shall be processed as a Type I permit in Chapter 22.05 WCC. The new use shall ensure:~~

978 ~~(1) Applicable building and construction codes are met per Title 15;~~

979 ~~(2) Consistency with the requirements of the CP Industrial District, Chapter 20.74, and base zone; and~~

980 ~~(3) Transportation concurrency requirements are met per Chapter 20.78.~~

981 ~~Discussion/Notes: Change of Use Provisions. Focus is on consistency with the CP district where this permit~~
982 ~~applies.~~

Rationale for Changes (shown with highlighting): On January 30, 2020, the Planning Commission passed a motion to delete the proposed change of use provisions above. Concerns have been expressed relating to the potential conversion of an existing refinery/transshipment facility in a crude oil transshipment facility (e.g. see Resolution 2019-037). The Planning Commission language for proposed WCC 20.68.153 addresses this potential situation by requiring a conditional use permit if shipping capacity of unrefined fossil fuels were to increase over a certain level.

988 ~~**20.74.115 Change of Use of Renewable Fuels Facilities.**~~

989 ~~A change of use of a Renewable Fuel Refinery or Renewable Fuel Transshipment Facilities to a fossil fuel facility inside the~~
990 ~~boundary of an existing legal fossil fuel refinery requires a conditional use permit subject to WCC 20.68.153. Other changes~~
991 ~~of use from Renewable Fuel Refinery or Renewable Fuel Transshipment Facilities to fossil fuel facilities are prohibited.~~

992
993

994

CHAPTER 20.88 MAJOR PROJECT PERMITS

995

20.88.100 Major project permits.

996

.110 All major developments shall, prior to any construction, obtain a major project permit.

997

.120 A major project permit will be required for mitigation banks proposed in accordance with the provisions of Chapter

998

16.16 WCC and for any proposed development that meets any two of the following conditions:

Cost

(estimated construction cost exclusive \$5,000,000
of land value)

Size

Retail 75,000 square feet

office or industrial (gross leasable floor space) 200,000 square feet

Residential 300 dwelling units

motel/hotel 200 units

Number of Employees 250

SEPA Review An EIS is required

999

1000 In addition, the zoning administrator may make an administrative determination after receiving a recommendation from the
1001 technical review committee that any project be considered a major development, if in the opinion of the administration it is of
1002 a nature that council review would be appropriate.

1003 .130 Pursuant to WCC 22.05.120 the hearing examiner shall recommend to the county council project approval, approval
1004 with conditions, or denial, based upon written findings and conclusions supported by the evidence of record. The hearing
1005 examiner's recommendation and county council's decision shall determine the adequacy of a major project permit application
1006 based on the following criteria:

1007 (1) Will comply with the development standards and performance standards of the zone in which the proposed major
1008 development will be located; provided where a proposed major development has obtained a variance from the development
1009 and performance standards, standards as varied shall be applied to that project for the purposes of this act.

1010 (2) Where the project is conditionally permitted in the zone in which it is located, the project must satisfy the standards for
1011 the issuance of a conditional use permit for the zone in which the project is located.

1012 ~~(3) Will be consistent with applicable laws and regulations.~~

1013 (3) Will obtain, if required, a state aquatic lands lease, and all other necessary permits and authorizations, including federal
1014 determinations that the project will not interfere with treaty fishing rights of tribal nations, the limits set forth in the

1015 “Magnuson Amendment” under 33 U.S.C. § 476(b) (2004), Section 10 of the Rivers and Harbors Act (for structures in or
1016 over navigable waters of the U.S.), the Coastal Zone Management Act (including any state Department of Ecology shoreline
1017 conditional use or variance approval), the Clean Air Act, and/or under the Clean Water Act, including but not limited to a
1018 federal Section 404 authorization (for fill into waters of the U.S.) and a state Section 401 water quality certification, prior to
1019 issuance of any site preparation or construction permits necessary to construct a facility authorized under a major project
1020 permit.

1021 (4) Will not substantially interfere with the operation of existing uses.

1022 (5) Will be served by, or will be provided with essential utilities, facilities and services necessary to its operation, such as
1023 roads, drainage facilities, electricity, water supply, sewage disposal facilities, and police and fire protection. Standards for
1024 such utilities, facilities and services shall be those currently accepted by the state of Washington, Whatcom County, or the
1025 appropriate agency or division thereof.

1026 (6) Will not impose uncompensated requirements for public expenditures for additional utilities, facilities and services, and
1027 will not impose uncompensated costs on other property owned.

1028 (7) Will be appropriately responsive to any EIS prepared for the project.

1029 .140 In addition, the hearing examiner may recommend or county council may impose any reasonable conditions precedent
1030 to the establishment of the major development as may be required to mitigate impacts of the proposal on the natural
1031 environment of the county, and to protect the health, safety and general welfare of the people of the county consistent with
1032 the policies for environmental protection set forth in the Comprehensive Plan.

1033 .150 The hearing examiner may recommend or county council may also approve alternative mitigation plans for major
1034 project permits in accordance with WCC 16.16.260(E) which may be used to satisfy the requirements of Chapter 16.16 WCC
1035 and provide relief from the specific standards and requirements thereof.

1036 **20.88.200 Procedure.**

1037 .205 If a major project permit is determined to be required, an application shall be completed and filed along with the
1038 appropriate fees, and the application shall be processed in accordance with Chapter 22.05 WCC. A master plan is required as
1039 part of the application for a major project permit. The master plan document shall include all elements required per the
1040 department’s administrative manual.

1041 .210 Development Standards. The master planmajor project permit may propose standards that will control development of
1042 the possible future uses that are in addition to, or substitute for, requirements of this chapter. These may be such things as
1043 height limits, setbacks, frontage, landscaping requirements, parking requirements, signage, view corridors or facade
1044 treatments. Proposed standards that do not meet the minimum county standards must obtain the appropriate variance prior to
1045 county approval of the proposed standards. If the proposed design standards will apply to property located partially or totally
1046 within an urban growth area, concurrence of the affected city will be required.

1047 .215 Procedures. Master plan-major project permit review shall be conducted under current review procedures. Other land use
1048 reviews may be conducted concurrently with the master plan-major project permit review.

1049 (a) Any modifications, additions or changes to an approved master plan are subject to the following:

1050 (i) Minor changes shall be reviewed for compliance and compatibility with the approved master planmajor project
1051 permit.

1052 (1) A determination is made by the director. The director is authorized to consult a technical committee at
1053 his/her discretion.

1054 (2) Minor changes are those amendments which may affect the dimensions, location and type of
1055 improvements of facilities; provided, the amendment maintains the basic character of the major project
1056 permit application approved by the county council including general type and location of dwellings and
1057 other land use activities, arrangement of buildings, density of the development, and provisions of the
1058 project to meet density bonus and open space requirements, or capacity limits, and maintains required
1059 conditions or mitigation.

1060 (ii) Major changes shall be subject to the original procedural application type, subject to the fees as contained in
1061 the unified fee schedule.

1062 (iii) ~~Master plans~~Major project permits may include, as a condition of their approval, a requirement for periodic
1063 progress reports and mandatory updates on a predetermined interval.

1064

Rationale for Changes (shown with highlighting): A master plan is one component of the major project permit. The procedures above should relate to the entire permit (not just one component of the permit).

1065

1066

1067

1068 .220 through .265 *Reserved*.

1069 .270 Where a project requires a major project permit, that project shall be exempt from the requirement of obtaining a
1070 conditional use permit.

1071 .275 Major project permits: Where an applicant has applied for a planned unit development or a development agreement, that
1072 project shall be exempt from the requirement to obtain a major project permit except in the Cherry Point Industrial District.

1073 .280 Major project permits in the Cherry Point Industrial District: where a project in the Cherry Point Industrial District
1074 requires a major project permit, the major project permit shall be concurrently processed with other required land use permits
1075 including but not limited to: Cherry Point master site plan, conditional use permit, planned unit development, or development
1076 agreement.

1077

Rationale for Changes (shown with highlighting): The master plan is part of a permit application (not a permit in itself).

1078

1079 Additionally, when a major project permit is required, it is exempt from the
1080 conditional use permit (WCC 20.88.270 above).

1080

1081

1082

1083

1084

1085

1086

1087

1088

1089

1090

1091 CHAPTER 20.97 DEFINITIONS

1092 Discussion/Notes: Definitions added are based on a review of federal (US Energy
1093 Information Administration, US Census, Code of the Federal Register, Revised Code of
1094 Washington), County Ordinance NO. 2018-007, Resolution 2019-004 and examples
1095 addressed in the White Paper.

1096 20.97.052.1 Change of Use

1097 “Change of use” means when a building or occupancy is altered or replaced, for example from manufacturing to office.

1098 Renumber Section 20.97.052.1 Child care facilities to 20.97.052.2 Child care facilities.

1099 20.97.124.1 Facility Emissions.

1100 “Facility Emissions” are greenhouse gas emissions associated with fossil fuel or renewable fuel refineries or fossil or
1101 renewable fuel transshipment facilities based upon:

1102 (1) the transportation within the borders of Whatcom County of refined and unrefined fossil fuels to and from a facility
1103 located within the Cherry Point Heavy Industrial area, and

1104 (2) the refining and processing of fossil fuels located within the Cherry Point Heavy Industrial area, and

1105 (3) the upstream emissions generated by the production and transport of raw products to the facility such as crude oil
1106 feedstocks or other fuels used in production or energy generation at facilities.

1107 Rationale for Changes (shown with highlighting): On October 24, 2019, the Planning
1108 Commission approved a motion to remove the proposed GHG mitigation requirements
1109 from the Zoning Code and keep proposed GHG provisions in SEPA (with further
1110 discussion on the SEPA language at a later date). The term “facility emissions” is no
1111 longer is used in the Zoning Code. Therefore, PDS is proposing to move it to the County’s
SEPA rules, where it would be used.

1112 20.97.160.2 Fossil Fuels.

1113 “Fossil fuels” include coal, petroleum, crude oil, natural gas, oil shales, bitumens, tar sands, propane, butane, and heavy oils.
1114 All contain carbon and were formed as a result of geologic processes acting on the remains of organic matter. Renewable
1115 fuels are not fossil fuels.

1116 Rationale for Changes (shown with highlighting): The U.S. Energy Information
1117 Administration defines “Petroleum” as:
1118 A broadly defined class of liquid hydrocarbon mixtures. Included are
1119 crude oil, lease condensate, unfinished oils, refined products obtained from
1120 the processing of crude oil, and natural gas plant liquids. Note: Volumes of
1121 finished petroleum products include non hydrocarbon compounds, such as
additives and detergents, after they have been blended into the products.
1122 While crude oil is a type of petroleum, it might be useful to insert it in the
1123 definition so the reader can know that without going to another source. This would
be consistent with the definition of “Fossil-Fuel Refinery” below, which specifically
refers to crude oil.

1124 20.97.160.3 Fossil or Renewable Fuel Transshipment Facilities.

1125 “Fossil or Renewable Fuel Transshipment Facility” is a facility engaging in the process of off-loading of fossil or renewable
1126 fuel materials, refined or unrefined, refinery feedstocks, products or by products, from one transportation facility and loading
1127 it onto another transportation facility for the purposes of transporting such products into or out of Whatcom County.
1128 Examples of transportation facilities include ship, truck, or freight car. Fossil fuel transshipment facilities may also include
1129 pump and compressor stations and associated facilities. This definition excludes Small Fossil or Renewable Storage and
1130 Distribution Facilities.

1131 Rationale for Changes (shown with highlighting): The definition of “Fossil or
1132 Renewable Fuel Transshipment Facilities” omits “Renewable” in the first sentence of
1133 the definition.

1134 20.97.160.4 Fossil-Fuel Refinery.

1135 A “Fossil-Fuel Refinery” means a facility that converts crude oil and other liquids into petroleum products including but not
1136 limited to gasoline, distillates such as diesel fuel and heating oil, jet fuel, petrochemical feedstocks, waxes, lubricating oils,
1137 and asphalt. Activities that support refineries include but are not limited to: bulk storage, manufacturing, or processing of
1138 fossil fuels or by products. This definition excludes Small Fossil or Renewable Storage and Distribution Facilities.

1139 20.97.160.5 Fossil-Fuel Refinery Capacity.

1140 “Fossil Fuel Refinery Capacity” means the extent of refinery production capacity in relation to storage capacity. “Storage
1141 Capacity” is defined as total volume of all tanks at a facility and “Refining Production Capacity” is defined as the current
1142 actual throughput averaged over the latest three year reporting period prior to the date of a completed application for any
1143 necessary County permits obtained from official government reports from the refinery to federal or state agencies regarding
1144 production of the refinery or a particular process unit to be expanded.

1145 Rationale for Changes (shown with highlighting): “Fossil-Fuel Refinery Capacity”
1146 does not occur in the proposal. “Refinery Capacity” appeared one time
1147 (proposed WCC 20.68.801(2)(a)(ii)), but the Planning Commission recommends
1148 deleting this section of the proposal. Therefore, a definition is not needed.

1149 20.97.163 Greenhouse Gas Emissions

1150 “Greenhouse Gas Emissions” means gases that trap heat in the atmosphere. “Greenhouse gas,” “greenhouse gases,” “GHG,”
1151 and “GHGs” includes carbon dioxide, methane, nitrous oxide, hydrofluorocarbons, perfluorocarbons, and sulfur hexafluoride,
1152 and any other gas or gases designated by the federal clean air act (United States Code Title 42, Chapter 85), ~~or~~ state clean air
1153 act (Chapter 70.94 RCW) or state limiting greenhouse gas emissions law (Chapter 70.235 RCW).

1154 *Discussion/Notes: See RCW 70.235.010 and RCW 70.94.030 regarding State laws.*
1155 *See also <https://www.epa.gov/ghgemissions/overview-greenhouse-gases>.*

1156 20.97.201 Lifecycle Greenhouse Gas Emissions

1157 “Lifecycle greenhouse gas emissions” means the aggregate quantity of greenhouse gas emissions (including direct emissions
1158 and significant indirect emissions), related to the full fuel lifecycle, including all stages of fuel and feedstock production and
1159 distribution, from feedstock generation or extraction through the distribution and delivery and use of the finished fuel to the
1160 ultimate consumer, where the mass values for all greenhouse gases are adjusted to account for their relative global warming
1161 potential.

1162 Discussion/Notes: Considers a definition under the Clean Air Act. See:
1163 [https://www.epa.gov/renewable-fuel-standard-program/lifecycle-analysis-greenhouse-](https://www.epa.gov/renewable-fuel-standard-program/lifecycle-analysis-greenhouse-gas-emissions-under-renewable-fuel)
1164 [gas-emissions-under-renewable-fuel](https://www.epa.gov/renewable-fuel-standard-program/lifecycle-analysis-greenhouse-gas-emissions-under-renewable-fuel) and
1165 <https://www.govinfo.gov/content/pkg/USCODE-2010-title42/html/USCODE-2010->
1166 [title42-chap85.htm](https://www.govinfo.gov/content/pkg/USCODE-2010-title42/html/USCODE-2010-title42-chap85.htm).

20.97.202 Living Wage

1167
1168 “Living wage” means the hourly rate that an individual must earn to support their family, if they are the sole provider and are
1169 working full time (2080 hours per year). For the purposes of this definition family includes four individuals.

1170 Discussion/Notes: Based on a definition published by Massachusetts Institute of
1171 Technology. See <http://livingwage.mit.edu/counties/53073>. There is a living wage
1172 calculator for each state and each county within. Living wage ordinances vary in their
1173 wage rates, and they often set the hourly wage a full-time, year-round worker must earn
1174 to bring a family of four out of poverty. See:
1175 <http://www.forworkingfamilies.org/resources/policy-tools-living-wage>.

1176 Rationale for Changes (shown with highlighting): On January 30, 2020, the Planning Commission
1177 passed a motion to delete the “living wage” job language from the conditional use permit approval
1178 criteria (proposed WCC 20.68.153). This term does not appear elsewhere in the proposal.

20.97.230 Maximum Atmospheric Crude Distillation Capacity

1180 “Maximum Atmospheric Crude Distillation Capacity” or “MACDC” is the maximum number of barrels of input that the
1181 atmospheric distillation unit can process within a 24-hour period when running at maximum capacity. Maximum capacity is
1182 defined as the physical constraints of the atmospheric distillation process equipment as determined by a professional engineer
1183 licensed in the State of Washington and shall be measured in barrels per day.

1184 NOTE: Renumber existing WCC 20.97.230 (definition of “May”) to WCC 20.97.231.

1185 Rationale for Changes (shown with highlighting): On January 30, 2020, the
1186 Planning Commission approved a motion adding the above definition to the Zoning
1187 Code (the definition was proposed by industry). This term is used in proposed
1188 WCC 20.68.153.

20.97.350.1 Renewable Biomass

1189 “Renewable biomass” includes but is not limited to the following:

1190 (1) Planted crops and crop residue harvested from agricultural land.

1191 (2) Planted trees and tree residue from a tree plantation.

1192 (3) Animal waste material and animal byproducts.

1193 (4) Slash and pre-commercial thinnings.

1194 (5) Organic matter that is available on a renewable or recurring basis.

1195 (6) Algae.

1197 (7) Separated yard waste or food waste, including recycled cooking and trap grease.

1198 (8) Items 1 through 7 including any incidental, de minimis contaminants that are impractical to remove and are related to
1199 customary feedstock production and transport.

1200 *Discussion/Notes: Adapted from based on federal renewable fuel definition,*
1201 <https://www.law.cornell.edu/cfr/text/40/80.1401>.

1202 20.97.350.2 Renewable Fuel

1203 “Renewable Fuel” means liquid fuels produced from renewable biomass and limited in terms of blending with fossil fuels.
1204 Common renewable fuels include ethanol and biodiesel:

1205 (1) "E85 motor fuel" means an alternative fuel that is a blend of ethanol and hydrocarbon of which the ethanol portion is
1206 nominally seventy-five to eighty-five percent denatured fuel ethanol by volume that complies with the most recent version of
1207 American society of testing and materials specification D 5798.

1208 (2) "Renewable diesel" means a diesel fuel substitute produced from nonpetroleum renewable sources, including vegetable
1209 oils and animal fats, that meets the registration requirements for fuels and fuel additives established by the federal
1210 environmental protection agency in 40 Code of Federal Regulations (C.F.R.) Part 79 (2008) and meets the requirements of
1211 American society of testing and materials specification D 975.

1212

Rationale for Changes (shown with highlighting): Federal regulations may be amended over time.

1214 (3) Renewable fuels shall include those designed to result in a lifecycle greenhouse gas emission reduction of at least 50% or
1215 more under the Federal Clean Air Act. Renewable fuels shall not include products produced from palm oil or other
1216 feedstocks that cannot be proven to reduce greenhouse gas emissions utilizing accepted methods of the Washington State
1217 Department of Ecology or US EPA.

1218 *Discussion/Notes: A basic renewable fuel energy source is biomass. From biomass,*
1219 *common liquid fuel forms include ethanol and biodiesel. See:*
1220 https://www.eia.gov/energyexplained/?page=renewable_home.

1221 Washington State defines renewable diesel and E85 motor fuel in the motor fuel
1222 quality act (Chapter 19.112 RCW), which are integrated in the definition.

1223 Limiting fossil fuel percentages to 5% is workable for buses and power cars. See
1224 <http://www.cleanairtrust.org/Differences-Between-E85-and-E95.html>. E85 includes 15-
1225 25% fossil fuels and is used by flexibly fueled vehicles. See
1226 <https://www.fueleconomy.gov/feg/flextech.shtml>.

1227 Under the EPA renewable fuel standard, three of four renewable fuel categories must
1228 meet a 50% or 60% lifecycle greenhouse gas (GHG) reduction. A fourth conventional
1229 renewable ethanol must meet a 20% lifecycle GHG reduction. See:
1230 [https://www.epa.gov/renewable-fuel-standard-program/overview-renewable-fuel-](https://www.epa.gov/renewable-fuel-standard-program/overview-renewable-fuel-standard)
1231 [standard](https://www.epa.gov/renewable-fuel-standard-program/overview-renewable-fuel-standard).

1232 20.97.350.3 Renewable Fuel Refinery

1233 A “Renewable Fuel Refinery” means a facility that processes or produces renewable fuels. This definition excludes Small
1234 Fossil or Renewable Storage and Distribution Facilities.

20.97.425.1 Small Fossil or Renewable Fuel Storage and Distribution Facilities

“Small Fossil or Renewable Fuel Storage and Distribution Facilities” means:

- (1) Equipment and buildings used for purposes of direct sale or distribution to consumers of fossil fuels or renewable fuels, or
- (2) Accessory equipment that supplies fossil fuels or renewable fuels to an onsite allowed commercial or industrial operation, and that does not meet the definitions of fossil-fuel refinery, renewable fuel refinery, or fossil or renewable fuel transshipment facilities.

Rationale for Changes (shown with highlighting): Buildings may also be needed at small scale facilities.

20.97.434.1 Technical committee.

“Technical committee” or “technical review committee” means the designated representatives of the Whatcom County Planning and Development Services Director, who shall act as chairperson, the Whatcom County Public Works Director, and the Whatcom County Health Department Director.

Exhibit D

1270

1271

1272

CHAPTER 22.05 PROJECT PERMIT PROCEDURES

1273

22.05.020 Project permit processing table.

1274

1275

1276

1277

(1) Marked boxes in the table below indicate the required general steps for processing all project permit applications or administrative actions. The requirements for each step listed in the top row of the table are provided in WCC 22.05.040 through 22.05.160, as indicated. Specific requirements for each project permit can be found through the references given in the table.

Permit Application Processing Table	WCC Reference for Specific Requirements	Pre-Application Required (see 22.05.040)	Determination of Completeness Required (see 22.05.050)	Notice of Application Required (see 22.05.070)	Site Posting Required (see 22.05.080)	Notice of Open Record Hearing Required (see 22.05.090)	Open Record Hearing Held By: (see 22.05.090)	County Decision Maker (see 2.11.210, 22.05.120)	Appeal Body (see 2.11.210, 22.05.160, 23.60.150(H))
Type I Applications (Administrative Decision with No Public Notice or Hearing)									
Boundary Line Adjustment	21.03							Administrator	Hearing Examiner
Building Permit	15.04	(f)						Administrator	Hearing Examiner (i)
Natural Resource Assessment	Title 16							Administrator	Hearing Examiner
<u>Change of Use, Cherry Point Industrial District</u>	<u>Chapter 20.74</u>							<u>Administrator</u>	<u>Hearing Examiner</u>

Development Agreement	2.11.205						Hearing Examiner	County Council	Superior Court
Major Project Permit	20.88						Hearing Examiner	County Council	Superior Court
Planned Unit Development	20.85						Hearing Examiner	County Council	Superior Court

1278

1279 Check marks indicate a step is required; reference letters refer to the notes in subsection (2) of this section.

1280 *Discussion/Notes: Scrubbing the Existing Code for consistency with new provisions and*
 1281 *desired review process.*

Rationale for Changes (shown with highlighting): On January 30, 2020, the Planning Commission passed a motion to delete the proposed change of use provisions of WCC 20.74.110. Therefore, the “Change of Use” permit type is no longer needed.

1282

1283

1284

1285 **22.05.110 Final decisions – Type I, II, and III applications.**

1286 (1) The director or designee’s final decision on all Type I or II applications shall be in the form of a written determination or
 1287 permit. The determination or permit may be granted subject to conditions, modifications, or restrictions that are necessary to
 1288 comply with all applicable codes.

1289 (2) The hearing examiner’s final decision on all Type III applications per WCC 22.05.020 or appeals per WCC 22.05.160(1)
 1290 shall either grant or deny the application or appeal.

1291 (a) The hearing examiner may grant Type III applications subject to conditions, modifications or restrictions that the
 1292 hearing examiner finds are necessary to make the application compatible with its environment, carry out the objectives
 1293 and goals of the comprehensive plan, statutes, ordinances and regulations as well as other official policies and objectives
 1294 of Whatcom County.

1295 (b) Requirements:

1296 (i) Performance bonds or other security, acceptable to the prosecuting attorney, may be required to ensure
 1297 compliance with the conditions, modifications and restrictions.

1298 (ii) Fossil or Renewable Fuel Refinery or Fossil or Renewable Fuel Transshipment Facilities: The applicant shall
 1299 provide insurance or other financial assurance acceptable to the prosecuting attorney consistent with Section
 1300 22.05.125.

1301 (c) The hearing examiner shall render a final decision within 14 calendar days following the conclusion of all testimony
 1302 and hearings. Each final decision of the hearing examiner shall be in writing and shall include findings and conclusions
 1303 based on the record to support the decision.

1304 (d) No final decision of the hearing examiner shall be subject to administrative or quasi-judicial review, except as
1305 provided herein.

1306 (e) The applicant, any person with standing, or any county department may appeal any final decision of the hearing
1307 examiner to superior court, except as otherwise specified in WCC 22.05.020. (Ord. 2019-013 § 1 (Exh. A); Ord. 2018-
1308 032 § 1 (Exh. A)).

1309 **22.05.120 ~~Recommended~~ Recommendations and final decisions ~~to county council.~~ Type**
1310 **IV applications**

1311 (1) For Type IV applications per WCC 22.05.020 the hearing examiner’s recommendations to the county council may be to
1312 grant, grant with conditions or deny an application. The hearing examiner’s recommendation may include conditions,
1313 modifications or restrictions as may be necessary to make the application compatible with its environment, carry out the
1314 objectives and goals of the comprehensive plan, statutes, ordinances and regulations as well as other official policies and
1315 objectives of Whatcom County.

1316 (2) Each recommended decision of the hearing examiner for an application identified as a Type IV application per WCC
1317 22.05.020 shall be in writing to the clerk of the county council and shall include findings and conclusions based upon the
1318 record to support the decision. Such findings and conclusions shall also set forth the manner in which the decision carries out
1319 and conforms to the county’s comprehensive plan and complies with the applicable statutes, ordinances or regulations.

1320 (3) The deliberation of the county council on quasi-judicial actions shall be in accordance with WCC 22.05.090(4) and
1321 Chapter 42.36 RCW.

1322 (4) For planned unit developments and major project permits the following shall apply:

1323 (a) The recommendation of the hearing examiner regarding planned unit developments and major project permits shall
1324 be based upon the criteria set forth in WCC 20.85.335 and 20.88.130, respectively.

1325 (b) The hearing examiner shall file the recommendation with the clerk of the county council within 21 calendar days
1326 following the conclusion of the open record hearing.

1327 (c) The county council shall conduct the following within the specified time frames, except as provided in subsection
1328 (4)(c)(iii) of this section:

1329 (i) Hold a public meeting, not an open record public hearing, to deliberate on the project application within 28
1330 calendar days after receiving the hearing examiner’s recommendation.

1331 (ii) Issue a final written decision within 21 calendar days of the public meeting.

1332 (iii) The county council may exceed the time limits in subsection (4)(c)(i) or (ii) of this section if the county council
1333 meeting schedule does not accommodate a meeting within the above time frames, or if the county council makes
1334 written findings that a specified amount of additional time is needed to process a specific application or project
1335 type, per RCW 36.70B.080(1).

1336 (5) The county council’s final written decision may include conditions when the project is approved and shall state the
1337 findings of fact upon which the decision is based.

1338 (a) Performance bonds or other security, acceptable to the prosecuting attorney, may be required to ensure compliance
1339 with the conditions, modifications and restrictions.

1340 (b) Fossil or Renewable Fuel Refinery or Fossil or Renewable Fuel Transshipment Facilities: The applicant shall
1341 provide insurance or other financial assurance acceptable to the prosecuting attorney consistent with Section 22.05.125.

1342 (6) Any deliberation or decision of the county council shall be based solely upon consideration of the record established by
1343 the hearing examiner, the recommendations of the hearing examiner and the criteria set forth in county code, applicable state
1344 laws and regulations, county code, the county comprehensive plan if applicable, and the county shoreline management
1345 program, including but not limited to compliance with SEPA, WAC 197-11 (SEPA Rules) as adopted and modified in the
1346 county code, and the county’s adopted SEPA policies. (Ord. 2018-032 § 1 (Exh. A)).

1347

Rationale for Changes (shown with highlighting): Other parts of the proposal require that state permits be obtained. However, that is different than the County Council or hearing examiner evaluating criteria in state laws and regulations. It's the applicable state agency's job to evaluate state criteria, determine if those criteria are met, and then issue the permit. A copy of that permit can then be submitted to the County.

22.05.125 Proof of insurance for hazards created in the County

Permit applicant to provide proof of insurance naming Whatcom County as additional insured.

Rationale for Changes (shown with highlighting): On November 14, 2019, the Planning Commission approved a motion to insert the insurance language above and delete the insurance language below.

~~At the time of Type I, II, III, or IV applications addressing production capacity or storage tank increases at fossil fuel refineries, fossil fuel transshipment facilities, renewable fuel refineries, or renewable fuel transshipment facilities (Facilities), the applicant shall provide proof of insurance or other financial security acceptable to the prosecuting attorney, which may include a parent company corporate guarantee to cover loss or damages to the County and to County residents from any fire, explosion, spill or other sudden incident from operations of the Facility or from transport of materials, goods, products or waste within the boundaries of Whatcom County. This requirement shall also be met for Type I changes in use from fossil fuel refineries or transshipment facilities to renewable fuel refineries or transshipment facilities. The required policies and any parent company corporate guarantee shall contain the following Coverage Terms:~~

~~(1) Insureds: The Primary Named Insured shall include the Permitted Entity(ies). The County shall be included as additional Insured and shall be provided complete copies of applicable insurance policies and endorsements.~~

~~(2) Insuring Agreements: Insurance shall pay on behalf of the Insured for loss from third party bodily injury, property damage or environmental remediation and restoration expenses resulting from sudden pollution conditions commencing on or after the Permit effective date, either:~~

~~(a) emanating from and beyond the boundaries of a Permitted Facility; or~~

~~(b) arising from materials or waste during transportation to or from a Permitted Facility.~~

~~(3) Policy Limits: Policy limits shall be no less than \$100 million for each Loss / total for all Losses. The required limits may be revised periodically by the County based on factors including inflation adjustments and Permit or Facility specific risks.~~

Discussion/Note: Minimum insurance amounts could be increased, but at levels above \$50 million to \$100 million may not be available in the insurance market. We suggest taking out the \$100 million liability limit and substituting language that determines the liability limit as each permit is reviewed and made part of a development agreement. Other forms of financial assurance instruments could be allowed such as a letter of credit a parent company corporate guarantee or other financial assurance acceptable to the County Prosecutor as a substitute for commercial insurance. We have included code language to that effect in this draft. The County could also indicate that the amount of financial assurance is to be determined at the point of an approval decision for a facility expansion rather than specifying an amount here.

~~(4) Policy Deductibles: If the Policy has a deductible, the Insurer shall be liable for the payment of amounts within any deductible or self insured retention amount applicable to the policy, with a right of reimbursement by the Insured for any such payment made by the Insurer. If the Policy has a self insured retention (SIR) amount, the Primary Named Insured shall~~

1387 declare how it intends to provide a financial assurance to the County for such SIR amount, where acceptable forms of
1388 financial assurance are letters of credit and certificates of deposit.

1389 (5) Term and Cancellation Notice:

1390 (a) Insurance shall be carried for the lifetime of the Permitted Facility.

1391 (b) Cancellation of the insurance, whether by the Insurer, the Insured, or other entity having an insurable interest in
1392 and obtaining insurance on behalf of the owner or operator of the Permitted Facility, will be effective only upon
1393 written notice and only after the expiration of 60 days after a copy of such written notice is received by the County
1394 as evidenced by the return receipt.

1395 (6) Bankruptcy: Bankruptcy or insolvency of the Insured shall not relieve the Insurer of its obligations under the policy.

1396 (7) Choice of Law and Forum: The Policy shall not specify that the laws of a state other than the State of Washington apply
1397 in the event of any dispute regarding the validity or formation of the Policy or the meaning, interpretation or operation of any
1398 term, condition, definition or provision of the Policy. Policies may remain silent on choice of law and forum.

1399 (8) Insurance Company Financial Strength – Minimum Rating: The Insurer shall meet or exceed a Financial Strength Rating
1400 from A.M. Best of “A” (Excellent) with a minimum Financial Size Category of XIV and a “Stable” or stronger Outlook, or
1401 the equivalent from another major financial rating agency.

1402 (9) Definitions: For the purposes of this section, terms are defined as follows:

1403 (a) Permitted Facility: Permitted Facility means a location identified in the applicable County Permit, including any
1404 fixed conveyances and terminal distribution systems, as well as pump and compressor stations and related facilities.

1405 (b) Loss shall include:

1406 (i) monetary awards or settlements of compensatory damages; and

1407 (ii) where allowable by law, punitive, exemplary, or multiple damages; and

1408 (iii) civil fines, penalties, or assessments.

1409 (c) Pollution conditions shall include discharge, dispersal, release or escape, including by fire or explosion, of any solid,
1410 liquid, gaseous or thermal irritant or contaminant, including, but not limited to, petroleum hydrocarbons, smoke, vapors,
1411 soot, fumes, acids, alkalis, or other chemicals.

1412 (d) Sudden pollution conditions may be defined by reasonable time limits for discovery and reporting to the insurer.

1413 (e) Transportation means movement by any vehicle or mode of transit including but not limited to automobile, truck, or
1414 watercraft, as well as and is inclusive of loading, temporary placement during transit prior to final delivery, or
1415 unloading, of materials goods, products or waste, either:

1416 (i) intended for delivery to a Permitted Facility, or

1417 (ii) being sent from a Permitted Facility.
