

South Fork Nooksack River Fish Camp (Ts'éq) Integrated Flood & Fish Project **COMMUNITY WORKSHOP**

This integrated design project is a collaboration of the Nooksack Indian Tribe and Whatcom County River and Flood to develop broadly-supported solutions to address community needs. The overall goal for this project is to reduce flood risk to the Acme community and restore habitat for Chinook salmon in the lower South Fork Nooksack River.

You are invited to attend our upcoming **community workshop** to review and provide feedback on the highest ranked alternative and preliminary design for the project. This workshop will also be an opportunity for the project team to answer any questions and address remaining project considerations.

We will be hosting the community workshop in Acme at the Acme Presbyterian Church. Please RSVP by emailing the names of the people in your party to outreach@vedaenv.com by September 12th.

We are also asking stakeholders to fill out a brief online poll to share your individual experiences with flooding. We would like to incorporate these recent experiences and observations into our hydraulic modeling and use them to better inform the community needs into the design process. You can find the link to the poll on the project webpage (below).

Previous project materials and the last community workshop info can be found on the project webpage at: <https://www.whatcomcounty.us/3106/South-Fork-Fish-Camp-Integrated-Project>

PURPOSE

Share the highest ranked alternative and preliminary design for this project and answer questions/request feedback from participants.

HOSTED BY

Nooksack Indian Tribe, Whatcom County

DATE & TIME

Thursday, September 15th, 5:30-7:30 PM

LOCATION

Acme Presbyterian Church
2054 Valley Hwy, Deming, WA 98244
